SECTION II: GENERAL INSTRUCTIONS TO TENDERERS (GIT)

Part I & II: General Instructions Applicable to all Types of Tenders

Please refer to our website for:

<http://www.spmcil.com/spmcil/UploadDocument/GIT.pdf>

SECTION III: SPECIAL INSTRUCTIONS TO TENDERERS (SIT)

The following Special Instructions to Tenderers will apply for this purchase. These special instructions will modify/ substitute/ supplement the corresponding General Instructions to Tenderers (GIT) incorporated in Section II.

The corresponding GIT clause numbers have also been indicated in the text below. In case of any conflict between the provision in the GIT and that in the SIT, the provision contained in the SIT shall prevail.

S.No.	GIT Clause No.	Topic	SIT Provision
1.	11.2	Tender Currency	SIT - 1 (Mentioned below)
2.	12.10	Applicability of Octroi and Local taxes	SIT - 2 (Mentioned below)
3.	14	PVC Clause & Formula	SIT - 3 (Mentioned below)
4.	19	Tender Validity	SIT - 4 (Mentioned below)
5.	21	Submission of Tender	SIT - 5 (Mentioned below)
6.	33	Evaluation Criteria	SIT - 6 (Mentioned below)
7.	43	Parallel Contracts	Not Applicable
8.	50.1, 50.3	Tender For rate Contracts	Not Applicable
9.	51.1, 51.2	Eligibility Criteria	As Mentioned in Section IX
10.	53.4, 53.5, 53.7	EOI Tenders	Not Applicable
11.	54.3.1, 54.5.2	Tenders for Disposal of Scrap	Not Applicable
12.	55.2, 55.3, 55.7, 55.8	Development/Indigenization Tenders	Not Applicable
13.	21.1, 24.1	Correction in GIT Clause	SIT - 7 (Mentioned below)
14.	18	Earnest Money Deposit	SIT-8 (Mentioned below)

SIT 1: Tender currencies: The tenderer shall quote only in **Indian rupees**. Tenderer is requested to quote price within two decimal place. Quotation with price quote beyond 2 decimal place will be ignored.

SIT 2: Wherever GST is applicable, the following may be noted:

- (i) The tenderer should quote the exact percentage of GST that they will be charging extra.

- (ii) While quoting the rates, tenderer should pass on (by way of reduction in prices) the set off/input tax credit that would become available to them by switching over to the system of GST from the erstwhile system of sales tax, duly stating the quantum of such credit per unit of the item quoted for.
- (iii) The tenderer while quoting for tenders should give the following declaration:
“We agree to pass on such additional set off/input tax credit as may become available in future in respect of all the inputs used in the manufacture of the final product on the date of supply under the GST scheme by way of reduction in price and advise the purchaser accordingly.”
- (iv) The supplier while claiming the payment shall furnish the following certificate to the paying authorities: “We hereby declare that additional set offs/input tax credit to the tune of Rs. _____ has accrued and accordingly the same is being passed on to the purchaser and to that effect the payable amount may be adjusted .

SIT 3: Price Variation Clause: The prices should be firm & fixed during the entire currency of the contract

SIT 4: Tender Validity

- The tenders shall remain valid for acceptance for a period of **180 days** after the date of tender opening prescribed in the tender document. Any tender valid for a shorter period shall be treated as unresponsive and rejected.
- In exceptional cases, the tenderers may be requested by BNP DEWAS to extend the validity of their tender up to a specified period. Such request(s) and responses thereto shall be conveyed by surface mail or by fax/e-mail followed by surface mail. The tenderers, who agree to extend the tender validity, are to extend the same without any change or modification of their original tender. A tenderer, however, may not agree to extend its tender validity.
- In case the day up to which the tenders are to remain valid falls on/ subsequently declared a holiday or closed day for BNP DEWAS, the tender validity shall automatically be extended up to the next working day.
- **Compliance with the Clauses of this Tender Document:** Tenderer must comply with all the clauses of this Tender Document. In case there are any deviations, these should be listed in a chart form without any ambiguity along with justification.

SIT 5: Submission of Tender:

Tender along with corrigendum shall be made available on the <https://www.mstcecommerce.com>. The bidder needs to register and submit the bid on the MSTC portal only. No hardcopy shall be accepted.

Pre-qualification Bid, Techno-commercial bid and Price Bid are to be submitted separately on MSTC Portal on or before the due date of the submission of the tender as stated below otherwise tender / bid / quotation shall be liable for rejection.

Part-I: Pre-qualification bid

As per Section XXI (Bidding Forms)- Form no. 3 Checklist for pre-qualification proposal

Part- II: Techno-commercial Bid

As per Section XXI (Bidding Forms)- Form no. 5 Checklist for Technical proposal

Part- III: Price Bid

The tenderer shall quote their prices strictly as per the proforma given in **Section-XI** of the tender document.

Tender along with corrigendum shall be made available on the "<https://www.mstcecommerce.com/>". The bidder needs to register and submit the bid on the MSTC portal only. No hardcopy shall be accepted.

SIT6: Evaluation Criteria: As per Section IX "Bid Evaluation Methodology and Qualification Criteria

SIT 7: Corrections in GIT Clauses:

GIT CLAUSE	WRITTEN AS IN GIT	CORRECTED AS IN SIT
21.1	In 3rd line of procurement manual the words "Para 11 of NIT"	"Para 1 of NIT"
21.1	In 6th line of procurement manual the words "Clause 11 of NIT"	"Clause 1 of NIT"
24.1	In 2nd line of procurement manual the words "Clause 11 of NIT"	"Clause 1 of NIT"
18.4	In third line of last para of procurement manual the words "Clause 33 of NIT"	"Clause 3 of NIT"
10.1	10.1(a) second line "clause no.19.19"	"Clause 19.4 of GIT"

SIT 8: Earnest Money Deposit:

For MSE firms: "Bid Security Declaration "Against EMD, MSE bidder firm have to submit a seal & sign "Bid Security Declaration" accepting that if the firm withdraw or modify their bid during the period of bid validity after opening of tender they will be suspended for a period of 3 years from the date of opening of tender.

In addition to above, firms participating as MSE/NSIC/DIC/Start-up India Campaign, needs to enclosed certificates containing validity (including registered category-if any).

For non MSE firms: Rs. 75, 00,000/- in either of the following form:-

- a) Account Payee Demand Draft or
- b) Fixed Deposit Receipt or
- c) Banker's cheque

Or may be submitted online through direct bank transfer.

The earnest money (EMD) should be valid for a period of 45 days beyond the final tender validity period.

SECTION IV: GENERAL CONDITIONS OF CONTRACT (GCC)

Part I: General Conditions of Contract applicable to all types of Tenders

Please refer to our website for:

<http://www.spmcil.com/spmcil/UploadDocument/GCC.pdf>

SECTION V: SPECIAL CONDITIONS OF CONTRACT (SCC)

The following Special Conditions of Contract (SCC) will apply for this purchase. The corresponding clauses of General Conditions of Contract (GCC) relating to the SCC stipulations have also been incorporated below. These Special Conditions will modify/ substitute/ supplement the corresponding (GCC) clauses.

Whenever there is any conflict between the provision in the GCC and that in the SCC, the provision contained in the SCC shall prevail.

S. No	GCC Clause No.	Topic	SCC Provision
3	12.2	Insurance	SCC - 3 (Mentioned below)
4	14.1	Incidental Services	Not Applicable
5	15	Distribution of Dispatch Documents for clearance/ Receipt of Goods	SCC - 4 (Mentioned below)
6	16.2,16.4	Warrantee Clause	SCC - 5 (Mentioned below)
7	19.3	Option Clause	SCC - 6 (Mentioned below)
8	20.1	Price Adjustment Clause	Not Applicable
9	21.2	Taxes and Duties	SCC - 7 (Mentioned below)
10	22,22.1,22.2,22.4,22.3,22.6	Terms and Mode of payments	SCC - 8 (Mentioned below)
11	24.1	Quantum of LD	SCC - 9 (Mentioned below)
12	25.1	Bank Guarantee and Insurance for Material Loaned to Contractor	Not Applicable
13	33.1	Resolution of Disputes	SCC - 10 (Mentioned below)
14	36.3.2,36.3.9	Disposal/ Sale of Scrap by Tender	Not Applicable
15		Arbitration Clause	SCC -11 (Mentioned below)
16		Failure & Termination Clause	SCC -12 (Mentioned below)
17		Force Majeure Clause	SCC -13 (Mentioned below)

SCC - 3: Insurance: As the supplier has to deliver the material on FOR SPM/BNP/CNP/DC/DR Basis therefore the cost of the insurance will also be the part of the total cost of the material borne by the supplier.

SCC - 4: Distribution of Dispatch Documents for Clearance/ Receipt of Goods: The supplier shall send all the relevant dispatch documents well in time to SPM/BNP/CNP/DC/DR to enable SPM/BNP/CNP/DC/DR to clear or receive (as the case may be) the goods in terms of the contract.

SCC-5: Warranty Clause: As per Section VII clause no. 1.19 Warranty & Comprehensive Annual Maintenance contract

SCC-6: Option Clause: As per Section XI Table 1 Point no. 7

SCC-7: Taxes and Duties: Supplier shall be entirely responsible for all taxes, fees, levies etc. incurred until delivery of the contracted goods to BNP DEWAS and all respective project location. Any statutory increase or decrease in the taxes needs to be adjusted accordingly.

SCC-8: Terms and Mode of Payment: As per Section VII – Clause no. 6- Payment and timelines

SCC-9: Quantum of Liquidated damages: As per Section VII Clause no. 3.3 Part A

SCC-10: Resolution of disputes:

If dispute or difference of any kind shall arise between BNP DEWAS and the supplier in connection with or relating to the contract, the parties shall make every effort to resolve the same amicably by mutual consultations. If the parties fail to resolve their dispute or difference by such mutual consultation within twenty one days of its occurrence, then, unless otherwise provided in the SCC, either BNP DEWAS or the supplier may seek recourse to settlement of disputes through arbitration as per The Arbitration and conciliation Act 1996 as per following clause.

Arbitration Clause:- In case of any dispute or difference arises out of or in connection with or the carrying out of the contract (whether during the progress of the contract or after their completion and whether before or after the determination, abandonment or breach of the contract) except as to any of the accepted matters, provided hereunder, the parties hereto, shall first Endeavour to settle such dispute or difference amicably.

- a. If both the parties fail to reach such amicable settlement, then party, the purchaser or contractor may (within 28 days of such a failure) give a written notice to the other party requiring that all matters in dispute or difference be arbitrated upon. Such written notice shall specify the matters which are in difference or of differences of which such written notice has been given and no other matter shall be referred to the arbitration in accordance with the conciliation & arbitration rules of International Chambers of Commerce (ICC)/United Nation Commission on International Trade Law (UNCITRL) by three arbitrators appointed in accordance with the procedure set out in clause below.
- b. Venue of arbitration shall be Dewas/Indore or any other place in India at the choice of purchaser.
- c. The arbitrator or arbitrators appointed under this article shall have the power to extend time to make the award with the consent of the parties.
- d. Pending reference to arbitration, the parties shall make all endeavor to complete the Contract/work in all respect and all disputes, if any, will finally be settled in the arbitration.
- e. Upon every or any such reference to the arbitration, as provided herein the cost of any incidental to the reference and award respectively shall be in discretion of the arbitrator or arbitrators or the umpire, as the case may be.
- f. The award of the arbitrator or arbitrators, as the case may be, shall be final and binding on the parties. It is agreed that the contractor shall not delay the carrying out of the contract/works by reason of any such matter, question or dispute being referred, to arbitration, but shall proceed with the contract/works with all due diligence. The purchaser and the contractor hereby also agree that arbitration under

SCC-12: Failure & Termination

- a. Cancellation of contract for Default: Without prejudice to any other remedy for breach of contract, like removal from the list of registered supplier, by written notice of default sent to the supplier, the contract may be terminated in whole or in part:

- i. If the supplier fails to provide any or all the goods within the time period (s) specified in the contract, or any extension thereof granted
 - ii. If the supplier fails to perform any other obligation under the contract within the period (s) specified in the contract or any extension thereof granted.
- b. Termination of Contract for convenience: Bank Note Press, Dewas (M.P.) may at any time terminate the Contract by giving you one month's prior notice in writing to that effect and shall have the liberty to appoint any other agency to carry out your obligations under this Contract.

SCC-13: Force Majeure:

13.1 In the event of any unforeseen event directly interfering with the supply of stores arising during the currency of the contract, such as war, hostilities, acts of the public enemy, civil commotion, sabotage, fires, floods, explosions, epidemics, quarantine restrictions, strikes, lockouts, or acts of God, the Contractor shall, within a week from the commencement thereof, notify the same in writing to the Purchaser with reasonable evidence thereof. Unless otherwise directed by in writing, the supplier shall continue to perform its obligations under the contract as far as reasonably practical, and shall seek all reasonable alternative means for performance not prevented by the Force Majeure event.

If the force majeure condition(s) mentioned above be in force for a period of 90 days or more at any time, either party shall have the option to terminate the contract on expiry of 90 days of commencement of such force majeure by giving 14 days' notice to the other party in writing. In case of such termination, no damages shall be claimed by either party against the other, save and except those which had occurred under any other clause of this contract prior to such termination.

13.2 Notwithstanding the provisions contained in GCC clauses 23, 24 and 26, the supplier shall not be liable for imposition of any such sanction so long the delay and/ or failure of the supplier in fulfilling its obligations under the contract is the result of an event of Force Majeure.

13.3 In case due to a Force Majeure event is unable to fulfill its contractual commitment and responsibility, BNP Dewas will notify the supplier accordingly and subsequent actions taken on similar lines described in above sub-paragraphs.

SECTION VI: LIST OF REQUIREMENTS

S. No.	Brief Description of Goods	Quantity	Earnest Money Deposit/ Bid Security Declaration
1.	Supply, Installation, Commissioning and Maintenance of Track and Trace System at SPM-Narmadapuram, BNP-Dewas and CNP-Nashik	As per Bill of Material	As per SIT Clause no. 12

1. **Required Terms of Delivery & Destination:** FOR BNP Dewas, SPM Narmadapuram, CNP Nashik, Data Centre at Noida and Disaster Recovery Centre at Hyderabad.
2. **Required Delivery Schedule:** As per Section VII Clause no. 6- Payment and Timeline
3. **Preferred mode of Transportation:** As desired by the bidder which should be in safe and secured manner.
4. **Security Deposit:** If the value of the purchase order will exceed **Rs. 1, 50,000/-** then the firm on whom purchase order will be placed will have to submit **3%** of the total cost of the purchase order against security deposit in form of Bank Guarantee/DD/ FDR/ Banker's cheque drawn on any scheduled commercial bank in India only in the favour of "The General Manager, BNP Dewas" payable at Dewas within **21 Days** from the date of Notification of Award of Contract. The Security Deposit should remain **valid for a period of 60 days beyond the date of completion** of all contractual obligations of the contractor, including warranty obligations, and will be refunded to the contractor without any interest, whatsoever, after it duly performs and completes the contract in all respects but not later than 60 days of completion of all such obligations under the contract. (As per letter no. F.9/4/2020-PPD Ministry of Finance, Department of Expenditure dated 12.11.2020 and subsequent amendment)
5. **LICENSES AND PERMITS:**
Wherever applicable, the successful bidder shall ensure himself and also satisfy the Chief General Manager, Security Printing Minting Corporation of India Limited, Unit Bank Note Press, Dewas that the successful bidder possesses the legal license / permit to use a particular product / process / design / patent. The successful bidder shall be held responsible for all the civil/ criminal and tortuous consequences arising from any claim from any third party in this regard.
6. **TRAINING:** As per Section VII Clause no. 1.11 Training and Capacity Building
7. **FALL CLAUSE:** The BIDDER undertakes that it has not supplied / is not supplying similar product / systems or sub-systems at a price lower than that offered in the present bid in respect of any other Customer/Organization and if it is found at any stage that similar products / systems or sub- systems was supplied by the BIDDER to any entities at a lower price than that very price with due allowance for elapsed time will be applicable to the present case and the difference in the cost would be refunded by the BIDDER to the BUYER if the contract has already been concluded.

8. The successful bidder shall provide documents/drawings for site preparation after placement of the LOI/Contract.
9. **AFTER SALES SUPPORT:** The supplier shall provide technical support for the system/machine and make available all required spares and consumables for a period of at least 10 years from the date of expiry of warranty period. Written commitment should be submitted in this regard along with technical bid.

BNP, Dewas reserves the right to extend the duration of the project up to 10 years. The terms and conditions of the RFP will be remained same during the extended period and the cost of the extension period will be paid to a bidder on a pro-rata basis.

10. RISK PURCHASE:

- (a) If the supplier after submission of tender and due acceptance of the same, i.e. Placement of Purchase order fails to abide by the terms and conditions of these tender documents, or fails to supply the deliverables as per delivery schedule given or at any time repudiates the contract, the purchaser shall have the right to:
 - (i) Forfeiture of the EMD if any and
 - (ii) Invoke the Security-cum-Performance Guarantee if deposited by the supplier and procure stores from other agencies at the risk and consequence of the supplier. The cost difference between the alternative arrangement and supplier tendered value will be recovered from the supplier along with other incidental charges, including custom duty, excise duty, taxes, insurance, freight etc.
- (b) For all the purpose the Purchase order will be considered acceptance of tender. Supplier has to abide by all the terms and conditions of tender.
- (c) In case of procurement through alternative sources and if procurement price is lower, no benefit on this account will be passed on to the supplier.

SECTION VII: SCOPE OF WORK AND TECHNICAL SPECIFICATION

1. SCOPE OF WORK

The Track and Trace (T&T) is an integrated system/solution which will comprises of both Hardware (Barcode Printer & Scanner, IIOT sensors, Sever, Storage, Networking, Security, etc.) and Application Software (Barcode generation, Tracking application, IOT application, etc.). The SI will be required to implement the complete solution in all the three units (viz. SPM-Narmadapuram, BNP-Dewas and CNP-Nashik) for tracking of sheets, reams, boxes, notes, bundles, etc., along with necessary integrations with existing ERP (SAP) for bidirectional flow of information. The T&T should be a robust and scalable solution to meet the existing as well as growing needs.

The scopes of work mentioned in this section are minimum requirements. Bidders may propose a better or more optimized solution that meets the objectives specified in this RFP. Also, Bidders are advised to carry out their own assessment of requirement before submission of the response to this bid. Anything which is missing in this section but required for successful execution of the project shall be provided by the Bidder without any additional cost.

Note: The Term “Barcode” shall be read as “Barcode/QR/2D code”, wherever applicable in this RFP

1.1. Design, Development and Customization

- a. The SI shall be responsible for design, develop, supply, installation, configuration, deployment/ customization and commissioning of the complete Track and Trace solution (both hardware and software) required to meet the objectives of the project.
- b. SI shall be responsible for detailed study of process being followed in BNP- Dewas, CNP- Nashik and SPM- Narmadapuram pertaining to paper manufacturing and currency printing.
- c. SI shall study the existing business process functionalities, operations and methodologies, MIS reporting requirements, problem areas and expectations.
- d. SI shall be responsible for detailed understanding of the existing SAP process (including functional and Technical requirements). SI shall have to coordinate with SPMCIL- IT Team in Delhi / DC Team in Noida for the same.
- e. It will be the responsibility of SI to coordinate with all the internal and external stakeholders involved in this project.
- f. The Requirement Traceability and Verification Matrix (RTVM) shall be prepared and maintain by SI to keep track of the requirements and trace their compliance through different stages of the Project.
- g. The SI team shall have to visit Project locations (units), DC-Noida and DR-Hyderabad for requirement gathering and system understanding. All such arrangements shall be made by SI only at no additional cost to BNP, Dewas
- h. The Team Leader shall be the single point of contact and shall assume overall responsibility for coordination with all the internal and external stakeholders involved in this project. Also, BNP, Dewas has appointed M/s. PricewaterhouseCoopers Private Limited (PwC) as Project Management Consultant for implementation of Track and Trace Project. The PwC team shall provide all the necessary support to the SI team for coordination with required stakeholders.

- i. SI shall conduct regular meetings between department (and its representatives) and the 'key personnel' to discuss project progress and implementation at desired locations. Also, submit project progress and status report on weekly basis (preferably on every Monday).
- j. SI shall also be responsible for effective risk and issue management and escalation procedures along with matrix as part of project management. SI shall identify, analyze, and evaluate the project risks and shall develop appropriate strategies and action plan for mitigation of risks. As part of the Project, SI shall monitor, report and update risk management plans and shall be discussed during project meetings
- k. SI shall also be responsible for all activities related to Quality Assurance and Control such as adhering to guidelines and standards of quality and compliance with the functional requirements of the project.
- l. The system should be designed and developed with high redundancy to ensure 100% accountability and traceability.
- m. The overall system should be scalable to support any addition of new machines, production lines and units in future. There should not be any constraint in application capabilities to add new users, machines, production lines and units.
- n. IT Security is paramount for the entire system and SI should ensure that all the necessary security mechanisms should be built in the system to ensure end-to-end security.
- o. The SI shall deploy and configure an appropriate role-based user access management system and configure authentication-based access for various users of the system. Electronic trail and event logs should be maintained and stored.
- p. The application source code is to be maintained in a centralized source code repository at DC, Noida and any changes in the code should be monitored through Version Control System to maintain accountability and appropriate audit trails. Any associated cost related to the same shall be borne by SI.
- q. The application should be designed and developed/customized in such a way that any number of new users and machines / lines can be added without any additional cost to BNP, Dewas.
- r. It is suggested that wherever applicable the Track & Trace system should be designed and developed using Open-Source technology.
- s. Track and Trace application platform should have provision for open API based architecture that facilitates easy integration with and by external applications to support interoperability. In case any of the components of the solution is a COTS product, appropriately designed wrappers shall be proposed, with the feature of publishing the APIs required for integration.
- t. Track and Trace application should be able to retrieve data from active database as well as archival.

1.2. Integration with Existing SAP ERP

- a. Track and Trace system shall be integrated with existing ERP (SAP) of SPMCIL for bidirectional flow of information. All the key information for decision-making shall be displayed to officials via SAP BI Dashboard. The indicative information for dashboard has been given in section 1.10. The detailed information shall be finalized once the SI is onboarded.
- b. SI shall be responsible for seamless integration with SAP at Process level, data level, field level, etc. Necessary customization required in existing modules of SAP shall be carried out by the SPMCIL DC team as per the requirements of Track and Trace system*.**
- c. SI shall ensure that all the interfaces shall be running without disrupting the core business of SAP

- d. SI should use middleware for communication between Track and Trace and SAP to ensure secured and seamless integration. The SI should use SAP PI/PO** middleware for integration between Track and Trace and existing SAP.
- e. The data exchange between two systems should be transmitted securely (encrypted) through secured HTTPS layer.
- f. The Interfaces developed in SAP for ECC6.0 by SI can be reconfigured for S/4 Hana environment after SAP version upgrade. (The SAP version upgrade from ECC6.0 to S/4 Hana is currently being carried out by SPMCIL through separate tendering process.). However, if S4 Hana gets upgraded before the starting of Track and Trace project, then the SI shall be responsible to directly integrate with S4 Hana.
- g. SI shall follow all the standard procedure and best practices for integration with Track and Trace.
- h. SI shall ensure that there should not be any disruption in existing working of SAP whatsoever due to integration with Track and Trace.
- i. SI should align and adhere with client's IT security policies.
- j. The existing SAP workflows are given in annexure. The bidders are advised to perform detailed assessment pertaining to SAP integration prior to bid submission.

Note:

*Changes in existing SAP including BI dashboard shall be done by the SPMCIL DC team. However, in case due to change in policy later, the Track and Trace SI shall have to make necessary changes, customizations, configuration in existing SAP. The same shall be finalized prior to issuance of Work Order to successful bidder and cost of the same (as per the quoted cost in financial bid) shall be paid to SI.

**SPMCIL is in process of upgrading the existing SAP through separate tendering process and SAP PI/PO licenses shall be part of the same. The Track and Trace SI, in close consultation with SPMCIL and BNP-Dewas may leverage SAP PI/PO licenses procured by SPMCIL. The same shall be finalized prior to issuance of Work Order to successful bidder and cost of the same (as per the quoted line-item wise cost in financial bid of Table-4) shall be adjusted accordingly. However, SI shall have to submit the justification for the number of PI/PO licenses requirement to BNP, Dewas and SPMCIL.

1.3. Supply, Installation and Commissioning of IT infrastructure at DC and DR

- a. SI shall supply, install and commission smart IT racks and IT components (compute, storage, network, security, etc.) with peripherals and accessories in the existing server farm of the DC-Noida & DR-Hyderabad. LT panel/ Power Distribution panels are available inside DC & DRC premises. SI needs to do the power cabling from the Panel to the Smart Rack.
- b. OS and DB licenses shall be procured and installed as per the solution requirement by SI.
- c. SI should ensure that installation and configuration of supplied items in no way impacts existing IT, non-IT & allied environment.
- d. SI shall not cause any damage to the existing infrastructure of DC / DR Site and shall need to perform restoration if any damage occurs at own cost
- e. In case, certain components which are required to meet the SLAs but not included in this RFP, the bidder shall include such equipment also in the unpriced bill of material and quote for the same in their Financial bid. It may be noted that specifications provided in this RFP are minimum requirement and SI can procure better equipment if required to meet the Scope of Work and SLAs

- f. All the work shall be done in a conscientious manner as per the OEM guidelines and best industry practices. The system shall be subjected to inspection at various stages. Local regulation / codes shall be followed all the times. The SI shall follow all safety regulations and practices.
- g. Bidder must consider cost of all passive materials like patch panel, cabling (Fiber, copper), etc. to install the necessary components under this project.
- h. SI shall need to augment the storage immediately, once it reaches the utilization of 70%.
- i. Disaster recovery site shall be in half capacity of proposed Data Center. However, storage would be identical in capacity.
- j. Entire solution shall be IPv6 implementation ready and shall support both IPv6 & IPv4 i.e., in Dual Stack mode from day one.
- k. As per company policy, VPN is not permitted in SPMCIL. It is to be noted that there should not be any VPN access of the production/development/staging environment to the SI and all the changes in this environment shall be carried out on site via using direct SPMCIL network only.
- l. Augmentation (if any) of storage and compute as per the solution at DC, DR and Units shall be under SI's scope, no additional cost shall be paid for the same during the contract period. However, in case of addition of new line/machines/units which is not covered in current scope shall be treated as change request and payment to the SI shall be made as per applicable clause for infrastructure part.
- m. Bidders should use necessary compression tools to ensure efficient utilization of storage.
- n. Development, Staging and Production Environments to be setup in DC- Noida for running a high-availability production server efficiently. Following environments to be setup in DC- Noida for Track and Trace application
 - **Development Environment-** This environment shall be used to configure, customize/develop and test T&T application and other functionalities.
 - **Staging Environment-** Staging or Pre-production environment is an environment for testing that exactly resembles a production environment except scale (1/4th). This environment should be close to an actual production environment and connect to other staging and pre-production services, data and databases. The department shall provide the sign off every release at this stage before actual deployment in production/live environment.
 - **Production environment-** Final application/release to be deployed on this environment for actual use for business use. The Production environment shall connect to other production services, data and databases including local servers of units via secured medium.
- o. All three units shall connect with DC through existing MPLS connectivity. The local servers installed at units shall receive information from the centralized server about quantity, barcode, production orders, etc. of the sheets which are belonging to that batch & update the information regarding the operation which is performed on it.
- p. All the relevant unit-level data are transferred to the central server on near real-time basis. The data which has been transferred to central servers can be archived / truncated from the local unit after around 30 days. The detailed policy for archival / truncation of unit-level data from local servers shall be finalized in consultation with BNP, Dewas after SI's onboarding.
- q. Below diagram depicts broad level proposed architecture. The bidder may advice better solution to meet the project objectives.

r. Indicative infrastructure requirements at DC, Noida [and DR, Hyderabad](#) is given below:

S. No	Item	Quantity/Capacity	
		Data Center, Noida	DR, Hyderabad
1.	Smart IT Rack	1	1
2.	Blade Servers and Chassis	<ul style="list-style-type: none"> Development - 01 Server Stagging – 02 Servers (Application and Database) Production – 04 Servers (Application and Database) 	Production – 02 Servers (Application and Database)
3.	SAN Storage (SSD storage) with dual controller	25 TB minimum usable	25 TB minimum usable
4.	Backup software	1	Not required
5.	Backup Solution: Tape-based backup	10 TB of raw data for which licenses (if required) has to be bought by SI. However, backup solution shall be scalable upto 25 TB.	Not required
6.	Load balancer	2	1
7.	Next Generation Firewall (NGFW) & IPS	2	1
8.	SAN Switch	2	1
9.	Router	2	1
10.	Switch	2	1
11.	Server Security (antivirus)	As per solution	As per solution
12.	OS Licenses	As per solution	As per solution
13.	DB Licenses	As per solution	As per solution

- s. In the event of DC failover or switchover, DR site will take over the active role, and all the requests will be routed through that site. Application data and application states will be replicated between data centers so that when an outage occurs, failover to the surviving data center can be accomplished within the specified RTO. Necessary DR solution for replication of data, shall be arranged by the SI to ensure business continuity.
- t. SI shall switchback the services from DR to DC, once DC gets restored using specified RPO & RTO.
- u. Considering the critical nature of the Project and 100% availability, SI to build proper mechanism for Business Continuity. Following RPO and RTO should be met by application

RPO (Minutes)	RTO (Minutes)
30	120

Note:

- All the infrastructure at DC should be in High Availability (HA) mode. The SI shall ensure that high availability of all components is built into the architecture and meets the requirements of service levels as mentioned in the RFP.
- In case, certain components which are required to meet the scope of work and SLAs but not included in this RFP, the bidder shall include such equipment in the unpriced bill of material and quote for the same in their Financial bid. It may be noted that specifications provided in this RFP are minimum requirement and SI can procure better equipment as per project requirement.
- SPMCIL is in process of upgrading the technical infrastructure at DC, Noida, DR, Hyderabad and all three units. The Tech Refresh RFP has been published on 04 April 2022 and it is available on <https://www.spmcil.com/Interface/Tenders>. The bidders are advised to refer the same. As mentioned in this section, the Track and Trace (T&T) application shall be hosted at DC, Noida and replication shall be done at DR, Hyderabad, the indicative infrastructure requirement for the same has been given in this section. The selected bidder in close consultation with SPMCIL and BNP- Dewas may leverage common Tech Refresh infrastructure to host the T&T application at DC, DR and all three units. The same shall be finalized prior to issuance of Work Order to successful bidder and cost of the same (as per the quoted line-item wise cost in financial bid of Table-3) shall be deducted/adjusted accordingly.
- ***Bidder shall design the solution for DC –DR in active passive mode (hot & cold concept).***

1.4. Supply, Installation and Commission of Track and Trace Solution (along with Infra) at units

- a. The SI shall be responsible for setup of Server Rooms at all the three units which includes supply, installation and commissioning of IT infrastructure such as Smart Racks, software, hardware, database, OS, networking, security, etc.
- b. The SI shall be responsible for supply, installation and commissioning of required machine infrastructure such as barcode printer, reader, sensors, etc. at all the three units. All the mechanical, electrical, civil & instrumentation works, and related items shall be part of the SI's scope of work.
- c. **The SI shall be responsible for establishing server rooms at all three locations which includes all the required cabling, civil, instrumentation, mechanical, electrical, Non-IT works, UPS, etc. Necessary rooms for setting-up of server rooms shall be provided by respective units in their**

premises. SI to adhere with best practices for designing and setup of Server room at each unit.

- d. The SI shall be responsible for providing HMI with Monitor, Control/Data Unit, PLC, Interfacing components, Tower Lamp with buzzer, Printer for reports printing, etc. which shall be connected to machines (wherever applicable as per project and client requirements).
- e. BNP/CNP/SPM shall provide the necessary support to SI in terms of power and basic utilities points for successful completion of work. BNP/CNP/SPM shall provide the power requirements upto 20 meters of machine in their respective units. 230 V / 50 Hz Single Phase power source will be provided.
- f. **The SI should ensure that there is no damage whatsoever in any of the existing machines due to installation of Track and Trace equipment. If such things happen the entire amount related to the damage, repair, replacement (if any), etc for the same shall be borne by the SI.**
- g. Necessary internal LAN/other cables to be laid by SI in all the three units to ensure end to end connectivity and there should not be any disruption in sending and receiving data and information from machines to servers and vice – versa.
- h. All the work shall be done in a conscientious manner as per the OEM guidelines and best industry practices. The system shall be subjected to inspection at various stages. Local regulation / codes shall be followed all the times. The SI shall follow all safety regulations and practices.
- i. Indicative Infrastructure requirements at all three units are given below:

S. No	Item	Quantity/Capacity		
		BNP, Dewas	CNP, Nashik	SPM, Narmadapuram
1.	Smart IT Racks	1	1	1
2.	Rack Server	Production – 04 Servers (Application and Database)	Production – 04 Servers (Application and Database)	Production – 04 Servers (Application and Database)
3.	SAN Storage (SSD storage) with dual controller (with 10 TB NLSAS on same storage controller for backup with necessary licenses)	10 TB minimum usable	10 TB minimum usable	10 TB minimum usable
4.	Load balancer	2	2	2
5.	Next Generation Firewall (NGFW)	2	2	2
6.	SAN Switch	2	2	2
7.	Router	2	2	2
8.	Switch	2	2	2
9.	Server Security (antivirus)	As per solution	As per solution	As per solution
10.	OS Licenses	As per solution	As per solution	As per solution
11.	DB Licenses	As per solution	As per solution	As per solution

Note:

- All the IT infrastructure at all three units should be in High Availability (HA) mode. The SI shall ensure that high availability of all components is built into the architecture and meets the requirements of service levels as mentioned in the RFP.
- In case, certain components which are required to meet the scope of work and SLAs but not included in this RFP, the bidder shall include such equipment in the un-priced bill of material and quote for the same in their Financial bid. It may be noted that specifications provided in this RFP are minimum requirement and SI can procure better equipment as per project requirement.
- **Existing make and model of PLC shall be made available to bidders on request via mail.**

1.5. IIOT based solution for monitoring key parameter

- a. SI shall be responsible for installation, deployment, and maintenance of all necessary IIoT sensors and other peripheral devices at unit level/machine level (wherever applicable). The end-to-end IIoT solution shall be provided by SI under Track and Trace project.
- b. IIoT sensors shall be installed at key points by SI at Units & Machine level (wherever applicable) to monitor key parameters such as humidity and temperature of machines critical points. The environmental sensors shall help to detect the machine's operating environment.
- c. All the data collected through various IIoT sensors shall be kept at local unit level server. Frequency of data generation shall be decided later after SI's onboarding.
- d. Energy consumption of various machines to be monitored using multi-function digital energy meters. The energy consumed by the machines when compared with the rated optimum consumption (as provided by the machine manufacturer) will indicate the energy efficiency of the machine.
- e. It is the responsibility of SI to generate various meaningful insights from the data generated from IIoT sensors to improve the overall efficiency of existing process. Analytics tools required for such reports shall be under bidder's scope.
- f. All the data generated through IIoT sensors should be stored on premises at Unit level and DC-DR level. The IIoT solution should be designed considering the same as there would not be any internet connectivity inside the factories.
- g. Following are some indicative reports to be provided by SI through IIoT -
 - Impact of parameter (temperature and humidity) in the production quality
 - Support in root cause analysis of machine breakdown
 - Energy Consumption Report machine wise / year wise (shift wise/daily /weekly /monthly / yearly)
 - Ad Hoc reports as per the user requirement to be generated by SI.
- h. Barcode/RFID related data generated from T&T system shall be stored permanently for backward traceability whereas storage and retention period for IOT/IIOT sensors related data/information shall be finalized during SRS preparation.***

1.6. MPLS connectivity

- a. The existing Network Architecture of SPMCIL is utilizing the MPLS core network for carrying the data traffic across the SPMCIL units by dual, distinct service providers on two different non-sharing networks for redundancy with a Single Hop.
- b. The Primary bandwidth has been enhanced to 20 Mbps per link capacity with Active-Passive link at the respective Unit locations. Secondary bandwidth link is 2 Mbps. However, the SI will be

required to provide the sizing and corresponding justification for the bandwidth requirements for T&T application.

1.7. Centralized Helpdesk Setup

SI shall be responsible for setting up a helpdesk, which should be operational 24 x 7 as per client's calendar. Also, SI should deploy necessary manpower to ensure completion of scope.

Helpdesk should be setup at One centralized location. The location for the helpdesk setup shall be confirmed to the bidder prior to the signing of agreement.

Tickets shall be logged and updated by the helpdesk agent via all modes including Voice calling, Email support, Web help or any other new channel launched during the course of the contract. The SI need to provide necessary ticket logging system for the entire duration of Warranty and CAMC phase. This helpdesk must be compliant to the ITIL guidelines and standards. The help desk should be setup from the Pilot launch of the project.

- ***Telecom expenses will be borne by SPMCIL.***
- ***Channels to log the tickets will be via voice call, email support and through T&T application***

Typical activities of helpdesk shall include:

- i Use the ticket logging system in line with the SLAs. Severity may be assigned to each call as per the SLAs.
- ii Track each incident / call to resolution. SI shall identify the solution and take necessary approvals and release the patch after fixing the defects.
- iii SI shall document issues / defects / bugs / etc. encountered as well as document the resolution of the same. SI shall also update the Consolidated List of Common Errors and their Resolution document.
- iv Escalate the calls to the appropriate levels, if necessary, as per the escalation matrix agreed upon by SI and BNP, Dewas.
- v Coordinate with respective OEMs for closure of calls.
- vi Analyse the incident / call statistics and provide monthly reports including but not limited to:
 - a. Type of incidents / calls logged
 - b. Incidents / calls resolved / calls open
- vii SI activities shall be monitored as per SLAs defined under the contract.

1.8. Quality Assurance and Exception Handling

The entire solution should be designed and developed considering very high-level (100%) accuracy of printing, labeling, reading and recording of barcodes and other sensors as applicable. The SI shall deploy sufficient technical manpower at all the three units for quick resolution of any issues. The following are some identified scenarios where onsite resources may be required for quick resolution of issues:

S. No	Scenario	Mitigation Plan
1.	Barcode printing / labelling not done on sheet/ream/pallet/bundle/box/etc. through by barcode printer/labeler installed at	Onsite Technical team from SI to check and resolve the issues immediately. However, Penalties shall be imposed as applicable.

	machines due to some reason	
2.	Barcodes printed/ labelled not read through scanners installed at machines due to some reason	Onsite Technical team from SI to check and resolve the issues immediately. However, Penalties shall be imposed as applicable
3.	Reconciliation of sheet/notes not done at the end of any stage (input \neq output)	In case of any mismatch, onsite team need to provide support in carrying-out verification/ reconciliation and find out the cause for the same
4.	Breakdown of infrastructure installed at units	SI should have to keep the necessary spares onsite at all the units for immediate replacement in case of any breakdown. However, Penalties shall be imposed as applicable
5.	Sheet related anomalies like double sheet, lost sheet, wrong sheet, wrong delivery pile, blue trial paper mixed to watermark banknote paper and similar conditions not detected through system / sensors	Onsite Technical team from SI to check and resolve the issues immediately. However, Penalties shall be imposed as applicable.

1.9. Manpower Deployment

- A. **Implementation Phase:** The below table indicates the minimum manpower to be designated by SI during the implementation phase of the project for regular interaction with BNP, Dewas and other project stakeholders. However, other technical resources as per the project requirement shall be assessed and deployed by SI as per the scope of work.

S. No.	Manpower Type	Education and Exp.	Roles and Responsibilities
1.	Team Leader	1. B. Tech /BE/ MCA with MBA 2. Project Management Experience of Managing/implementation of Large-Scale projects related to Track & Trace solution 3. Relevant 10 years of experience	<ul style="list-style-type: none"> End to end management of Project for all the three units and DC-DR Coordination with all Project stakeholders Single point of contact (SPOC) for Management and Administrative related issue Preparation of project documents required under this project Project Risk and Quality management Support in documenting MoMs and disseminating information to all relevant stakeholders
2.	Solution Design	1. B. Tech /BE/ MCA 2. Experience as solution design expert of large-	<ul style="list-style-type: none"> Design the entire ecosystem for Track and Trace system Design and implement solution

	Expert	scale IT projects 3. Relevant 8 years of experience	architecture and IT solution including DC, DR and all three units <ul style="list-style-type: none"> • Use of technology to achieve business outcomes • Collaborate with stakeholders to understand business goals and support delivery outcomes • Prepare technical documents required under this project • Design security of the Track and Trace Solution considering global best practices
3.	Functional/ SME/Domain Expert	1. Should have experience of working on currency/note manufacturing/printing related projects 2. Relevant 8 years of experience	<ul style="list-style-type: none"> • The person should be well versed with the Currency Manufacturing and printing process. • Coordinate with different project stockholders for understating the functional process and requirement. • Coordinate with various machines OEMs for integration, if any • Providing subject expertise and guidance to technical team during the solution design and implementation. • Determining whether technical solutions meet defined functional requirements. • Verifying functional reference information, including user guides, training manuals, and system requirements.

- B. Warranty and CAMC Phase:** SI shall have to deploy following minimum manpower onsite at all the three units and DC-DR during warranty (1 year) and CAMC phase (4 years). However, other technical resources can work from backend, but SI need to ensure that there should be proper coordination between Onsite and Backend team, so no work gets affected, whatsoever.

S. No.	Location	Manpower Type	Number of Resources	Shift	Roles and Responsibilities
1.	BNP, Dewas	Track and Trace Expert	4	16 x 7	<ul style="list-style-type: none"> • Provide dedicated onsite support to units and ensure that Track and Trace should work fine • Immediate replacement of defective and faulty equipment.
2.	CNP, Nashik	Track and Trace Expert	4	16 x 7	
3.	SPM, Narmadapur	Track and Trace Expert	6	24 x 7	

	am				<ul style="list-style-type: none"> • Troubleshoot and Resolve issues related to Track and Trace System
4.	SPMCIL DC & DR and at all three units	IT Support Executives	1 – at DC & DR 3 – one (01) at each unit.	24 x 7	<ul style="list-style-type: none"> • Monitoring, administration, management and maintenance of the entire Track and Trace Solution at Data Centre & Disaster Recovery and units infrastructure supplied under this project. • Ensure availability and proper functioning of the DC & DR and units infrastructure including but not limited to racks, network, security, compute storage & backup and other peripheral equipment installed in DC & DR and units. • Monitor the performance of the DC & DR and units components including usage, availability and analyse the future requirements, if any • Install software (OS and applications) updates and upgrades for the components supported by them in the DC & DR and units. This will include the patch upgrade or any type of upgrade for management software, operating systems, network management software, security software, anti-virus software or any other software. • Troubleshoot and Resolve IT issues related to Track and Trace System

Note:- Minimum 2 resource per shift should be maintained by SI all the time

IT Support Executive –

1 – at DC & DR

3 – one (01) at each unit

Helpdesk Executive-

3 – at centralized Location

The above are indicative manpower requirements for Warranty and CAMC Phase. The SI may be required to deploy additional resources as per the project requirement without any additional cost to BNP Dewas. No cost shall be paid during the Warranty and CAMC period for the manpower. As per the production requirement, the duration of shift sometime goes beyond 8 hours, the SI shall have to keep provision of the same to ensure uninterrupted services.

1.10. Dashboard, Report and Analytics

- The Information and data from track and trace system should be displayed via both existing SAP BI dashboard and through dedicated track and trace dashboard.
- The SI shall be responsible for creating its own Track and Trace dashboard which shall be accessible to project stakeholders on privilege/role/category basis.
- The SPMCIL DC team shall carry out necessary changes in existing SAP BI dashboard, however all the necessary support pertaining to SAP integration shall be provided by the SI (as mentioned under section 1.2)
- The Track and Trace application shall provide dynamic dashboards to all end-users. The layout and content of the dashboard would be based on the user role/ category/ type etc.
- The system should provide real-time information via dashboards to SPMCIL, BNP, CNP and SPM officials and other stakeholders.
- Below are some indicative dashboard requirements to display from T&T and SAP BI:

A. Dashboard – SPMCIL Corporate Head Office (CHO)	
1	Real-time Denomination-wise status of Sheets/Notes at different vaults (Offset, Intaglio, Numbering, finishing etc)
2	Real-Time status of Paper Manufactured in SPM and received at BNP & CNP
3	Real-Time efficiency and productivity of machines and units
4	Real-Time machines status of all three units ~ Working, Breakdown, Input & Output, etc.
5	Consolidated reports shift /batch/day/month wise pertaining to wastages (Spoiled sheet)
6	Real-Time status of Notes/Currency dispatched to RBI

B. Dashboard – Ministry of Finance Official (external stakeholder)	
1	Real-time Indent status report covering following <ul style="list-style-type: none"> Total Indent Received from RBI for a year Completed Production as on date

	<ul style="list-style-type: none"> • Dispatched to RBI as on date • Remaining Indent as on date
--	---

C.	SPM, Narmadapuram
a.	Running efficiency of a manufacturing unit with reference to productivity of machines
b.	Running efficiency of a manufacturing unit with reference to productivity of manpower
c.	Running efficiency of a Machine at a given instance of time in terms of input and output
d.	Running operating speed of Machine at a given instance of time
e.	Machine breakdown status and downtime
f.	Real-time status of paper manufacturing
g.	Real-time Machine-wise status of paper manufacturing
h.	Real-time Denomination-wise, Storage-location-wise status of paper manufacturing
i.	Quantity of input paper / sheets provided to a machine and output sheets manufactured, spoiled or marked as suspected – (Batch-wise, machine-wise, shift-wise, day-wise, etc.)
j.	Real-time capturing of environmental parameters like Humidity, Temperature, Energy efficiency of machines, etc. and generating alerts in case of variations beyond acceptable range. (Batch-wise, machine-wise, shift-wise, day-wise, etc.)
k.	Machine Speed – (Batch-wise, machine-wise, shift-wise, day-wise, etc.)
l.	Once the processing of a batch gets completed the system should generate a printable report containing detailed information about each printed batch: ID, date, quantity of good and defective sheets, reconciliations, operators, machine speed, packing and dispatch details (wherever applicable), etc.
m.	Material usage and consumption at the end of each process/batch/shift, etc. to be provided through report
n.	End to End traceability report by entering key details such as sheet number, note number, bundle number, batch number, etc.
o.	The system should provide a report of the balance (items moved in and out in a specific timeframe) of the relevant packing area.

D.	BNP, Dewas and CNP, Nashik
a.	Running efficiency of the printing press with reference to productivity of machines
b.	Running efficiency of the printing press with reference to productivity of manpower
c.	Running efficiency of a Machine at a given instance of time in terms of input and output
d.	Real-time Vault-wise, Denomination-wise status of blank/printed sheets, notes, bundles, boxes, etc.
e.	Real-time Unit-wise status of currency notes printing
f.	Real-time Machine-wise status of currency notes printing
g.	Real-time Denomination-wise status of currency notes printing
h.	Number of input sheets provided to a machine and output sheets/notes printed, spoiled or marked as suspected. (Batch-wise, machine-wise, shift-wise, day-wise, etc.)
i.	Real-time capturing of environmental parameters like Humidity, Temperature, Energy efficiency of machines, etc. and generating alerts in case of variations beyond acceptable range. (Batch-wise, machine-wise, shift-wise, day-wise, etc.)

j.	Machine Speed – (Batch-wise, machine-wise, shift-wise, day-wise, etc.)
k.	OVI / CSI ink consumption - (Batch-wise, machine-wise, shift-wise, day-wise, etc.)
l.	Once the processing of a batch gets completed the system should generate a printable report containing detailed information about each printed batch: ID, date, quantity of good and defective sheets, reconciliations, operators, machine speed, packing and dispatch details (wherever applicable), etc.
m.	Material usage and consumption at the end of each process/batch/shift, etc. to be provided through report
n.	End to End traceability report by entering key details such as sheet number, note number, bundle number, batch number, etc.
o.	The system should provide a report of the balance (items moved in and out in a specific timeframe) of the relevant packing area.

Note-

- The above are indicative reports, the SI may have to generate other ad-hoc reports as per the requirement of client and project without any additional cost to BNP, Dewas. Application shall provide ad-hoc query and analysis capability so that business users could create new analyses from scratch or modify existing analyses.
- Tools and utilities shall be provided to facilitate exporting reports in various formats such as MS Word, MS Excel, Adobe Acrobat etc.
- System shall allow user to generate MIS reports/previous trends/graphics etc. as per the business process requirements. They shall be customizable as per user requirements.
- Analytics tool required to perform the data analytics and generate meaningful insight for T&T dashboard shall be under SI's scope.
- Basic software like MS Word, MS Excel, Adobe Acrobat etc for departmental user will be arranged by department However, specific tools /licenses used for the analytics will be provided by SI as per the scope of work of RFP.

1.11. Training and Capacity Building

Based on the roles and responsibilities of BNP-Dewas, CNP-Nashik and SPM-Narmadapuram employees, a role-based training approach shall be imparted by SI.

Capacity Building will include the following:

- Imparting training as per the Training Need Analysis (TNA).
- Trainings will be imparted to all levels of BNP-Dewas, CNP-Nashik and SPM-Narmadapuram employees.
- Prepare and organize training programs to facilitate the efficient usage of new system.
- Training shall encompass the knowledge of basic functionality of solution and other back-end processes.
- Training shall also be provided for basic troubleshooting activities in case of problems.
- User Manuals, presentations and videos to be developed to promote self-learning and assist training participants in undergoing the training.
- There would be mechanisms to capture feedback of training programs conducted to gauge the effectiveness of instruction and make improvements if required.
- Refresher trainings to be provided by onsite team on quarterly basis.
- Simulations and Nano videos shall be prepared by SI for training purpose.***

Training Need Analysis (TNA)

Based on the organizational hierarchy and the envisaged roles and responsibilities, departmental officials have been categorized into four bands - A, B, C & D.

Levels	Description
Band A – Strategic Group	Senior Management
Band B	Middle Management
Band C	System Administrator & other officers of IT Cell of SPMCIL, BNP-Dewas, CNP-Nashik and SPM-Narmadapuram
Band D	Production line users of the track and trace application

The following table indicates the sample training modules:

Sl #	Module description	Number of Personnel to be trained	Duration
1.	High-Level Track & Trace Application software related training with main focus on reporting and dashboard (Band A and B)	20 persons/ batch	2 days / batch
2.	System Administration and support training (Band C)	20 persons/ batch	4 days / batch
3.	Detailed training on the Track & Trace application software (Band D)	20 persons/ batch	4 days / batch

Training Material and manuals

Most of the training would be an Instructor-Led Training (ILT) conducted by trained and qualified instructors. To maintain consistency, standard templates should be used for each component of a module. The scope of developing and designing the Training Manuals, User Manuals, Operational and Maintenance Manuals shall lie with the SI. The following mode of delivery may be considered for imparting effective training to the officials:

- Course Presentation (PowerPoint)
- Instruction Demonstrations (Application training environment)
- Hands-on Exercises (Application training environment)

1.12. Documentation

The SI shall provide atleast following documents as per client and project requirement. All the below documents should be submitted prior to start of pilot rollout of project -

- Installation manuals for all the equipment to be installed under this project.
- User manuals and system manual covering detailed information required for the administration of entire track and Trace system.
- SI shall also maintain Standard Operating Procedure (SOP) as per the requirement of project.
- All reference and user manuals for system components, including those components supplied by third parties.

- e. Software documentation which also includes the version number of all software, including that supplied by third parties.
- f. Training Manuals, Configuration Procedures (SCPs) and Emergency Operating Procedures (EOPs).
- g. Comprehensive Exit Management Plan
- h. All necessary reports for SLA compliance as per format defined by BNP, Dewas/Third Part Auditor (TPA).
- i. Software cum API documentation which also includes the version number of all software, including that supplied by third parties.

1.13. Certification

- a. SI shall be responsible for implementation of ISO 27001:2018 or latest including drafting policy, procedures documents, implementation of those policies, procedures conducting internal & external Audits, closure of findings, and securing the certification successfully.
- b. The SI shall be responsible for ISO 27001:2018 compliance of only Track and Trace related application and infrastructure at DC, DR and all three units (SPM, BNP and CNP).
- c. SI shall have to obtain, manage and continue the certificates and these certifications should be completed immediately within 1 month after the FAT and Go-live. The cost of certification shall be borne by the SI.

1.14. Integration of New Pulp Plant and Paper Machine with SAP through SCADA

- a. New Pulp Plant and Paper Machine at SPM, Narmadapuram are required to be integrated with SAP through SCADA. Though these machines shall not be part of Track and Trace system, however, data from the same need to be integrated with SAP directly.
- b. Details regarding the raw material, utilities, semi-finished and finished products are as below:

S.No	Plant	Raw materials used	Utilities	Finished & Semi-finished	Total
1.	New Pulp Plant	8	5	2	15
2.	Paper Machine	25	15	20	60
3.	Rewinder	3	4	6	13
Total					88

- c. Below are approximate parameters required to be integrated with SAP:

Process Tags	125
Maintenance Tags	90
Total	215 Tags (approx.)

- d. **This requirement of integrating New Pulp Plant and Paper Machine with SAP through SCADA can be taken up by SI separately in Phase-2 of this project after completion of T&T system FAT.**
- e. The requirements mentioned in this section are indicative. Bidders are advised to carry out the detailed assessment (including field visit at SPM, Narmadapuram) pertaining to the integration of above-mentioned machines with SAP, prior to submission of the bid.

1.15. User Acceptance Testing (UAT)

- a. SI shall maintain a traceability matrix, to confirm that all the business and functional requirements as stated in the SRS and in this RFP are met by the solution.
- b. UAT to be conducted once the Functional, Unit, Integration, System, Security, etc. testing of entire system shall be successfully conducted by SI internally.
- c. SI shall be responsible for:
 - i. ***Setting up of server room in BNP, Dewas and SPM Narmadapuram including all necessary IT infrastructure (Hardware and Software) for UAT, Pilot and training purpose. Also, SI to ensure installation of other infrastructure such as Sensors, Scanner, Barcode reader/writer, IOT devices, etc.) at one complete production line at both SPM, Narmadapuram and BNP, Dewas.***
UAT, Pilot and Trainings shall be carried out through IT environment setup in BNP, Dewas and SPM, Narmadapuram
 - ii. Sharing of user manual, admin manual, test cases, test plan and QA Results for User Acceptance testing with the BNP, Dewas.
 - iii. Cabling and LAN setup as per the requirement inside the unit
 - iv. Installation and commissioning of IIoT sensors to measure parameters like humidity, temperature and energy efficiency of machines.
 - v. Testing the T&T Systems under field conditions and as per functional specifications.
 - vi. Provide training to the customer for Acceptance Testing.
 - vii. Logging of acceptance defects in Defect tracking tool.
 - viii. Fixing of the defects reported by the customer.
 - viii. Necessary integration with SAP ERP system for bidirectional flow of information and data, which shall be required for UAT.
- d. The primary goal of User Acceptance Testing (UAT) is to ensure that the applications meet the requirements, standards, and specifications as set out in this RFP and as needed to achieve the desired outcomes.
- e. ***Before UAT, the SI shall carry out comprehensive internal security testing and performance testing of the entire application.***
- f. The SI shall be responsible to ensure that the solution is completely operational as per the requirements in this RFP and all the acceptance tests are successfully concluded as per the satisfaction of BNP, Dewas and other stakeholders.
- g. The BNP, Dewas will have the right to get the solution verified/certified by its nominated agency during the UAT phase. The primary goal of validation is to ensure that the Project (including all the project components as discussed in the scope of work) meets requirements, specifications and performance.

Note- BNP, Dewas in consultation with other project stakeholders to select the one complete production line for UAT purpose, the same shall be communicated to SI after onboarding.

1.16. Third Party and Security Audits

- a. SI shall carry out Vulnerability assessment (VA) and Penetration Testing (PT) using certified tool and submit VAPT report prior to start of UAT.
- b. The SI shall be responsible for getting the complete internal security audit done prior to the Pilot through their own tools.

- c. BNP, Dewas may appoint an external agency/ Third-party (CERT-IN empaneled agency) to conduct independent security assessments of developed/customized application and SI shall extend all the necessary support.
- d. SI shall support all source code fixes / patching activities, if recommended during audit.
- e. SI shall conduct regular security audits for T&T application using their own tools for proactively identifying and fixing any security vulnerabilities.
- f. Additionally, BNP, Dewas may later choose to get the Track and Trace solution / system undergo any kind of STQC / third party audit of Application and Infrastructure both (as per applicability) and at any point of time during the SI's tenure, to which SI will assist and fix defects without any additional cost to BNP, Dewas. The testing may include:
 - Functional Testing
 - Accessibility Testing
 - Performance Testing
 - Penetration Testing
 - Vulnerability Testing
 - Database Server Controls
 - Infrastructure Audit at respective locations
 - Any other as per IT industry standards

1.17. Pilot Roll Out

Project shall be rolled out in one production line at both SPM, Narmadapuram and BNP, Dewas, which has been used for UAT purpose. Pilot test shall be conducted for 1 shift of 8 hours for 30 days. SI shall be responsible to take all the necessary measures to ensure successful execution of pilot in one line.

The below conditions are indicative and shall be finalized during the project inception stage after requisite approvals from BNP, Dewas.

- A. Entry Conditions of Pilot
 - a. UAT sign-off by BNP, Dewas
 - b. Installation of all necessary IT infrastructure at DC- Noida, SPM-Narmadapuram and BNP-Dewas as per the requirement of pilot rollout
 - c. Installation of all the equipment and sensors at one complete production line where Pilot to be conducted.
 - d. Cabling and LAN setup as per the requirement inside the unit
 - e. Installation and commissioning of IIoT sensors to measure parameters like humidity, temperature and energy efficiency of machines.
 - f. Successful completion of the trainings with regards to T&T application.
- B. Exit Conditions of Pilot
 - a. Generation of Barcode from the software
 - b. Printing of Bar code on Sheets, Reams, Pallets, Bundles, Boxes, etc. as per maximum machine speed
 - c. Scan the Barcode through devices as per maximum machine speed
 - d. Detection of sheet anomalies through sensors
 - e. Establishing the Parent – Child relationship wherever applicable

- f. Successful acquisition and demonstration of IoT related parameters.
- g. Successful integration with SAP ERP system for bidirectional flow of information and data
- h. Successful display of reports and other key parameter to Project stakeholder on T&T and SAP dashboard, wherever applicable
- i. All the functionalities of T&T system mentioned under this RFP/tender document should be successfully executed by the system
- j. Compliance of the SLAs as mandated in this RFP.
- k. In case of non-compliance of SLAs, the SI shall be allowed extension 7 days to rectify the non-compliance and meet the set SLA standards. The SI will not be paid for the extension period of Pilot phase.
- l. The problems reported by the SPMCIL, BNP, CNP and SPM teams during the pilot run should be recorded as a defect and resolved.

Note: Based on the success of the above parameters, the go-ahead would be provided to the SI for complete project roll out.

1.18. Final Acceptance Testing (FAT)

- a. FAT shall be conducted after the entire system has been installed, integrated and commissioned in the DC & DR and all the units. FAT shall be conducted on full system completion only, to determine if the system functional and technical requirements as specified are met with peak load.
- b. Construction of Server rooms including necessary cabling, civil, instrumentation, mechanical, electrical, Non-IT works, etc. at all three units shall be completed before FAT.
- c. The Final Acceptance Test plan shall be submitted by SI to BNP, Dewas for approval. FAT shall be carried out jointly by SI and BNP, Dewas and other project stakeholders.
- d. On successful completion of FAT, certificate for the same shall be issued by BNP to the SI. The date on which FAT certificate is issued shall be deemed to be the date of successful commissioning of the Track and Trace system and thereafter the Warranty and CAMC will start by SI. Responsibility of SI in FAT shall include below but not limited to-
 - OEM certification of all the components installed.
 - All equipment's must be installed at project sites as per the specification and project requirement
 - Availability of all the defined services shall be verified.
 - SI will arrange the test equipment required for performance verification, if required
 - SI shall be responsible for the security audit by a certified third-party Cert-In empaneled agency during FAT.
 - Successful DR drill.

Note- Security audit from Cert-In empaneled agency shall be carried out prior to deployment of application by SI in DC-Noida and cost for the security audit shall be borne by BNP, Dewas. SI shall have to provide all the necessary support to third party in security audit and should ensure timely closure of all bugs/issues (if any found by third party)

1.19. Warranty & Comprehensive Annual Maintenance contract

- a. Complete system and all of its components will be under warranty for 12 months from date of issue of final acceptance certificate from BNP, Certificate and system Go-Live, warranty includes all Hardware, Software, Barcode Printer & Scanner Equipment, Sensors, Manpower, Consumables such as Barcode, RFID, etc. and all other components to be supplied under the project.
- b. The system shall be under Comprehensive Annual Maintenance Contract (CAMC) for a period of 4 years from the date of expiry of warranty. The CAMC is comprehensive and inclusive of all Hardware, Software, Barcode Printer & Scanner Equipment, Sensors, Manpower, Consumables such as Barcode, RFID, etc. and all other components supplied under the project.
- c. The quantity mentioned below for Sheets, Reams, Bundles, Batches, Boxes shall help the bidder to estimate the number of Barcode/QR/RFID shall be required as per their solution. The quantity mentioned is of annual basis and bidder shall need to plan the consumables accordingly for entire project duration. The requirement may increase or decrease as per the actual indent from RBI. Hence, cost of Consumables to be paid on pro-rata basis to SI. The SI shall be responsible to produce evidence of Barcode /QR/ RFID generated through automatic system generated reports.

#	Description	Tentative Quantity
1	Barcode Printing on Sheets	200,000,000
2	Barcode Printing on Reams	240,000
3	Barcode Printing on Bundles	10,000,000
4	Barcode Printing on Batches	2,000,000
	Total Barcode Printing	212,240,000
	Total RFID on Boxes	116,000
	Total RFID on Jumbo/Child Roll	16400

Note-

- i) **Cost of consumables will be paid to bidder Jumbo roll wise, sheet wise, ream wise, bundles wise, boxes wise and Batch wise irrespective of number of the Barcode/QR/RFID printed on the same.**
- ii) **Cost of consumables will be paid in pro-rata basis Warranty period (after Go Live), no cost will be paid to bidder prior to same.**
- iii) **In case of any new sensor/barcode printer & reader required for installation on the new machine, cost for the same shall be borne by the respective unit as per the CAPEX rates mentioned for similar kind of a machine in price bid.**
- iv) **Payment for consumables will be paid during warranty and CAMS period.**
- v) **Remote Technical Support for Issue resolution: For some major technical issues, SI may take the remote access. The IP whitelisting and all the necessary security mechanism should be built by SI in consultation with BNP, Dewas and DC-Noida team. This should be governed as per IT policy of SPMCIL**
- d. During Warranty and CAMC Period, Bidder shall maintain the system so that it is operational and running round the clock.
- e. The SI shall provide Guarantee that every work executed under this project shall be free from all defects and faults in materials, workmanship etc. and shall be of the highest grade and consistent with established and accepted standards for materials and workmanship of the type

ordered and full conformity with the specifications and equipment shall satisfy its intended use.

- f. Workmanship and operation of all the equipment, accessories etc. supplied by the SI shall be under warranty for a period of minimum 12 months from the date of taking over the system / issue of acceptance certificate of the system by the BNP- Dewas. SI shall also provide the total maintenance of the equipment / systems during warranty & CAMC period at all the location mentioned in this tender document.
- g. It shall be obligatory on the part of SI to modify and/or replace any hardware and modify the operating, application and diagnostics software free of cost, in case of any malfunction is revealed during operation after taking over within the warranty period. Also, the SI must do corrections and up gradation of the software during warranty & CAMC Period.
- h. During warranty & CAMC period, the SI has to deploy Engineers (Track and Trace Expert and IT Support executive) as per clause 1.9 in SPM, BNP, CNP and DC-DR from the date of final acceptance of system for smooth operation/maintenance/use of the system by various users and also for customizing configuration by way of proper selection existing software/hardware features of the SYSTEM. The engineer shall be required to check the health of the system on daily basis and do maintenance work of the System. The engineer has to work on shift basis.
- i. SI shall periodically carry out Routine Preventive maintenance (Preventive Maintenance after every 3 months) during the entire warranty & CAMC period starting from date of final acceptance. The service engineer(s) so deputed shall be qualified and fully conversant with the Warranty and CAMC aspect of the system and sub-systems of other vendors (e.g., IT Infrastructure, Barcode Printer & Reader, Sensors, etc.) supplied against this tender/purchase order. Report of periodic maintenance is to be submitted with BNP and other stakeholders
- j. The wages / salary of the Engineer shall be included in the cost of the project and no separate cost to be paid by BNP, Dewas for the same
- k. Supplier shall have all the statutory and legal requirements for engaging manpower. BNP reserves right to verify the same.
- l. Supplier shall maintain vital spares at all the three and DC-DR to restore the system immediately in case of breakdown during warranty & CAMC period. During warranty & CAMC period, all defective / faulty items shall have to be replaced / rectified by the supplier without any additional cost.
- m. During warranty & CAMC period, defective HDD shall have to be changed with working one on non-replacement basis. The defective HDDs shall be kept with SPM/BNP/CNP.
- n. The Bidder (in case of non-OEM) shall maintain back-to-back agreement with the respective OEMs for proper maintenance of the entire infrastructure supplied under this project. The agreement shall remain valid during the warranty Period and CAMC period. Copy of Such Agreement to be provided to BNP
- o. As SPM, BNP and CNP have shift operation, the resident engineers may have to perform shift duty. These engineers are also liable to work on holiday/Sunday (if services are required) and no additional amount will be paid.
- p. The engineers should be qualified Degree/Diploma Engineer with an experience of not less than 2 (two) years in Computer/Electronics Hardware, Software & computer network maintenance. The Firm is required to provide evidence in dealing/maintenance in respect of qualification and experience, which would be checked by this Office to verify the suitability/competency of the service engineer.

- q. The resident service Engineers provided by the firm shall not be changed frequently. However, if found incompetent by the officers of BNP/CNP/SPM, the Resident Service Engineer/s shall be changed by the vendor immediately.
- r. Educational Qualification for resident service engineer - Minimum ITI/Three Year Diploma (CSE, ECE, IT) or higher qualification such as B.Tech/B.E (CSE,ECE,IT)/BCA/ MCA/M.SC (IT,ECE, Computers)
- s. The bidder will be responsible for following all labor laws and safety procedures in respect of manpower deployed by them for the purpose of this project.
- t. Bidder will have to provide necessary tool kits to its deployed resources to perform their duties effectively.
- u. The deputed staff shall be considered under SKILLED category and all central govt. rates and rules shall be applicable. The deputed staff daily wages shall not be less than minimum wages of skilled category of central govt. during the period of contract.
- v. Central Govt. labor laws shall be applicable for the contract.
- w. The SI shall be responsible for compliance of all statutory provisions relating to Minimum Wages, Provident Fund, ESIC, Bonus etc. in respect of the persons deployed under this project
- x. The remuneration of the deployed staff must be credited to their bank account by the successful agency/bidder latest by 10th of every month. A penalty of Rs. 200/- per day and per person shall be imposed on the agency for failure to meet this deadline.
- y. The personnel deputed by SI should be polite, cordial, positive and efficient while handling the assigned work. In case, the person employed by the successful agency/bidder commit any omission/commission that amounts to misconduct /indiscipline /incompetence, the successful agency will be liable to take disciplinary action against such persons including their removal from the work, if required
- z. If any misshapen during the contract period / contract delivery the successful bidder shall be held responsible. They shall not claim any amount from SPM/BNP/CNP/SPMCIL
- aa. SI shall undertake monitoring, administration, management and maintenance of the entire Track and Trace Solution for all the three units, Data Centre and Disaster Recovery for the infrastructure supplied, installed and commissioned under the project
- bb. Ensure availability and proper functioning of the Units, DC & DR infrastructure including but not limited to racks, network, security, compute storage & backup and other peripheral equipment installed in DC & DR and Units.
- cc. The SI shall monitor the performance of the Units, DC & DR components including usage, availability and analyze the future requirements, if any. In case the requirement exceeds the scalability requirements mentioned, the SI has to upgrade the current infrastructure in order to meet the increase in demand.
- dd. Proactive and reactive maintenance, repair and replacement of defective components shall be SI's responsibility. The cost for repair and replacement shall be borne by the SI. The SI shall maintain a log of all such diagnosis and notify BNP, Dewas on a monthly basis in the form of a report.
- ee. The SI shall install software (OS and applications) updates and upgrades for the components supported by them in the Units, DC & DR. This will include the patch upgrade or any type of upgrade for management software, operating systems, network management software, security software, anti-virus software or any other software.

ff. Incidents of failure of any service/equipment must be recorded and reported to BNP, Dewas immediately. Report with Root Cause Analysis (RCA) post resolving the must be submitted immediately.

ff.gg. Defective Media Retention (DMR): If any hard disk fails, SI shall have to provide replacement hard disk on Free of Charge (FOC) basis. Being a security organization hard disk shall not be returned to the bidder and SPMCIL shall retain the defective hard disk in its custody.

gg.hh. In case of replacement of old condemned machines with new machines, the retro fitting of equipment/sensors from old machines to new machines shall be carried out by the SI as per the requirements without any additional cost

hh.ii. Monitoring and Management Services:

The broad scope of monitoring and management services shall include the following:

- Server Monitoring, Administration & Management Services
- Database Administration & Management Services
- Storage Administration & Management Services
- Backup, Restore & Archival Services
- Access Management and related activities such as creating, updating, deleting users
- Network and Security Administration Services
- Help Desk Services
- For all the components SI shall document known risks if any and mitigation steps. If any security, unauthorized access identified, same shall be reported immediately. Logbook of all such acts shall be maintained and presented for audit purpose. Quarterly reports be submitted to the BNP-Dewas.
- Monitoring & management of storage activities in relation to DC~DR storage-based replication as per given Recovery Time Objective and Recovery Point Objective.

ii.jj. Security Administration Services:

- Provide a well-designed access management system, security of data/information, network security, backup and recovery etc.
- Maintenance and management of security devices, including, but not limited to maintaining firewall services to restrict network protocols and traffic, detecting intrusions or unauthorized access to networks, systems, services, applications or data, protecting firewalls, servers, from viruses/malwares/ransomwares etc.

jj.kk. Backup Services (Applicable for DC)

- Take regular online & offline back up of data as per agreed backup policy with DC, Noida and BNP, Dewas.
- Monitoring and enhancing the performance of scheduled backups, schedule regular testing of backups and ensuring adherence to policies of DC, Noida and BNP, Dewas.
- Prompt execution of on-demand backups of volumes and files whenever required or in case of upgrades and configuration changes to the system.
- Real-time monitoring, log maintenance and reporting of backup status on a regular basis.

1.20. Change Management Approach

The Change Management approach mentioned below is an indicative approach to effectively manage the changes (if any) in the project. SI shall ensure that all proposed changes are defined,

reviewed, and agreed upon, so the same can be properly implemented and communicated to all stakeholders.

- a. As per the need of the project, SI to identify the change and prepare the detailed analysis on the impact of the change to risk, cost, schedule, and scope
- b. SI shall submit a change request document to the BNP, Dewas and Log change in the change request register
- c. The SI shall keep a log of all submitted change requests throughout the project's lifecycle.
- d. BNP, Dewas and other Project stakeholders shall discuss the proposed change and take necessary decision as per the requirement of the project.
- e. If a change is approved, the SI will update and re-baseline project documentation as necessary and implement the change accordingly.

1.21. Knowledge Transfer (Exit Management)

- a. **Exit Management Plan:** SI shall submit a comprehensive Exit Management Plan within three months prior to the expiry this Agreement or 15 days from the receipt of notice of termination. The Exit Management Plan shall deal with at least the following aspects of exit management:
 - i. A detailed plan of the transfer process that could be used in conjunction with the replacement SI including details of the means to be used to ensure continuing provision of the services throughout the transfer process or until the cessation of the services and of the management structure to be used during the transfer.
 - ii. Plans for the communication with the SI, staff, suppliers, customers and any related third party as necessary to avoid any material detrimental impact on Track and Trace project's operations as a result of undertaking the transfer.
 - iii. Plans for provision of contingent support to Track and Trace Project and replacement SI for a reasonable period (minimum one month) after transfer.
 - iv. SI shall re-draft the Exit Management Plan annually thereafter to ensure that it is kept relevant and up to date.
 - v. The Exit Management Plan presented by the SI shall be approved by BNP, Dewas or its nominated agencies.
 - vi. In the event of termination, each Party shall comply with the Exit Management Plan.
 - vii. During the exit management period, the SI shall use its best efforts to deliver the services.
- b. **Transfer of Assets:** The SI will ensure transfer of all Assets under this project such as Software, Licenses, Source Code, Hardware, etc to BNP, Dewas as per the timelines agreed under Exit Management Plan.
- c. **Information and Data:** The SI will promptly on the commencement of the exit management period, supply to the BNP, Dewas or its nominated agencies the following:
 - Information relating to the current services rendered and performance data relating to the performance of the services; documentation relating to project, Project's Intellectual

- Property Rights; any other data and confidential information related to project; all current and updated components and documents
 - Project data as is reasonably required for purposes of the Project or for transitioning of the services to replacement SI in a readily available format.
 - At any time during the exit management period, the SI shall be obliged to provide access of information to BNP, Dewas and / or any Replacing System Integrator in order to make an inventory of the Assets (including hardware / Software / Active / Passive), layouts, diagrams, schematics, documentations, manuals, catalogs, archive data, IP addressing, Live data, policy documents or any other material related to the Project.
 - All other information (including but not limited to documents, records and agreements) relating to the services reasonably necessary to enable the BNP, Dewas and its nominated agencies, or its Replacing SI to carry out due diligence in order to transition the provision of the Services to BNP, Dewas or its nominated agencies, or its Replacing System Integrator (as the case may be).
- d. After successful transition and Exit Sign-off by BNP, Dewas, SI should not retain any project related documents and data. A written legal confirmation regarding the same shall be submitted by SI.

2. Escrow Agreement

- a. SI shall comply with the escrow provisions below for all Bespoke Development & customized codes (including subcontractor-owned materials and other Third-Party Material incorporated in SI's Proprietary Material).
- b. Within ninety (90) days after BNP, Dewas's acceptance of the Solution, the Parties shall enter into a software escrow agreement ("Escrow Agreement") with a reputable, independent, third party that provides software escrow services among its principal business offerings ("Escrow Agent"). The Escrow Agreement shall provide for the regular deposit into escrow of all source code (including without limitation all make files, configurational files, data tables upon which execution is dependent, and the like, collectively the "Source Code"), object code, and documentation with respect to all Public Material and Implementation Agency's Proprietary Material (and cumulative updates thereof), together with (a) continually updated instructions as to the compilation, installation, configuration, deployment, and use of the Source Code, and (b) a list of all non-deposited third party software used in conjunction with the Source Code to provide the full functionality of the deposited materials. In the event of the termination or expiration of the initial Escrow Agreement or any successor agreement, with minimal delay the Parties shall enter into a substantially equivalent agreement with a successor provider of software escrow services (who shall then be known as the "Escrow Agent").
- c. SI will make its initial deposit of Source Code within fifteen (15) days after the effective date of the Escrow Agreement.
- d. SI shall periodically update the escrow deposit as the Parties shall agree in the Escrow Agreement. In addition to other usual and customary terms, the Escrow Agreement shall provide that BNP, Dewas shall be entitled to obtain the deposited materials from escrow upon the BNP, Dewas's making a claim for release from escrow in the event that (c) proper written notice is given to the Escrow Agent that release of the copy of the deposited materials is pursuant to bankruptcy, insolvency, reorganization, or liquidation statute; (d) SI files articles of

dissolution (but not if SI is consolidated or merged into another entity); (e) the Contract expires or terminates for Material Breach of SI.

- e. The release of deposited materials from escrow shall not confer upon BNP, Dewas any right of ownership in the deposited materials or the underlying intellectual property embodied therein. In the event of the release of deposited materials to BNP, Dewas from escrow, BNP, Dewas shall use the deposited materials solely for the benefit of BNP, Dewas and its constituents.
- f. The release of materials from escrow, without more, shall not cause any further amounts to accrue as payable to SI by BNP, Dewas, and the term of the BNP, Dewas's possessory and usage rights with respect to the released materials shall be perpetual.
- g. The Escrow Agreement shall provide for its automatic termination upon the earlier of five (5) years after the expiration or termination of this Contract, or release of all Source Code to BNP, Dewas and the BNP, Dewas's subsequent confirmation of compliance with the terms of the Escrow Agreement. SI shall pay the escrow costs, as well as all costs associated with causing its subcontractors and other third parties to abide by the Escrow Agreement.

3. Service Level Agreement (SLA)

3.1 General SLA conditions

- a. Service Level Agreement (SLA) will form part of the contract between the Purchaser (BNP, Dewas) and the System Integrator. SLA defines the terms of responsibility in ensuring the timely delivery and compliance to the Performance Indicators as detailed in this RFP document. The SLAs shall be applicable from the effective date of agreement between BNP, Dewas and SI. The SI must comply with service levels requirements to ensure adherence to timelines, quality and availability of services to the Purchaser and other stakeholders as mandated in the RFP.
- b. The purpose of this Service Level Agreement (hereinafter referred to as SLA) is to clearly define the levels of service that shall be expected from the SI to BNP, Dewas for the duration of this Contract.
- c. The SLA monitoring shall be performed/reviewed on Quartey basis and related penalties / payments will be calculated on Quarterly basis by the BNP, Dewas.
- d. The payment to the SI shall be on Quarterly basis for CAMC phase and based on implementation timelines specified in Payment and Timeline section. The penalty shall be calculated as per the SLAs stated in the RFP.
- e. **The SI shall be responsible for providing all the necessary tools for monitoring of SLAs without any additional cost. Such tools shall be capable of monitoring the availability and performance as prescribed in service levels & scope and shall facilitate BNP, Dewas to evaluate its adherence to the SLAs defined in this section. The tool should have provision for auto calculation of applicable penalties as mentioned below. Access of all such tools shall be provided to BNP officials / TPA / any other stakeholder.**
- f. The centralized helpdesk to log all the tickets and same shall be used for SLA monitoring and penalty calculation. The ticket logging and resolution time shall be verified by the end-user.
- g. The SI shall be required to submit an SLA monitoring report to BNP, Dewas for each quarter.
- h. At the time of submission of any invoice by the SI to BNP- Dewas, the invoice should be accompanied with the SLA Monitoring Report.
- i. In case, SLA breach happen due to the dependency on the external factors (beyond the control of SI), the penalties would not be applicable on SI provided that, SI shall notify any such

dependencies in writing to BNP, Dewas. Any occurrence of such incidents shall be recorded electronically and reported to BNP, Dewas timely.

3.2 Definition

For the purpose of the SLA, definitions and terms as specified in the document along with the following terms shall have the meanings set forth below:

- i. "Total Time" – Total number of hours in consideration for evaluation of SLA performance.
- ii. "Downtime" – Time period for which the specified services/ components/ system/ equipment become unavailable (due to any reason whatsoever) for business processing to the end user in the concerned period, being considered for evaluation of SLA, which shall exclude downtime owing to Force Majeure and reasons beyond control of the SI.

Note: Any downtime for maintenance shall be with prior written intimation & confirmation of BNP, Dewas.

- iii. "Scheduled Maintenance Time" – Time period for which the specified services/components/system with specified technical and service standards are not available due to scheduled maintenance activity. The SI shall take at least 03 days prior approval from the BNP, Dewas for any such activity. The scheduled maintenance shall be carried out during non-peak hours.
- iv. "Uptime" – Time period for which the specified services are available in the period being considered for evaluation of SLA.
$$\text{Uptime (\%)} = [1 - \{(\text{Total Downtime} - \text{Scheduled Maintenance Time}) / (\text{Total Time} - \text{Scheduled Maintenance Time})\}] * 100.$$
- v. Penalties shall be applied for each criterion individually and then added together for the total penalty for any particular payment.
- vi. "Incident" – Any event/abnormalities in the service/system being provided that may lead to disruption in regular/normal operations and services to the end user.

3.3 Service Levels Agreement

The below SLAs shall be applicable for the entire duration of the project-

#	Service Level Objective	Definition	Target	Penalty as indicated below (per occurrence)
Part A: Solution Design, Implementation & Roll out				
1	Timely completion of Project Activities as mentioned under section "Payment and Timelines"	Any delay which impacts the project timeline	100% adherence to timeline mentioned under section "Payment and Timelines" of the RFP	<ol style="list-style-type: none"> a. Up to 15 days: 0.05% of capex cost b. >15 days but <= 30 days: 0.1% of capex cost c. >30 days but <= 45 days: 0.25% of capex cost d. >45 Days: 0.5% of capex cost for every week of delay thereof. <p>Note: In case any delay goes beyond 60 days, BNP, Dewas reserves the right for termination of contract and</p>

#	Service Level Objective	Definition	Target	Penalty as indicated below (per occurrence)
				forfeiture of performance bank guarantee.
Part B: Warranty and CAMC				
Solution Availability				
2	Availability of the Track and Trace system at all the three units, DC and DR	Availability means, the aggregate number of hours in a calendar month during which the application is actually available for use to end-user	Application Uptimes should be 100%	a. <100% to >= 99.99%: 1% of Quarterly Payment (QP) b. <99.99% to >= 99.985%: 2% of QP c. <99.985% to >= 99.98%: 3% of QP d. <99.98%: 4% of the QP for every 0.05% of unavailability thereof. Note: In case the uptime is less than 99.50%, BNP, Dewas reserves the right for termination of contract and forfeiture of performance bank guarantee.
3	Availability of infrastructure such as barcode reader, scanner, etc. at units Note: Non-working of each barcode labeler, scanner, sensor should be treated as an incident and penalty shall be computed accordingly on quarterly basis.	Availability means, the number of hours in a calendar month during which the infrastructure is actually available for use; and performing as per its intended use	Availability should be 100%	In case of unavailability, the penalty should be calculated per device as below: a. 0 to <=1 hour: Rs. 10,000/- per device b. >1 hour to <=2 hours: Rs. 15,000/- per device c. >2 hour to <=3 hours: Rs. 15,000/- per device d. more than 3 hours: Rs. 25,000/- per device per hour and part thereof. Note: In case the unavailability of device more than 5 hours, BNP, Dewas reserves the right for termination of contract and forfeiture of performance bank guarantee.
System Accuracy				

#	Service Level Objective	Definition	Target	Penalty as indicated below (per occurrence)
4	a. Accuracy to print / paste barcode label on sheets / reams / bundles / boxes, etc. b. Accuracy to read Barcode on sheets / reams / bundles / boxes, etc.	Installed devices/ Sensor should work accurately	100% Accuracy	a. 1 to <=10 incidences: Rs. 5,000/- per incidence. b. >10 to <= 20 incidences: Rs. 10,000/- per incidence. c. More than 20 incidences: Rs. 20,000/- per incidence. Note: In case the number of incidences exceeds 30 per month , BNP, Dewas reserves the right for termination of contract and forfeiture of performance bank guarantee.
Application Performance Management				
5	Average Response time for below: a. page opening, b. data search, c. reports generation on T&T Application	Average time taken by the T&T application for a. page opening, b. data search, c. reports generation on T&T Application Note: Separate SLAs of above shall be applicable and accordingly penalties shall be calculated for all three scenarios. SI to submit fortnightly report to BNP, Dewas for the above performance parameter.	Average 10 seconds measured on a quarterly basis	a. >= 10 Seconds to < 20 Seconds measured on a quarterly basis, 0.1% of Quarterly Payment b. >= 20 seconds to < 30 seconds measured on a quarterly basis, 0.25% of Quarterly Payment c. >= 30 seconds to < 1 Minute measured on a quarterly basis, 0.5% of Quarterly Payment
RTO / RPO for DC-DR				
6	Meeting RPO / RPO	Recovery Point Objective (RPO)	30 Minutes	Penalty of 3% of the quarterly payment on OPEX value for every 30 minutes delay in RPO

		Recovery Time Objective (RTO)/	120 Minutes	Penalty of 3% of the quarterly payment on OPEX value for every 120 minutes delay in RTO
--	--	--------------------------------	-------------	---

Part C: SLA for deployment and availability of Manpower

S No.	Parameter	Remarks	Penalty
1	Manpower Deployment	Any deviation in qualification or in experience of the deployed manpower by SI as compared to the requirements as per Manpower clause in tender will be treated as non-deployment for the purpose of penalty calculation	Rs. 5,000/- per day per resource for non-deployment
2	Non-reporting	SI needs to ensure that onsite resource shall not take any leave without prior approval from BNP/ CNP/ SPM/ SPMCIL and need to ensure the alternate arrangement.	Rs. 5000/- per day per resource for each non-reporting day
3	Replacement of Resources	For every resource replaced by the firm beyond the 20% of the total number of resources deployed in a year.	Penalty of Rs 50,000

Part D: SLA Change Process

- The SLA mentioned under this RFP may change as client's business needs evolve over the course of the contract period.
- Any changes to the levels of service provided during the term of this Agreement will be requested, documented and negotiated in good faith by both parties. Either party can request a change. Changes will be documented as an addendum to this SLA and, subsequently, the Contract. If there is any confusion or conflict between the Contract, RFP and its addenda, the Contract will supersede.

3.4 Indemnification & Limitation of Liability

3.4.1 Subject to Clause 3.4.4 below, Implementation Agency (the "Indemnifying Party") undertakes to indemnify, and hold harmless the Purchaser (the "Indemnified Party") from and against all claims, liabilities, losses, expenses (including reasonable attorneys' fees), fines, penalties, taxes or damages (Collectively "Loss") on account of bodily injury, death or damage to tangible personal property arising in favor of any person, corporation or other entity (including the Indemnified Party) attributable to the Indemnifying Party's negligence or willful default in performance or non-performance under this Agreement.

3.4.2 If the Indemnified Party promptly notifies Indemnifying Party in writing of a third-party claim against Indemnified Party that any Service provided by the Indemnifying Party infringes a copyright, trade secret, or patents incorporated in India of any third party, Indemnifying Party will defend such claim at its expense and will pay any costs or damages, **that may be finally awarded against Indemnified Party.**

3.4.3 Indemnifying Party will not indemnify the Indemnified Party, however, if the claim of infringement is caused by

- a) Indemnified Party's misuse or modification of the Service;
- b) Indemnified Party's failure to use corrections or enhancements made available by the Indemnifying Party;
- c) Indemnified Party's use of the Service in combination with any product or information not owned or developed by Indemnifying Party;

However, if any service, information, direction, specification, or materials provided by Indemnified Party or any third party contracted to it, is or likely to be held to be infringing, Indemnifying Party shall at its expense and option either

- i. Procure the right for Indemnified Party to continue using it
- ii. Replace it with a non-infringing equivalent
- iii. Modify it to make it non-infringing

The foregoing remedies constitute Indemnified Party's sole and exclusive remedies and Indemnifying Party's entire liability with respect to infringement.

3.4.4 The indemnities set out in Clause 3.4 shall be subject to the following conditions:

- (i) the Indemnified Party as promptly as practicable informs the Indemnifying Party in writing of the claim or proceedings and provides all relevant evidence, documentary or otherwise;
- (ii) the Indemnified Party shall, at the cost of the Indemnifying Party, give the Indemnifying Party all reasonable assistance in the Defense of such claim including reasonable access to all relevant information, documentation, and personnel provided that the Indemnified Party may, at its sole cost and expense, reasonably participate, through its attorneys or otherwise, in such Defense;
- (iii) if the Indemnifying Party does not assume full control over the Defense of a claim as provided in this Article, the Indemnifying Party may participate in such Defense at its sole cost and expense, and the Indemnified Party will have the right to defend the claim in such manner as it may deem appropriate, and the cost and expense of the Indemnified Party will be included in Losses;
- (iv) the Indemnified Party shall not prejudice, pay or accept any proceedings or claim, or compromise any proceedings or claim, without the written consent of the Indemnifying Party;
- (v) all settlements of claims subject to indemnification under this Clause will: a. be entered into only with the consent of the Indemnified Party, which consent will not be unreasonably withheld and include an unconditional release to the Indemnified Party from the claimant or plaintiff for all liability in respect of such claim; and b. include any appropriate confidentiality agreement prohibiting disclosure of the terms of such settlement;
- (vi) the Indemnified Party shall account to the Indemnifying Party for all awards, settlements, damages, and costs (if any) finally awarded in favour of the Indemnified Party which are to be paid to it in connection with any such claim or proceedings;
- (vii) the Indemnified Party shall take steps that the Indemnifying Party may reasonably require to mitigate or reduce its loss as a result of such a claim or proceedings;
- (viii) in the event that the Indemnifying Party is obligated to indemnify an Indemnified Party pursuant to this Article, the Indemnifying Party will, upon payment of such indemnity in full, be subrogated to all rights and defenses of the Indemnified Party with respect to the claims to which such indemnification relates; and
- (ix) if a Party makes a claim under the indemnity set out under Clause 3.4.1 above in respect of any particular Loss or Losses, then that Party shall not be entitled to make any further claim in respect of that Loss or Losses (including any claim for damages).

3.4.5 The liability of either Party (whether in contract, tort, negligence, strict liability in tort, by statute or Contract Agreement or otherwise) for any claim in any manner related to this Agreement, including the work, deliverables or Services covered by this Agreement, shall be the payment of direct damages only which shall in no event exceed one time the total contract value payable under this Agreement. The liability cap given under this Clause shall not be applicable to the indemnification obligations set out in Clause 3.4 and breach of Clause 3.4.8 and 3.4.9.

3.4.6 In no event shall either party be liable for any consequential, incidental, indirect, special, or punitive damage, loss, or expenses (including but not limited to business interruption, lost business, lost profits, or lost savings) nor for any third-party claims (other than those set forth in Clause 3.4.1) even if it has been advised of their possible existence.

3.4.7 The allocations of liability in this Section 3.4 represent the agreed and bargained-for understanding of the parties and compensation for the Services reflects such allocations. Each Party has a duty to mitigate the damages and any amounts payable under an indemnity that would otherwise be recoverable from the other Party pursuant to this Agreement by taking appropriate and commercially reasonable actions to reduce or limit the number of such damages or amounts.

Clause 3.4.8: Security and Safety

(a) The Implementation Agency shall comply with the technical requirements of the relevant security, safety and other requirements specified in the Information Technology Act or Telegraph Act including the regulations issued by dept. of telecom (wherever applicable), IT Security Manual of the Purchaser as specifically stated in the RFP and follow the industry standards related to safety and security (including those as stated in the RFP), insofar as it applies to the provision of the Services.

(b) Each Party to the SLA/Agreement shall also comply with Purchaser or the Government of India, and the respective State's security standards and policies in force from time to time at each location of which Purchaser or its nominated agencies make the Implementation Agency aware in writing insofar as the same apply to the provision of the Services.

(c) The Parties to the SLA/Agreement shall use reasonable endeavours to report forthwith in writing to each other all identified attempts (whether successful or not) by unauthorized persons (including unauthorized persons who are employees of any Party) either to gain access to or interfere with the Purchaser as the case may be or any of their nominees data, facilities or Confidential Information.

(d) The Implementation Agency shall upon reasonable request by the Purchaser as the case may be or their nominee(s) participate in regular meetings when safety and information technology security matters are reviewed. (e) As per the provisions of the SLA or this Agreement, the Implementation Agency shall promptly report in writing to the Purchaser or its nominated agencies, any act or omission which they are aware that could have an adverse effect on the proper conduct of safety and information technology security at the facilities of Purchaser as the case may be.

Clause 3.4.9: Confidentiality

3.4.9.1 The Purchaser or its nominated agencies shall allow the Implementation Agency to review and utilize highly confidential public records and the Implementation Agency shall maintain the highest level of secrecy, confidentiality, and privacy with regard thereto.

3.4.9.2 Additionally, the Implementation Agency shall keep confidential all the details and information with regard to the Project, including systems, facilities, operations, management and maintenance of the systems/facilities.

3.4.9.3 The Purchaser or its nominated agencies shall retain all rights to prevent, stop and if required take the necessary punitive action against the Implementation Agency regarding any forbidden disclosure.

3.4.9.4 The Implementation Agency shall ensure that all its employees, agents and sub-contractors involved in the project, execute individual non-disclosure agreements, which have been duly approved by the Purchaser with respect to this Project. The implementing agency may submit a declaration that it has obtained the NDA from its employees. However, if the project is critical in nature, IA may get NDAs signed from every resource involved in the project and submit it to purchaser (Optional).

For the avoidance of doubt, it is expressly clarified that the aforesaid provisions shall not apply to the following information:

- (a) information already available in the public domain;
- (b) information which has been developed independently by the Implementation Agency;
- (c) information which has been received from a third party who had the right to disclose the aforesaid information;
- (d) Information which has been disclosed to the public pursuant to a court order.

3.4.9.5 To the extent the Implementation Agency shares its confidential or proprietary information with the Purchaser for effective performance of the Services, the provisions of the Clause 3.4.9.1 to **3.4.9.3** shall apply mutatis mutandis on the Purchaser or its nominated agencies.

3.4.9.6 Any handover of the confidential information needs to be maintained in a list, both by Purchaser & SI, containing at the very minimum, the name of provider, recipient, date of generation of the data, date of handing over of data, mode of information, purpose, and signatures of both parties.

3.4.9.7 Notwithstanding anything to the contrary mentioned hereinabove, the Implementation Agency shall have the right to share the Letter of Intent / work order provided to it by the Purchaser in relation to this Agreement, with its prospective purchasers solely for the purpose of and with the intent to evidence and support its work experience under this Agreement.

4. Functional Requirement and Process flow of proposed system:

Following are the functional requirements and proposed process flows for the Track and Trace System.

Note: : It is presumed that Bidder is a subject matter expert with necessary implementation experience in similar kind of solution; and hence, is capable of defining necessary adjustments/changes to the process (and associated integration points) to achieve the overall objective. SAP touch points mentioned in below tables are only indicative for reference purpose and it may increase or decrease during SRS preparation.

Bidder should ensure while designing the Track and Trace system that cycle time to complete the process at every stage and manpower at Units and DC-DR should not be increased.

- i. Refer Annexure Sheet Specification for Process Flow of sheets
- ii. Please note, proposed process should not affect the quality of the paper and speed of the machines.
- iii. Please refer Definition for Abbreviations & Definition

4.1 General Requirement of T & T System

General Requirements of T&T System	
a.	The system should be able to uniquely identify and track & trace every paper sheet, note, including primary and secondary packaging wherever applicable.
b.	The barcode dedicated area must be free from any other type of printed pattern and larger enough to accommodate for printing and cutting tolerances.
c.	System should securely transfer the unique barcodes to the barcode printers installed at the different stages.
d.	The equipment and sensors installed on the machines should be robust enough to handle machine vibration (if any). Also, capable to match with the maximum speed of paper manufacturing & printing machines specified in annexure.
e.	The system shall meet all the environmental, safety and other national and international regulations/ standards.
f.	The system should remain active during handling of paper at various processing stages and should be designed in such a way that it should provide 100% accountability and accuracy at all the stages through barcode, sensors, etc.
g.	The system should provide accurate and independent sheets counting and tracking, reconciliation procedures, productivity and traceability data collection and track every sheet while transported inside a unit. It must perform the operations totally independently, without any connection to the press control electronics.
h.	The sensors should be able to read barcodes, not only in transmitted light, but also in transparency and reflected, wherever applicable. To allow readability in transparency, the barcode area must be free from any printing on both sheet sides.
i.	Once the processing of a batch/shift gets completed the system should automatically generate a printable report containing detailed information about the printed batch/shift (ID, quantity of good and defective sheets, operators, etc.). The report should also contain a barcode that may be used to identify the batch in the next process.
j.	The system should not affect the quality & quantity of paper in terms of its security features,

	printing properties, lifespan of paper, rejection of paper etc.
k.	The system should create necessary Parent-Child relationships within Barcodes to establish product backward traceability across packaging hierarchy i.e., Reams, Pallets / Boxes, etc. at SPM, Narmadapuram and Note Bundles, Boxes, Batches, etc. at BNP, Dewas and CNP, Nashik.
l.	In case a barcode cannot be read by the system, the image grabbed by the barcode reading camera is shown to the operator, allowing him to manually associate the barcode. The system should also print human readable format of the printed barcode.
m.	The system should be able to detect any sheet processing anomaly and generate a programmable (PLC) signal which may be connected to the sheet-feeder to stop the feeding of sheets and allow for intervention of the operator. However, there should not be any damage to existing machine electronics. Any support required from machine's OEM, will be in bidder's scope. <i>Note: Typically detected anomalies are lost sheet, wrong sheet, wrong delivery pile, blue trial paper mixed to watermark banknote paper and similar conditions.</i>
n.	The system should have the capability to raise the alarm and stop the feeding of sheets after a configurable number of consecutive missing/misread barcodes.
o.	Before starting production of a batch (shift production) at every stage, the local machine connected to each machine can receive information from the server about quantity, barcode, production orders, etc. of the sheets which are belonging to that batch & update the information regarding the operation which is performed on it. All the data collected at unit-level are transferred to the central server and made available for the next process.
p.	The system should be complete with all required mechanical, electrical, electronics, etc for automatic, smooth and un-interrupted functioning.
q.	HMI with Monitor, Control/Data Unit, PLC, Interfacing components, Tower Lamp with buzzer, printer to print reports, etc. which shall be connected to machines (wherever applicable as per project and client requirements).
r.	The Track and Trace solution shall consist of multiple functionalities and all these functionalities should be seamlessly integrated with one another.
s.	The Track and Trace Solution should be capable of sending real-time alerts/SMS/email to pre-defined designated officers. Pre-defined conditions should be configurable.
t.	Indexing of key information fields is essential in order to facilitate searching.
u.	Ability to have different levels of access for different roles and designations.
v.	Ability to maintain audit trail of changes such as the time of change, the user ID, old and new value with field description.
w.	All the activities and transactions in the T&T ecosystem should be logged
x.	All sensitive data (such as passwords, etc.) shall have to be stored in encrypted format and should travel over network in encrypted format only. The system should protect the integrity and authenticity of the data.
y.	Track & trace system should perform material management of key items & collect the data for all the raw materials used for manufacturing at every stage of the printing process to improve the quality & productivity like: <ul style="list-style-type: none"> a. The system should have the provision to record/capture the ink consumption at different stage of printing at BNP and CNP b. The system should have the provision to record/capture Plate's consumption at different stage of printing at BNP and CNP
z.	The system should provide edit / update option to handle some exceptional cases like

	barcode not read, barcode not printed, missing barcode, reconciliation issues, etc. Edit/update in system can be performed only after due approval from appropriate authorities. These exceptional cases shall be discussed and finalized after SI's onboarding.
aa.	In order to ensure redundancy at machine level, standby barcode scanner, printer and required sensors should be installed on each machine covered under Track and Trace at SPM, Narmadapuram, as the plant is 24x7 operational. However, bidder may install standby barcode scanner, printer and required sensors at BNP and CNP as per their solution to ensure availability as per SLA.
bb.	Apart from SPM, Narmadapuram, sheets are also manufactured at Bank Note Paper Mill India Private Limited (BNPMIPL), Mysore and supplied to BNP-Dewas and CNP-Nashik. The BNPMIPL is also in process of printing barcodes on the sheets manufactured by them. The proposed Track and Trace solution at BNP-Dewas and CNP-Nashik should have provision to read barcodes printed on sheets coming from BNPM, Mysore.

Proposed Process flows for SPM-Narmadapuram, BNP-Dewas and CNP-Nashik are given below for bidder's reference. Bidders are advised to carry out detailed assessment of the processes to achieve the objectives of the project. Also, BNP, Dewas reserves the right to drop, add or modify the functional requirements to the extent that it is in line with the broad scope of the project. BNP, Dewas may also change the sequence of tasks and activities of certain modules to suit the needs of the project.

4.2 Proposed Process Flow of SPM, Narmadapuram: Refer Annexure Proposed Process Flow of SPM, Narmadapuram

Security Paper Mill, Narmadapuram			
1.	Paper Machine Section	Machine Name/ Manual	Barcode (Reader/ Scanner)
i.	Refined pulp and other raw materials to be issued to Paper Machine Section from Comber Storage Chest (COSC). SAP Touch points: <ul style="list-style-type: none"> Refined pulp issued to Paper Machine Section through SAP Movement Code: MIGO: 261 – Goods Issue – Refined Pulp Update stock of Refined pulp and other raw materials accordingly in T&T and SAP 		
ii.	At the paper machine section, there must be a set of suitable printer / marker to print the unique barcodes/ RFID on the Jumbo rolls . . The barcode/ RFID should contain details such as Calendar year, Denomination, Roll No., Web No., Stack No, Sheet ID, etc. Note- The barcode/ RFID printed in this process shall be readable at Rewinder and sheeter sections .	VOITH – CWBN Paper Machine	Barcode Printer
iii.	The system should store the key information like date of manufacturing, production, spoil, machine, shift, operator, etc. for every Jumbo roll		

iv.	<p>Semi-Finished Reel / Pope Reels / Jumbo Rolls to be returned by Paper Machine Section as below:</p> <ul style="list-style-type: none"> Semi-Finished Reels are returned to Pope Reel storage location (POPE) Spoiled-Paper-With-thread are sent to shredding /briquetting system for further processing. Spoiled-Paper-Without-thread are returned to Broke Handling Area (BRHA) storage location <p>SAP Touchpoints:</p> <ul style="list-style-type: none"> COR6N Process Order Confirmation to be done automatically by T&T system in SAP. Following information should be updated Raw Material, Date and Time, Manpower, Spoil, Good Production (yield), Shift, Machine, work center, etc. SAP Movement Code: (MIGO: 101 Goods Receipt –Semi-Finished Reel) SAP Movement Code: (MIGO: 531 Spoiled Receipt With thread) SAP Movement Code: (MIGO: 531 Spoiled Receipt – Without thread) 		
2.	Rewinder Section	Machine Name/ Manual	Barcode (Reader/ Scanner)
i.	<p>Semi-Finished Reel / Pope Reels / Jumbo Rolls to be issued to Rewinder Section from Pope Reel storage location (POPE).</p> <p>SAP Touchpoints:</p> <ul style="list-style-type: none"> The T&T should cross check with SAP Production Order for Denomination, Quantity, etc and issue Semi-finished Reel on FIFO basis (else error message should be raised for intervention of higher authority to clear with reason recording) Pope Reels are issued to Rewinder Section through SAP Movement Code: MIGO: 261 – Goods Issue – Semi-Finished Reel Update stock of Child webs accordingly in T&T and SAP 		
ii.	<p>The system should store the key information like date of manufacturing, production, spoil, machine, shift, operator, etc. for every roll</p>		
3.	Sheeter Section	Machine Name/ Manual	Barcode (Reader/ Scanner)
i.	<p>Child webs to be issued to Sheeter Section from Good-Web Reel Area storage location (GWRA).</p> <p>SAP Touchpoints:</p> <ul style="list-style-type: none"> The T&T should cross check with SAP Production Order for 		

	<p>Denomination, Quantity, etc and issue child webs on FIFO basis (else error message should be raised for intervention of higher authority to clear with reason recording)</p> <ul style="list-style-type: none"> Child webs are issued to Sheeter Section through SAP Movement Code: MIGO: 261 Good Issue- Semifinished web Update stock of Child webs accordingly in T&T and SAP 		
ii.	<p>At the Sheeter section, there must be a set of suitable printer / marker to print the unique barcodes on the side of every sheet in machine direction at the maximum speed of machine given under annexure. The barcode should contain details such as Calendar year, Denomination, Roll No., Web No., Stack No, Sheet ID, etc.</p> <p>Note- The barcode printed in this process shall be readable in all subsequent processes (Packaging, Offset, Intaglio, Numbering, etc.).</p>	PASABAN Sheeter KB-900	Barcode Printer
iii.	The machine shall be equipped with suitable readers/sensors to detect on which of the Delivery Points / Reject Gate / Sample Tray the machine is releasing each sheet	PASABAN Sheeter KB-900	Barcode Scanners
iv.	The system should be able to detect any sheet processing anomaly and generate an alarm/ signal to stop the feeding of sheets and allow for intervention of the operator. General detected anomalies are lost sheet, wrong delivery pile, etc.		
v.	System should carry out the reconciliation of the sheets w.r.t total number of sheets input and out at different delivery points.		
vi.	The system should store the key information like date of manufacturing, production, spoil, machine, shift, operator, etc. for every sheet		
vii.	<p>The system should have provision to support following manual operations to ensure 100% accountability of sheet:</p> <ol style="list-style-type: none"> Manual movements of sheets from piles to check the quality of paper by operator. Transfer of paper samples from the machine/section to the QC lab/Paper Testing Lab) & receive tested paper returned from the lab. 	Manual	Handheld Barcode Scanner to be used to make entries
viii.	<p>Semi-finished WIP stack to be returned by Sheeter Section as below:</p> <ul style="list-style-type: none"> Semi-finished WIP stack are returned to Stack (FEST) storage location Spoil Paper sheets are returned to Spoiled Sheet (RSSA) storage location. <p>SAP Touchpoints:</p> <ul style="list-style-type: none"> COR6N Process Order Confirmation to be done 		

	<p>automatically by T&T system in SAP. Following information should be updated Raw Material, Date and Time, Manpower, Spoil, Good Production (yield), Shift, Machine, work center, etc.</p> <ul style="list-style-type: none"> • SAP Movement Code: (MIGO: 531 Good Receipt- Spoil Paper sheet) • SAP Movement Code: (MIGO: 101 Good Receipt- Semi finished WIP stack) 		
4.	Manual counting section	Machine Name/ Manual	Barcode (Reader/ Scanner)
i.	<p>In case of quantity and quality suspected reams found during sheeter process, Track & trace system should have the provision to support following manual entries and reconciliation later:</p> <p>Quality Suspected Sheets:</p> <ul style="list-style-type: none"> - Replacement of erroneous sheets with good sheets to ensure 500 good sheets per ream. <p>Quantity Suspected Sheets:</p> <ul style="list-style-type: none"> - Addition/removal of extra sheets to ensure 500 sheets per ream. <p>Note: System should also support capturing examiner ID/Name, date of checking, any defects observed during manual fanning/ inspection etc from the operator.</p>	Manual	Handheld/ Portable Barcode Scanner
ii.	<p>A possible solution to handle manual counting section process is mentioned below, however the bidder is free to propose better solution:</p> <p>Quality Suspected Sheets:</p> <p>The barcodes of both spoiled and replaced sheet should be scanned with handheld barcode scanner. And accordingly, T&T system should update mapping of both spoiled and replaced sheets with corresponding Ream ID.</p> <p>Quantity Suspected Sheets:</p> <p>The barcodes of newly added sheets should be scanned and mapped with the corresponding Ream ID.</p>	Manual	Handheld Barcode Scanners to be used to make entries
5.	Ream-line section	Machine Name/ Manual	Barcode (Reader/ Scanner)
i.	<p>Semi-finished WIP Stack to be issued to Ream-line section.</p> <p>SAP Touch points:</p> <ul style="list-style-type: none"> • Sheets are issued to Sheeter Section through SAP Movement Code: MIGO: 261 Good Issue- Semifinished WIP Stack 		

	<ul style="list-style-type: none"> Update stock of Child webs accordingly in T&T and SAP 		
ii.	The system must create a parent-child link between the unique barcode of each sheet with the serial no of the reams produced from these sheets (1 ream = 500 sheets) for backward traceability.	PASABAN Ream Packaging Machine	Barcode Printer
iii.	There should be a barcode printer to print the barcode of ream and apply on the packed reams.	PASABAN Ream Packaging Machine	Barcode Printer
iv.	There should be a barcode scanner at the delivery point of the ream packaging machine to read the barcode of reams.	PASABAN Ream Packaging Machine	Barcode Scanner
v.	<p>Following minimum information should be mapped with the barcode of reams:</p> <p>Operator ID, shift, date of packaging, etc.</p>		
vi.	<p>Finished good currency paper batch to be returned by Ream-line Section as below:</p> <ul style="list-style-type: none"> Finished good currency paper batch are returned Spoil Paper sheets are returned to Spoiled Sheet (RSSA) storage location. <p>SAP Touchpoints:</p> <ul style="list-style-type: none"> COR6N Process Order Confirmation to be done automatically by T&T system in SAP. Following information should be updated Raw Material, Date and Time, Manpower, Spoil, Good Production (yield), Shift, Machine, work center, etc. SAP Movement Code: (MIGO: 531 Good Receipt- Spoil Paper sheet) SAP Movement Code: (MIGO: 101 Good Receipt- Finished good currency paper batch) 		
6.	Dispatch Section		
i.	Finished Good Currency Paper are transferred to Dispatch Section through SAP Movement Code VL06G: 601 Finished good currency paper batch		
ii.	The system should be capable to read the unique barcode of all the 15 reams before packing into box.	Manual	Barcode Scanner / Handheld/ Portable Barcode Scanner
iii.	The system shall generate a unique RFID for each pallet/box. The system must create a parent-child link between the		RFID

	unique barcode of each ream with the serial no of the box (1 box = 15 reams) for backward traceability.		
iv.	Following information should be mapped with the RFID of box: Operator ID, shift, date of packing, etc.	Manual	
v.	The system must provide the user interface to enter the details of wrong packing/repacking of reams during Pre-dispatch inspection, so that exact information of replaced reams may be incorporated.	Manual	
vi.	The system must provide the user interface to enter the details of boxes being dispatched and authorize the movement of boxes.		
vii.	RFID readers should be installed at the exit points of the warehouse. The system should automatically record the exit, once the RFID tagged boxes passes through the gate. Similarly, for any unauthorized movement, the system should raise the alarm.	Automatic	RFID Scanner

4.3 Proposed Process Flow of BNP, Dewas

Bank Note Press (BNP), Dewas			
1.	Security Store section	Machine Name/ Manual	Equipment Required
i.	<p>RFID readers should be installed at the entry points of the Security Store section. The system should automatically record the entry, once the RFID tagged boxes passes through the gate. T&T shall cross-check the scanned RFID/Barcode with the relevant information already received into T&T from Papermill.</p> <p><i>Note: The system should be able to handle the scenarios where RFIDs are damaged, missing or not readable.</i></p> <p>SAP Touchpoints:</p> <ul style="list-style-type: none"> The stock of Boxes, Reams and sheets along with denominations, quantity, etc. to be updated in SAP by T & T system. 	-	RFID Scanner
2.	Pre-conditioning/Store section:	Machine Name/ Manual	Equipment Required
i.	RFID readers should be installed at the entry points of the pre-conditioning section. The system should automatically record the entry, once the RFID tagged boxes passes through the gate.	-	RFID Scanner

	<p><i>Note: The system should be able to handle the scenarios where RFIDs are damaged, missing or not readable.</i></p> <p>SAP Touchpoints:</p> <ul style="list-style-type: none"> The stock of Boxes, Reams and sheets along with denominations, quantity, etc. to be updated in SAP by T & T system. 		
ii.	<p>The Control Section counts sheet of SPM (100%) & BNPM (5%) through GTS machines. Ream Count are matched with Lot Quantity mentioned in the invoices and Sheet Count as 500/Ream.</p> <p><i>(Note-</i></p> <ul style="list-style-type: none"> <i>In case of any mismatch, flag is raised and inform to concerned paper mills about the same via email.</i> <i>Also, system should do the reconciliation of each pallet and reports can be generated for the same.)</i> 	GTS Counting Machine	
iii.	Paper Requisition is raised by control section along with Denomination, Quantity, etc through SAP Movement Code: MB21: Paper Requisition.		
iv.	<p>Pre-conditioning section issues the required sheets to control section.</p> <p>SAP Touchpoints:</p> <ul style="list-style-type: none"> The T & T system should cross check with SAP Reservation number for Denomination, Quantity, etc. The T & T system should have provision to carry out Stock Transfer update in SAP. (311 Blank Paper Transfer to Simultan/Offset Vault) 		
3.	Offset section	Machine Name/ Manual	Equipment Required
i.	<p>At the beginning of every shift, blank sheets to be issued to Offset Section from Simultan/Offset Vault.</p> <p>SAP Touchpoints:</p> <ul style="list-style-type: none"> The T&T should cross check with SAP Production Order for Denomination, Quantity, etc and issue sheets on FIFO basis (else error message should be raised for intervention of higher authority to clear with reason recording) Blank sheets are issued to Offset Section through SAP Movement Code: MIGO:261 – Goods Issue - Blank Paper Update stock of Ream IDs / Sheet IDs accordingly in T&T and SAP 		
ii.	There should be a scanner / sensor on each offset machine to detect whether a barcode is already printed on the	<ul style="list-style-type: none"> Super Simultan 	Barcode Printer and Scanner

j.	<p>At the end of every shift, Replaced and Counted Numbered Notes to be returned by Fin-2 Section to Vaults as below:</p> <ul style="list-style-type: none"> Spoiled Notes are returned to Fin-2 Vault Replaced and Counted Numbered Notes are returned to Fin-3 Vault <p>SAP Touchpoints:</p> <ul style="list-style-type: none"> The Notes are returned through following SAP Movement Codes: <ul style="list-style-type: none"> MIGO: 309 Material to Material Transfer – Replacement with Star Numbered Notes MIGO: 101 Goods Received – All-Good Notes Receipt 		
10.	BPS & Cutlink (With-Cancellation CRN-Numbered sheets from Numerota Section comes to BPS & Cutlink)	Machine Name/ Manual	Equipment Required
i.	<p>At the beginning of every shift, sheets to be issued to BPS Printing Section from Fin-III Vault.</p> <p>SAP Touchpoints:</p> <ul style="list-style-type: none"> The T&T should cross check with SAP Production Order for Denomination, Quantity, etc and issue sheets on FIFO basis (else error message should be raised for intervention of higher authority to clear with reason recording) SAP Movement Code: 261 Goods Issue – CRN Numbered Sheets Update stock of Sheet IDs accordingly in T&T and SAP 		
ii.	<p>The system should be capable to read the unique barcode of every sheets from the bunch of 100 sheets or capable to read the unique auto-generated batch which is printed in numerota section for 100-100 sheets, at the feeding point of cutlink followed by BPS.</p>	• BPS-2000	Barcode Scanner
iii.	<p>There should be a provision to store the data like date of printing, inset letter, governor, prefix, imprint year, production, production order, spoil, shift, operator etc. for every sheet.</p>		

iv.	<p>A unique barcode for complete bundle (classification wise i.e. Denomination prefix, Governor, Inset letter, year) should be inserted / pasted on the bundle.</p> <p>Note: Original code of sheet will be mapped to the bundle batch code and paste the barcode over the shrink wrap bundle.</p>		
v.	<ul style="list-style-type: none"> The T & T system should perform reconciliations at the end of each shift (Machine-wise, Section-wise and Note-side*) and should have facility to generate final report for the signature/approval of a supervisor. If Sheets/Notes are not reconciled, then the T&T system should raise an alert and there should be a provision to enter the reason for reference. In later stage, if it gets reconciled then user should be able to close the operation with suitable reason. <p>Note: *Note-side includes Cut-Pack, BPS, Finishing and Packing sections.</p>		
vi.	<p>At the end of every shift, BPS Bundled Notes to be returned by BPS Section to Fin-III Vault as below:</p> <ul style="list-style-type: none"> Unused sheets are returned to Fin-III Vault BPS Bundled Notes are returned to Fin-III Vault <p>SAP Touchpoints:</p> <ul style="list-style-type: none"> CO11N Production Confirmation to be done automatically by T&T system in SAP. Following information should be updated Manpower, Spoil, Good Production Notes (yield), Date and Time, Shift, Machine, work center, etc. The sheets are returned through following SAP Movement Codes: <ul style="list-style-type: none"> MIGO: 101 BPS Bundled Notes Shrink Packed Bundled Notes are then transferred to Packing Vault through Movement Code MIGO: 301 Shrink Packed Bundled Notes 		
vii.	Term BPS shall be read as SNIM (Single note Inspection machine), wherever applicable in this RFP		
11.	Packing Section	Machine Name/ Manual	Equipment Required
i.	<p>At the beginning of every shift, Shrink Packed Bundled Notes to be issued to Packing Section from Packing Vault.</p> <p>SAP Touchpoints:</p> <ul style="list-style-type: none"> SAP Movement Code: 261 Goods Issue – Shrink Packed Bundled Notes 		
ii.	<ul style="list-style-type: none"> Shrink-wrapped bundled-notes are packed Prefix-wise in wooden boxes. The T & T system shall generate a unique RFID for each 	Manual	RFID and Handheld Barcode

	<p>box. The system must create a parent-child link between the unique barcode of each bundle with the serial no of the box for backward traceability. The operator should scan barcode of each bundle before placing into a box.</p> <ul style="list-style-type: none"> The T & T system should have provision to enter a batch no. containing information of all the packed bank notes/bundles/boxes to map with the prefix and serial number of bank notes, RBI center to track the details of dispatched bank notes to RBI. 		Scanner to read barcode of bundles manually
iii.	In case CNP plans to install Automatic Packaging System (APS) wherein in wooden boxes will be automatically filled by Bundles on the basis of prefix and boxes will also get labelled automatically and stored at pre-defined place by the APS. The proposed T&T system shall interface and takes requisite data from the APS to maintain packaging information.		
iv.	<p>At the end of every shift, Finished Good Notes Boxes to be returned by Packing Section to Packing Vault.</p> <p>SAP Touchpoints:</p> <ul style="list-style-type: none"> The Finished Good Notes Boxes are returned through following SAP Movement Codes: <ul style="list-style-type: none"> MIGO: 101 Finished Good Notes 		
12.	Dispatch/Consignment:	Machine Name/ Manual	Equipment Required
i.	Finished Good Notes are transferred to Dispatch Section through SAP Movement Code VL06G: 601 Finished Good Notes		
ii.	The system must provide the user interface to enter the details of boxes being dispatched and authorize the movement of boxes.		
iii.	<ul style="list-style-type: none"> RFID readers should be installed at the exit points of the warehouse. The system should automatically record the exit, once the RFID tagged boxes passes through the gate. Similarly, for any unauthorized movement, the system should raise the alarm. 	Automatic	RFID Scanner

Note:

Sheets issued for sample verification at BNP-Dewas and CNP-Nashik

Some of the lots received at BNP-Dewas and CNP-Nashik from Paper Mill can be marked for restrictive use, until the lot gets quality clearance from Paper Testing Lab. The existing process for checking the quality of sheets is mentioned below:

Existing Quality-Check Process:

- Some of the reams from the lot are sent for quality check** for sample verification.
- The quality of the sample sheets is then checked by printing through offset machine.**

- c. The offset-printed-sheets are sent to Paper Testing Lab for quality clearance.
- d. If the Paper Testing Lab certifies the quality of sheets, then **whole lot is marked for unrestricted use** (including the sheets already printed on offset) **and can be issued for further process.**

The above-mentioned scenario is proposed to be handled in following way:

Proposed Quality-Check Process:

a. Security Store section:

- Some of the lots received at BNP-Dewas and CNP-Nashik from Paper Mill shall be marked for restrictive use in T&T, until the lot gets quality clearance from Paper Testing Lab.
- Some sample reams from that corresponding lot are sent for quality check. These **Reams shall be marked as restricted for Quality Inspection at Security Store** in T&T system.
- Subsequently, the reams shall be stock-transferred to Pre-conditioning section in T&T.

SAP Touchpoints:

- The status of sample lot and sheets to be updated accordingly in SAP by T&T system.
- The stock of Reams and sheets along with denominations, quantity, etc. to be updated in SAP by T & T system.

b. Pre-conditioning/Store section:

- **After** completing the required number of days in **Pre-conditioning**, the reams shall then be **stock-transferred to Control section in T&T.**

SAP Touchpoints:

- **The stock of Reams and sheets along with denominations, quantity, etc. to be updated in SAP by T & T system.**

c. Offset section

- **The reams shall be issued by Control section to Offset Section in T&T.**

SAP Touchpoints:

- The stock of Reams and sheets along with denominations, quantity, etc. to be updated in SAP by T & T system.

d. Offset section:

- **The offset section shall print the sheets.**
- **The Paper Testing Lab shall test the quality of sheets.**
 - If PTL clears the quality of sheets, then whole lot (including offset printed sheets) shall be marked for unrestricted use for further processing in T&T.
 - If PTL rejects the quality of sheets, then whole lot (including offset printed sheets) shall be marked as rejected in T&T.

SAP Touch points:

- The status of sample lot and sheets to be updated accordingly in SAP by T&T system

5. Design Principles for Track and Trace System

The SI should follow below suggested guidelines while designing the system-

Design Principal for Track and Trace System	
a.	<p>Scalable: The solution should have the flexibility to scale as per requirements. It should be capable of increasing its total output under an increased load when resources are added. Scalability can in the form of horizontal and vertical.</p> <ol style="list-style-type: none"> The solution should be highly scalable to support the current and projected end user and account base volume across all three units. The solution should have an architecture that supports scalability beyond the mentioned volumes in the document. The solution should support variations in load patterns based on various factors The solution should support horizontal and vertical scalability for all three units. The system should be modular enough to cater to future requirements. The system should be scalable to support any addition of new machines, production lines and units in future. There should not be any constraint in application capabilities to add new machines, production lines and units.
b.	<p>Robust: The ability of the system to resist changes without changing its initial configuration. Whenever there is a minor or major enhancement, the ability of the application to adapt to the changes without much change in the behavior leads to robustness of the application. Being robust will not suffice the requirement, but the application has to be also fault-tolerant and resilient.</p>
c.	<p>Flexible: It refers to the ability of the application to adapt to possible or future changes in its requirements. The concept of flexibility is for loose coupling of the components, so that changes can be made as per requirements. Application should be configurable so that during implementation any minor changes can be configured as per requirements.</p>
d.	<p>Efficient: The application should be efficient. Once deployed it should free from error. The response time of the application should not go down along with the usage. The user experience should be appreciated so that it reflects usability across different roles.</p>
e.	<p>Availability - Components of the architecture should be resilient across any software, hardware or network and must provide redundancy and ensure that are no single point of failures in the key project components. The solution should support software upgrades / configuration without impact on availability. Considering the high sensitivity of the system, the design should be in such a way as to be resilient to technological sabotage</p>
f.	<p>Interoperability - Keeping in view the evolving needs of interoperability, especially the possibility that the solution shall become the focal point of delivery of services and may also involve cross-functionality with other projects in the future.</p>
g.	<p>Standards and Protocols Requirements</p> <p>The solution should adhere to industry standards and best practices. The solution should be designed considering below -</p> <ol style="list-style-type: none"> The system shall be compliant to OPC Protocols. Information Security: ISO 27001 Information security standards framework and guidelines standards under e-Governance standards (http://egovstandards.gov.in), Government of India, Information Technology Act 2000 & IT (Amendment) Act 2008 The data shall not be removed from the approved hosting facilities unless with the specific authorization of BNP, Dewas or as part of agreed backup procedures

6. Payment and Timeline

Phase	Milestone		Deliverables/Key Activities	Timeline (from the date of signing of Contract - T)	Payable
I	Solution Design	Project Initiation	<ul style="list-style-type: none"> Inception Report and System Blueprint Requirement Traceability and Verification Matrix (RTVM) SAP Integration approach document 	T + 10 weeks	Nil
		Design Phase	<ul style="list-style-type: none"> Software Requirement Specification (SRS) document High Level Design (HLD) document and Low-Level Design (LLD) 	T + 20 weeks	Nil
II	Implementation & Roll-out	Delivery of Track and Trace system for User Acceptance Test (UAT)	As per section 1.15 - User Acceptance Testing (UAT)	T + 36 weeks	Nil
		Completion of User Acceptance Testing (UAT)	Successful completion of User Acceptance Testing by BNP and other stakeholders and issuance of certificate for the same	T + 46 weeks	05% of capex cost *
		Delivery of Track and Trace system for Pilot testing / run (at same production lines as UAT)	As per section 1.17 – Pilot Roll Out	T + 48 weeks	Nil
		Successful completion of Pilot run	<ul style="list-style-type: none"> Successful completion of Pilot Testing by BNP and other stakeholders and issuance of certificate for the same 	T + 56 weeks	15 % of capex cost *
		Complete Application	<ul style="list-style-type: none"> Supply of all IT Infrastructure and Setting up 	T + 70 weeks	10% of capex cost *

		Roll out at all the units	of all the environments in DC at Noida and DR at Hyderabad as per Scope of Work		
			<ul style="list-style-type: none"> Supply, installation, and commissioning of all infrastructure (Hardware, Software (including licenses), Scanner, Reader, Sensors, IOT devices, etc.) at BNP, Dewas and SPM-Narmadapuram 	T + 72 weeks	25% of capex cost*
			<ul style="list-style-type: none"> Supply, installation, and commissioning of all infrastructure (Hardware, Software (including licenses), Scanner, Reader, Sensors, IOT devices, etc.) at CNP, Nashik. 	T + 74 weeks	15% of capex cost*
		Final Acceptance Testing (FAT), and Solution Go-Live	<ul style="list-style-type: none"> As per section 1.18 – Final Acceptance Test (FAT) Certificates of successful FAT & Go-Live from BNP, Dewas 	T + 84 weeks	20 % of capex cost*
III	ISO-27001	ISO 27001:2018 - Compliance and Certification	ISO 27001:2018 standard - Compliance and Certification from authorized agency as per Section 1.13 - Certification	T + 88 weeks	10% of capex cost*
IV	Warranty	Entire System Warranty	As per Section 1.19 - Warranty & Comprehensive Annual Maintenance Contract	12 months from date of issue of final acceptance certificate from BNP, Dewas and system Go-Live	Nil
V	Annual Contract Maintenance (CAMC)	CAMC	As per Section 1.19 - Warranty & Comprehensive Annual Maintenance Contract	48 months from the end date of warranty	6% of the price quoted for OPEX in the Financial bid per quarter for 48 months of CAMC and rest amount at the end of successful Exit Management

Note-

- i. Cumulative CAPEX cost (including Phase-2) should not exceed 65% of the Total Bid Cost.
- ii. Acceptance sign-off of all above activities, completion of procurement, installation acceptance shall be provided by BNP, Dewas.
- iii. In case Go-Live is delayed, the warranty and CAMC phase will start after the Go-Live
- iv. Payment is linked to the compliance with the SLA metrics as specified under Service Level Agreements and the payment shall be made to SI after any deductions of penalties (if any).
- v. BNP, Dewas reserves the right to withhold any payments until full satisfaction of the completeness & quality of work performed for each phase on basis of physical inspection, Acceptance Test records, etc.
- vi. The requirement of integrating New Pulp Plant, Paper Machine and Rewinder machines with SAP through SCADA can be taken up by SI separately in Phase-2 of this project after completion of T&T system FAT and cost shall be paid accordingly.

7. Technical Specifications

The specifications mentioned in this section are indicative requirements; **bidders may propose a better or more optimized solution that meets the objectives specified in this RFP**. Also, Bidders are advised to carry out their own assessment of requirement before submission of the response to this bid. Anything which is missing in this section but required for successful execution of the project (as per the Scope of Work and defined SLAs) anytime in future shall be provided by the Bidder without any additional cost to BNP, Dewas

Respective OEMs to submit the compliances of technical specifications on their letterhead duly countersigned by SI.

7.1 Bar Code Specification

S. No.	Particulars	Values	Compliance (Yes/No)	Deviations (if any with Justification / Reason)	Data Sheet /OEM literature reference
a.	Suggested Type of Coding	Barcode symbol - GS1 Data matrix RFID Tags- EPC Tag Data Standard QR Code- GS1 QR code			
b.	Compliance	ISO/IEC 15416 standard (At least Grade B)			
c.	Minimum character length for Barcode	GTIN-14 – Numeric only SGTIN- Maximum 34 characters SSCC- 18 digits numeric GLN-13 digits numeric			

d.	Size of barcode (including barcode + UIN (human readable) + silent zone + any others) to be applied on sheets, reams, boxes, note bundles, etc.	Size of the 2D code is dependent of the number and type of characters encoded however it should not be less than 8mm*8mm. Also, after printing the barcode, should attain the pass report to ensure scan ability			
e.	The barcode should be suitable for various sheet sizes of different denominations	1. Min. 400 x 475 mm & Max. 800 x 840 mm 2. 2D barcodes using GS1 Data matrix barcode symbol should be used			
f.	Minimum life of Barcode (once printed), under normal business operations	Three (3) years			
g.	Compatibility of Bar code with CWBN paper	70 to 140 GSM of 100% Cotton Rag content Cylinder Mould Watermark Bank Note (CWBN) Paper with windowed security thread.			
h.	Other	1. The barcode data also be available in clear text to allow readability by the operators. 2. Each packaging level barcode sample should obtain Pass report from GS1 India. 3. Data should be managed and stored as per GS1 EPCIS framework. 4. Identification of various locations, items, different layers of packaging shall be done in accordance with GS1 standards. 5. Products should be identified using GTIN. 6. Serialized 2D code shall carry data in SGTIN or SSCC format for traceability as applicable.			

		7. Locations should be identified using GLN format. 8. Use of GS1 Application Identifiers are mandatory while encoding data into barcode/RFID			
--	--	--	--	--	--

7.2 Bar Code Printer and Reader

S. No.	Particulars	Compliance (Yes/No)	Deviations (if any with Justification/ Reason)	Data Sheet/OEM literature reference
a.	The Code marker/printer should be of proven latest technology.			
b.	The Code marker/printer should print “on the fly” i.e., non-contact on the moving paper with quick dry and easily scannable at variable speed.			
c.	The barcode should be dissolvable during re-pulping/re-cycling and should not have any adverse effect of broke pulp or paper quality.			
d.	The system shall be suitable to print the barcodes at maximum speed of machines for SPM-Narmadapuram, BNP-Dewas and CNP-Nashik mentioned under annexure			
e.	The Code marker/printer should have Open and Standard Digital Data Communication for sharing of printed data to the System Server.			
f.	The Code marker/printer should accept standard encoder input for machine speed and 24 VDC pulses for trigger.			
g.	The printer head shall be mounted on rugged and vibration dampening mounting hardware with automatic as well as manual position control option as per the width of the paper. It should include all necessary accessories required to mount such as connection box, brackets, Industrial Power Supply Input 230 VAC, etc.			
h.	The printer should be capable to have all inbuilt self-adjusting mechanism to take care of variations in the operating parameters, power supply, climatic conditions, etc.			

7.3 Bar Code Reader /Sensor/ Camera

S. No.	Particulars	Compliance (Yes/No)	Deviations (if any with Justification/ Reason)	Data Sheet/OEM literature reference
a.	The Code scanner should be of proven and latest technology.			
b.	The Code scanner should be able to read barcodes, not only in transmitted light, but also in transparency and reflected, wherever applicable			
c.	The Code scanner should be Compact, non-contact type and should be able to scan all the marked Code from the moving paper at variable speed.			
d.	The Code scanner should be able to read the barcodes at maximum machine speed for SPM-Narmadapuram, BNP-Dewas and CNP-Nashik mentioned under annexure.			
e.	The scanner should be capable of wide area scanning with minimum width of 120mm or more to cater as per width of the paper.			
f.	The Code scanner should have Open and Standard Digital Data Communication for sharing of scanned data to the System Server.			
g.	Any light array is required for the scanner to detect the marked codes should be in accordance with standards.			
h.	The lighting system should not affect the functioning of other sensors and optical instruments in the respective areas.			
i.	The scanners shall be mounted on rugged mounting hardware without affecting the machine hardware and maintenance functions. It should include all necessary accessories required to mount and install Camera such as connection box, brackets, Industrial Power Supply Input 230 VAC, etc.			
j.	The scanner should be capable to have all inbuilt self-adjusting mechanism to take care of variations in the operating parameters, power supply, climatic conditions, etc.			
k.	The scanner should support features like Autofocus, Auto tuning, etc.			
l.	The Sensors/Camera/Scanner to be supplied by bidders under the Track and Trace solution should be capable to read 1D barcode and 2D barcode both			

7.4 Handheld Bar Code Reader / Scanner

S. No.	Particulars	Compliance (Yes/No)	Deviations (if any with Justification/ Reason)	Data Sheet/OEM literature reference
a.	The Handheld Bar Code Reader / Scanner should support USB (2.0 or above) (without any delay or loss in data transfer)			
b.	An Ingress Protection (IP) rating of IP65 and above for protection against fluid spills and dust etc.			
c.	The barcode scanner should be compatible with Android 6.0 or above/ standard OS as per the solution requirement			
d.	It should have atleast following features: <ul style="list-style-type: none"> • Alpha-numeric keypad • 4" WVGA (480*800), 16M colors • WLAN, 802.11 a/b/g/n, Bluetooth 4.0, BLE • 1.3 GHz quad-core, • 2GB+16GB Memory • 8 MP camera Auto focus camera with Flash • Li-Ion Battery 4200mAh, Battery run time atleast 12 hours on full charge, should support quick charge 			

7.5 Human Machine Interface (Connected to each Machine)

S. No.	Particulars	Compliance (Yes/No)	Deviations (if any with Justification/ Reason)	Data Sheet/OEM literature reference
a.	Minimum 12.1" XGA TFT LED LCD Intel® 5th. Gen. Core™ i3 Touch Panel Computer			
b.	Industrial 12.1" XGA TFT LCD with 50K Lifetime LED Backlight			
c.	Intel 5th Generation Core Processors with 4GB DDR3L SDRAM			
d.	The necessary OS, database and other application software should be part of each processing unit.			
e.	True-flat with IP66 certified front panel protection			
f.	PCIe and Mini PCIe Expansion Support			
g.	GUI (Graphical User Interface) based software for display system is to be provided with following functionality.			

	<ul style="list-style-type: none"> Operator monitoring Manual data entry Report generation Live status of Marker and Scanners and other Sensors Live status of other components, if any Diagnostic details, etc. 			
h.	<p>Tower type, 24VDC power supply, 3-layer (with GREEN, AMBER & RED colored) audio-visual alarm system is required for any type of system errors and hardware malfunctioning.</p> <p>i Green - denotes system healthy, normal running</p> <p>ii Amber- denotes warning signal</p> <p>iii Red – denotes critical error/faults. In this case, machine interlock should be given to stop the machine.</p> <p>(Requirement for Green, Amber, Red color to be decided later)</p>			
i.	<p>Printer (for printing reports): It should have following minimum features:</p> <ul style="list-style-type: none"> Printer type: Laser jet Paper type: A4 Connectivity: Standard (built-in Ethernet) Print speed black: Minimum 20ppm Duplex printing: Yes Duty cycle: 5000 monthly 			

7.6 IT Infra Specification

7.6.1 Rack Server

S. No	Minimum Technical Specifications	Compliance (Yes/No)	Data Sheet/OEM literature reference
a)	Offered rack server solution shall be of enterprise level class build.		
b)	Redundant Power Supplies, all power supplies shall support Active/ Standby mode.		
c)	Minimum latest generation Dual Intel socket each with 2.6GHz, 16 cores or higher for Physical Servers.		
d)	6 x PCI-Express 3.0 slots		
e)	Minimum 2x 600GB 10k SAS HDD.		

f)	Minimum 256 GB RAM DDR4 2666MHz or higher with memory sparing/mirroring (for physical server).		
g)	The server should provide 2x 16Gbps FC dual ports for Fiber channel connectivity.		
h)	The server should provide 2x 10G Copper & 4x 10Gbps SFP+SR Ethernet ports for LAN connectivity.		
i)	Hardware RAID Controller with 2GB or more cache supporting RAID 0,1, 5,6.		
j)	OEM Systems Management Software to be included, shall support service alerting, reporting and remote management with dedicated Gigabit management port, Server shall support configuring and booting securely with industry standard Unified Extensible Firmware. The management software should be from the same OEM.		
k)	All required cables and connectors to be included for all populated ports and interfaces		
l)	The server should be offered with latest PCI/PCIe card to cater LAN and SAN bandwidth traffic.		

7.6.2 Blade Server and Chassis

S. No.	Minimum Technical Specifications	Compliance (Yes/No)	Data Sheet/OEM literature reference
a)	Offered Blade server solution shall be of enterprise level class build.		
b)	Redundant Power Supplies, all power supplies shall support Active/ Standby mode in chassis.		
c)	Minimum latest generation Dual Intel socket each with 2.6GHz, 16 cores or higher for Physical Servers.		
d)	3 x PCI-Express 3.0 slots and more		
e)	Minimum 2x 600GB 10k SAS HDD.		
f)	Minimum 256 GB RAM DDR4 2666MHz or higher with memory sparing/mirroring (for physical server).		
g)	Hardware RAID Controller with 2GB or more cache supporting RAID 0,1, 5,6.		
h)	OEM Systems Management Software to be included, shall support service alerting, reporting and remote management with dedicated Gigabit management port, Server shall support configuring and booting securely with industry standard Unified Extensible Firmware. The management software should be from the same OEM.		
i)	All required cables and connectors to be included for all populated ports and interfaces		

j)	The server should be offered with latest PCI/PCIe card to cater LAN and SAN bandwidth traffic.		
Blade Chassis			
k)	Offered Blade chassis solution shall be enterprise level class build.		
l)	Blade chassis should support min six high-speed switch bays, interconnect bays capable of supporting I/O architectures in Ethernet/ Fiber Channel / FCoE. Should have redundant network switches.		
m)	Blade chassis shall support housing of FCoE, Ethernet, FC / SAS interconnect fabrics offering Hot Pluggable & Redundancy as a feature.		
n)	Centralized Redundant Management solution should be provided so that management of all blade servers across multiple chassis within racks can be done from single console		
o)	Should provide remote management capabilities, system management capabilities, and power management capabilities.		
p)	Proposed solution shall support provisioning of virtual and physical infrastructure both		
q)	Required quantity and the Speed of LAN and SAN port should be considered by the bidder as per their solution but it should achieve the minimum throughput of 32 GBPS. Required LAN and SAN SFP should be provided from the day 1 without any additional cost to BNP, Dewas, by using min 10 Gbps SFP to connect to Servers		

7.6.3 SAN Storage (SSD)

S. No	Minimum Technical Specifications	Compliance (Yes/No)	Data Sheet/OEM literature reference
a)	The proposed array shall be enterprise class high end storage with multi-controller architecture to ensure requisite performance. Storage System shall be supplied with minimum Dual controllers and will be provided behind integrated backplane / cross bar /switched architecture within the storage array from factory without use of any loosely coupled devices.		
b)	Offered Storage array shall support all well-known protocols like FC, iSCSI, etc. for the offered storage solution, meeting benchmark performance parameters specified in SLA		

	Licenses for the actual protocols used in the storage solution must be provided from day 1.		
c)	Storage shall be enabled with 12Gbps ports back-end engines and supplied with 8 x 16 Gbps FC ports, 4 x 10 Gbps iSCSI ports Storage shall have minimum 4 backend ports and minimum 4 frontend ports. All Frontend ports shall be scalable with required SFPs and licenses from Day 1. The solution should be capable to achieve Bandwidth aggregation.		
d)	Offered Storage should be provided with SAN functionality		
e)	Storage shall be provided with Performance Management Software.		
f)	Storage subsystem shall be supplied with Thin Provisioning, Snapshot, Clone.		
g)	Offered array shall have support for in-line De-Duplication and in-line Compression and should support Encryption for DC and DR while data at transit/rest		
h)	Offered storage subsystem shall support Raid 6 or equivalent		
	The proposed array must support non-disruptive replacement of failed hardware component, firmware upgrades and hardware upgrades.		
i)	The proposed storage shall support all the popular enterprise operating systems.		
	SI shall provide Storage Array configuration and Management software.		
j)	Storage management software shall be intuitive, browser-based user interface that configures and manages array.		
k)	Storage management software shall be able to manage access controls, user accounts and permission roles		
l)	Providing historical capacity and performance trend analysis.		
m)	Storage management software shall be able to monitor alerts.		
n)	Storage management software shall provide real time monitoring and historical analysis of storage performance		
o)	Storage solution should be capable of scaling		
p)	Offered Storage Array shall be given with at-least 1TB DRAM protected cache in a single array and shall be scalable to 2TB DRAM Cache.		

q)	Storage Array shall be offered with flash / SSD drives.		
r)	Storage Array shall be configurable in a No Single Point of configuration including Array Controller cards, Cache memory, FAN, Power supply etc.		
s)	Offered storage shall support online non-disruptive firmware upgrade for both Controller and disk drives.		

7.6.4 Server Load Balancer

Sr No	Minimum Technical Specification	Compliance (Yes/No)	Data Sheet/OEM literature reference
a)	SI shall provide dedicated Server Load Balancer appliance in order to equally load balance between various servers (Physical / Virtual) hosting the same kind of applications.		
b)	SLB must support the legacy as well as next generation features like virtualization, application performance monitoring, web performance optimization, security, and automation & orchestration		
c)	virtualization feature shall support the virtualization feature, which provides a complete and separate environment for a) Resources b) Configurations c) Management d) Operating System (licensed and open source like CentOS, Ubuntu, etc.) e) For SLB instance OEM are free to provide any OS inside the box		
d)	The proposed device should support minimum 06 Virtual Instances. Should provide machine authentication on the basis of CPU ID, HDDID and OSID with in the same appliance. Load balancing of authentication servers ensures that the authentication load is split across multiple authentication servers, thus avoiding any one particular authentication server from being overloaded		
e)	SI shall propose the SLB considering the scalability factor for future requirements as well as the current design considerations of minimum 10G connectivity, High Availability (standard VRRP open standards).		

f)	Proposed device should support L7, HTTP & HTTPS RPS. Proposed device should have minimum ports as per bidder design and.		
g)	It should provide minimum 5 Gbps of throughput and scalable up to 10 Gbps with RAM of 64GB and 500 GB HDD.		
h)	SLB should support minimum 25K SSL TPS (RSA 2k) and 15k ECC		
i)	The solution should provide compressive support for IPv6 functions to help with ipv4-to-ipv6 transition without business disruption and must provide support for dual stack, DNS64, NAT 64, DNS 46, NAT 46, IPv6 NAT. It should support advance functions Authoritative name sever, full DNS server with DNSEC, DNS DDOS, and application load balancing from day one. It should be capable of handling complete Full DNS bind records including A, AAAA etc.		

7.6.5 Next Generation Firewall (NGFW) & Intrusion Prevention

S. No.	Minimum Technical Specifications	Compliance (Yes/No)	Data Sheet/OEM literature reference
a)	NGFW must identify and control applications and application functions on all ports, all the time.		
b)	NGFW should have integrated redundant hot-swappable power supply, NGFW should have VPN capability also, to provide VPN connection to business users in limited zone only.		
c)	NGFW must deliver consistent controls to all users, regardless of location or device type.		
d)	NGFW should ASIC based in nature or should be open architecture based on multi-core CPUs to protect & scale against dynamic latest security threats		
e)	NGFW should have capability to block the traffic on the basis of geo-location.		
f)	Shall support NAT64, NAT46/ IPv4 over IPv6, DNS64 & DHCPv6.		
g)	The device shall support stateful session maintenance in the event of a fail-over to a standby unit. High Availability Configurations shall support Active/Active or Active/ Passive		

h)	NGFW must support minimum 3 Gbps NGFW throughput with all feature enabled for Real-world traffic or IMIX traffic.		
i)	NGFW shall be provisioned with sufficient no. of production and management ports as per the project requirement and bidder's solution and should support active-active and active-passive mode both.		
j)	NGFW should have required no's of SFPs as per bidder's design solution.		
k)	NGFW must support Concurrent session of at least 500000 & 50000 new session per second. Also, the appliance should have an option for upgradation which is 2X of asked concurrent connection.		
l)	NGFW should have integrated redundant hot-swappable power supply and fan.		
m)	NGFW should support minimum dual-ISP independent connections concurrently.		
n)	NGFW should support minimum users as per bidder's solution		
o)	NGFW Should support SSL VPN for at least 100 users. However, bidder must evaluate the requirement as per their solution.		

Network Intrusion Detection & Prevention System Requirements:
(Part of NGFW for DC and DR Only)

a)	OEM Signature shall be provided against known application vulnerabilities, and common malware, such as worms, trojans, spyware, and DoS. Packet Anomalies, Out of State protection, Connection limiting, blacklisting/whitelisting etc.		
b)	IPS must provide bandwidth rate limit to control the unwanted traffic such as P2P, streaming, etc.		
c)	The device must operate in transparent (Bridge), inline and promiscuous mode and IPS should have dual hot-swappable power supply from day 1		
d)	The device must have functionality of hardware-based fail-open & Software Fail Open. NIPS must also have fail-open feature which must allow traffic		
e)	The single device must have minimum Inspected throughput of 3 Gbps for all kinds of Real-world or IMIX traffic and should scalable upto 40 Gbps considering for future in case of Active-Active in HA or Active-Passive mode with < 50 ms latency with minimum 50 million concurrent sessions		
f)	The device must support vulnerability based and exploit based signatures. It must detect and block all known high risk exploits and the underlying		

	vulnerability (not just one exploit of that vulnerability)		
g)	The device must support Block attacks based on IP reputation, DNS Inspection, Geo-location, URL Inspection		
h)	Support for File reputation/type on the basis of application protocol including Http, Https, FTP, SMB (no file must be sent to cloud)		
i)	The device must have the ability to block connection to or from outside based on the reputation of the IP address that is trying to communicate with the network using OEM own threat intelligence		
j)	IPS filter must support network action set such as block (drop packet), block (TCP reset), permit, trust, notify, trace (packet capture), rate limit and quarantine and Should support VA scanners (Qualys, Rapid 7, Nessus) to fine tune the IPS policy.		
k)	IPS shall be provisioned with minimum 8 x 100/1000/10G Base-T Copper Ports, dedicated management port and provision required no's of SFPs as per design solution		
l)	The proposed management system shall support dashboard that show correlated data such as how many breached hosts, 3rd party VA scan integration data and how many pre-disclosed vulnerabilities discovered		

7.6.6 SAN Switch

S No	Minimum Technical Specifications	Compliance (Yes/No)	Data Sheet/OEM literature reference
a)	Each SAN switch shall be supplied with minimum of FC ports and scalable for future expansion as per bidder design		
b)	Proposed enterprise switch shall have ability to provide FC ports and all the required licenses should be supplied from day 1		
c)	Offered SAN switch shall be supplied with minimum of 48 ports and scalable to 96 ports of 16 Gbps FC Ports		
d)	The switch shall have No Single Point of Failure (SPOF) and all the components shall be hot swappable without even scheduled down time		
e)	The switch shall have hot swappable N+1 redundant Power Supply with separate AC inputs		

f)	The switch shall have hot swappable N+1 redundant Cooling Fans		
g)	The switch shall have feature for Non-disruptive firmware update		
h)	The switch shall have Real time performance monitoring reporting tool		
i)	The switch shall support multiple Operating Systems.		
j)	The switch shall have support of all leading SAN / NAS disk arrays and tape libraries.		
k)	The switch shall have following security features:		
	<ul style="list-style-type: none"> • Must have hardware & Software zoning 		
	<ul style="list-style-type: none"> • Policy based security and centralized management 		
	<ul style="list-style-type: none"> • Encryption 		
	<ul style="list-style-type: none"> • Authentication 		
l)	The switch shall have high availability feature with no performance degradation of switching operation.		

7.6.7 Switch

S.No.	Minimum Technical Specifications	Compliance (Yes/No)	Data Sheet/OEM literature reference
a)	The switch should have 48 X 1G ethernet ports and 4x 10G fiber ports with filled SFP from day 1		
b)	The Switch should support packet filtering at L2 (Layer 2) through L4 (Layer 4); flow classification based on source MAC address, destination MAC address, source IP (IPv4/IPv6) address, destination IP (IPv4/IPv6) address, port, protocol, and VLAN.		
c)	There switch should not have any single point of failure like power supplies and fans etc. should have 1:1/N+1 level of redundancy		
d)	Interface requirement as per bidder's solution and filled SFP from day 1, by using min 10 Gbps SFP to connect to Servers		
e)	Switch must have necessary licenses for Dynamic Routing Protocols: OSPF, BGP / ISIS, LLDP, PIM/MPLS / VXLAN Bridging Routing, EVPN for VXLAN.		
f)	Switch should have a minimum 4GB of RAM.		
g)	The Switch should support Virtual Router Redundancy Protocol (VRRP)		

7.6.8 Server Security and Antivirus for servers

Sr No	Minimum Technical Specification	Compliance (Yes/No)	Data Sheet/OEM literature reference
a.	The solution should have threat detection, identification, and prevention capabilities. The Solution should have state full Inspection Firewall, Anti-Malware, Deep Packet Inspection with HIPS, Integrity Monitoring and Recommended scan in single module or an in single agent.		
b.	The solution should analyze all packets to and from the server for intrusion attempts and propagation and Solution should support atleast Windows and Linux family.		
c.	The solution should use vulnerability based and not exploit based signatures. It should detect and block all known, high risk exploits along with their underlying vulnerability (not just one exploit of that vulnerability)		
d.	The solution should automatically share suspicious object samples with on premise and Solution should cover of all IP-based protocols (TCP, UDP, ICMP, GGP, IGMP, etc.) and all frame types (IP, ARP, etc.) with fine-grained filtering (IP and MAC addresses, ports) and basic prevention of denial of service (DoS) attack		
e.	The solution should provide protection for Web Server, Application and Database Server		
f.	The solution should protect against SQL injection attacks and the management server should have option to install on Windows based server & RHEL server and centralized management for physical, virtual & container.		
g.	The solution should protect against cross-site scripting (XSS) attacks		
h.	The solution should protect Web applications by inspecting SSL-encrypted HTTP traffic streams before they reach the application		a
i.	The solution should support a wide variety of reports should be able to generate report data into a variety of different file formats like HTML, PDF etc.		

7.6.9 Back Up Software

S. No.	Minimum Technical Specifications	Compliance (Yes/No)	Data Sheet/OEM literature reference
a)	Shall offer following capabilities:		
i.	Fast restore		
ii.	Intelligent backup (De-duplication & compression)		
iii.	Archival and retention		
iv.	Backup software		
v.	Automated mechanism		
b)	Shall support following backup policy for both file system and database:		
i.	Daily incremental backup for application and database (online) with retention period of at least 30 days.		
ii.	Weekly full backup for application and database (online) with retention period of at least 30 days.		
iii.	Monthly Full backup for filesystem with retention of at least two copies.		
c)	Backup of database shall be taken online. Adequate licenses shall be provided from Day 1.		
d)	Able to take regular online & offline back up of data.		
e)	Capability to monitor and enhance the performance of scheduled backups, schedule regular testing of backups.		
f)	Execution of backups of volumes and files (or related any dependencies) whenever required or in case of upgrades and configuration changes to the system		
g)	24x7 support for file and volume restoration.		
h)	Proposed backup software with allied components should be supported on various OS platforms like Windows family, Linux family etc. The backup server should be compatible enough to take back up from both Windows and Linux OS platforms.		
i)	Proposed appliance should support retention lock to prevent malicious, ransomware, trojans etc. attacks which ensures that no data is deleted accidentally till the retention of the backup get expired. In case data is replicated to DR/Secondary site, no additional licenses must be required at DR site to maintain retention lock on replicated data.		

7.6.10 Backup Solution: Tape Library based backup

S. No.	Minimum Technical Specifications	Compliance (Yes/No)	Data Sheet/OEM literature reference
a)	It shall be Modular design to allow configuration, add capacity increase performance		
b)	Backup Solution shall be provided for long term data storage De duplication and Compression ratio should be as per bidder's solution		
c)	Offered Backup Solution should provide encryption functionality.		
d)	Must have the ability to perform different backup or restore jobs simultaneously.		
e)	Proposed backup appliance must support LAN and SAN based backup		
f)	Offered backup Solution utilize physical tape library backup infrastructure in the following aspects:		
	i. Compatibility with the physical tape library backup server / media servers.		
	ii. Compatibility with physical tape library tape library and tape drives		
	iii. Compatibility with physical tape library backup software.		
g)	The offered tape library must be offered with Minimum of 10 LTO8 tape drive (along with necessary licenses) The Bidder must supply minimum 31 nos Re-Writable LTO8 DATA CARTRIDGES with BARCODE LABELS from Day 1 along with 2 Nos. Universal Cleaning cartridges.		
h)	Bidder must provision the sufficient no. of TAPE for backup solution as per the given requirement.		

7.6.11 Router

S. No.	Minimum Technical Specifications	Compliance (Yes/No)	Data Sheet/OEM literature reference
1.	Router should have minimum 2 x 10 G port with filled SFP from day 1		
2.	Router should have minimum required interface slots as per bidder design.		
3.	Router should support both IPv4 and IPv6.		
4.	Router should support RIB capacity of 1 Million IPv4, IPv6, 4K L3VPN and VRF		

5.	Router should support services like L2VPN, L3VPN and VPLS.		
6.	Router should support Static Route, Default Route, RIPv2, OSPFv2, BGP, PBR and IS-IS.		
7.	Router should support VXLAN/NVGRE or equivalent for Data Center Interconnect.		
8.	Router should support following MPLS features – LDP, Layer 2 VPN technologies with LDP signaling, Traffic Engineering, Fast Reroute Link Node & Path protection.		
9.	Router should have capability of mapping of address and port using encapsulation as well as translation mechanism for IPv4 to IPv6 migration functionalities.		
10.	Router should be manageable through Local Console & Aux Port, Telnet and SSHv2.		
11.	Router should support SNMP v1, v2 and v3 features.		

7.6.12 Smart Rack

S. No.	Minimum Technical Specifications	Compliance (Yes/No)	Data Sheet/OEM literature reference
a)	Solution should be Supplied, installed, and commissioned in the Smart Rack. Capacity of Smart Rack to be assessed by SI as per the infrastructure requirement. Also, it should have minimum 3U free space for future expansion.		
b)	Integrated precision cooling for all IT assets inside the smart rack		
c)	The Smart Rack should have minimum UPS Capacity of at least 10 minutes backup all the time after complete installation and commissioning of T&T infrastructure in the rack.		
d)	Should be capable to remote monitoring of the basic environmental conditions such as Temperature, Humidity, Water leakage, etc. inside the rack.		
e)	Emergency Ventilations in case of cooling failure		
f)	Solution should have sufficient interior lightning		
g)	Solution should support maintenance bypass mechanism		
h)	Should have Touch panel LCD Display and remote IP-based monitoring		
i)	Solution should get integrated with the existing or new BMS system.		
j)	Built-in Fire Detection and alarm system		
k)	Electronic door lock with biometric verification		

l)	Smart Rack should be fully protected from dust, moisture, rodent and noise etc.		
m)	Build in Intelligent rack Power Distribution Units (PDUs) with efficient power management system.		
n)	All the components used to design the system should be redundant and in the Events of failure the components can be maintained easily		
o)	Solution should be SNMP based, IP Based, SMS and Email notification enabled		
p)	Should monitor Temperature and Humidity Fan speed in rpm and fan failure alarm Door Open or close status.		
q)	Solution should maintain Temperature: 22 (+/-) 4 degrees and Humidity 40% RH to 60% RH		
r)	Solution should be able to monitor power consumption at each PDU level. Power consumption and cooling details should get displayed on the LCD screen of Smart rack.		
s)	Bidder shall be responsible to connect the installed Smart Rack with the existing Non-IT setup.		
t)	Bidder shall be responsible for provisioning of earthing pit and required installation and maintenance.		

Section VIII: Quality Control Requirements

(As per section VII- Scope of work and Technical Specification)

SECTION IX: Bid Evaluation Methodology and Qualification Criteria

1.1 Bid Evaluation Methodology

- To evaluate the bids, the purchaser shall formulate a Tender Evaluation Committee (also referred to as "Evaluation Committee").
- The selection of Bidder will be a three-phase process i.e., Pre-Qualification, Technical and Financial bids evaluation of the technically qualified Bidders.
- To assist in the examination, evaluation, and comparison of the bids, and qualification of Bidder(s), the Evaluation Committee may, at its discretion, ask any Bidder for a clarification of its bid.
- The Evaluation Committee shall evaluate Pre-Qualification, Technical and Financial bids as per the following process:

1.1.1 Pre-Qualification Evaluation

- The first process is to examine the eligibility of the Bidders as per the Pre-Qualification Criteria.
- Only those Bidders who qualify the Pre-Qualification Criteria shall be evaluated for technical criteria.

1.1.2 Technical Evaluation

- The Evaluation Committee shall evaluate the Technical Bids and carry out marking of each Bidder on the basis of "Technical Evaluation Criteria".
- Bidder securing minimum 70 marks in Technical Evaluation shall be considered as technically qualified bidder.
- The financial evaluation shall be carried out only for the technically qualified bidders as specified in below section.

1.1.3 Combined Quality and Financial Evaluation

- BNP, Dewas will follow the Quality and Cost Based Selection Process (QCBS). The overall evaluation shall carry **30%** weightage to Technical Score and **70%** weightage to Financial Bid (Section XI - Table 1-Grand Total Cost). Thereby, the Bidder with the highest scores (H1) on Quality and Cost based (QCBS) evaluation will qualify as the Successful Bidder.
- For all the qualified bidders whose price bid have been opened, a combined score (S) shall be determined as per the below formula:

Combined score 'S' of a bidder 'A'

$$= 30\% * (\text{Technical Score of A}) + 70\% * \left[\frac{(\text{Lowest Total Financial Bid})}{(\text{Total Financial Bid of A})} \right] * 100$$

- On basis of the above combined score, the bidder shall be ranked in terms of the combined score obtained. The bidder with the highest combined score (H1) shall be declared successful.

1.2 Eligibility Criteria

1.2.1 Pre-Qualification / Minimum Eligibility Criteria

The following criteria are prescribed as Pre-Qualification criteria for Bidders interested in undertaking this project:

#	Eligibility Criteria	Applicability	Supporting documents required
A.	General		
1.	<p>Bidder*/Consortium Members* shall be either proprietary firm/ Limited Liability Partnership (LLP)/Company/Partnership/ (Legal Entity) registered under relevant regulations in India.</p> <p>*Any bidder/ Consortium Members from a country which shares a land border with India will be eligible to bid in the tender only if the bidder is registered with the Competent Authority (The Registered Committee constituted by the Department for Promotion of Industry and Internal Trade)</p>	<p>Single Bidder – Bidder</p> <p>Consortium / JV – Lead Bidder</p>	<p>Company's registration / Certificate of incorporation/ Partnership Deed/ Any other registration certificate (as applicable)</p> <p>Any bidder/Consortium members from a country which shares a land border with India will need to submit the proof of registration</p>
2.	Bidder should have valid GST registration certificate	Single Bidder – Bidder Consortium / JV – Lead Bidder	Copy of GST certificate
3.	Bidder should have valid PAN card	Single Bidder – Bidder Consortium / JV – Lead Bidder	Copy of PAN card
4.	Bidder should not have been blacklisted / debarred by SPMCIL or its units/ BRBNMPL/ BNPMIPL/ Government of India as on date of bid submission.	Single Bidder – Bidder Consortium / JV – All members	Declaration on company's letter head duly Signed & sealed
B.	Experience & Past Performance		
5.	Bidder/ Consortium Member should have experience of executing at least one similar kind of project successfully including minimum 8.5 Crore (no.) Barcode/QR/Rfid/Any other similar mechanism in a year during last 05 years ending 31/03/2021 for Track & Trace Solution including software and hardware in any of the below areas:	<p>Single Bidder – Bidder</p> <p>Consortium / JV – Any Member</p>	<p>a. Documents required in case of Completed project:</p> <p>Copy of Purchase Order / Work order / Agreement / Contract + Completion certificate from Client on client's letterhead + Assignment Details as per</p>

	Manufacturing or Security Printing or Supply Chain Management or Logistic.		<p>the format provided in Bidding Forms</p> <p>b. Documents required in case of Ongoing project (Project in O&M phase after Go-Live): Copy of work order/Agreement + Go-live certificate from client on client's letterhead + Assignment Details as per the format provided in Bidding Forms</p> <p>Note: The credentials regarding experience and past performance to the extent required as per eligibility criteria submitted by the bidder may be verified by BNP, Dewas from the parties for whom work has been done.</p>
6.	Bidder/Consortium Member should have experience of executing at least one successful project of Software Development/Customization/ Configuration of SAP ERP during the last 05 years ending 31/03/2021.	<p>Single Bidder – Bidder</p> <p>Consortium / JV – Any Member</p>	<p>a. Documents required in case of Completed project: Copy of Purchase Order / Work order / Agreement / Contract + Completion certificate from Client on client's letterhead + Assignment Details as per the format provided in Bidding Forms</p> <p>b. Documents required in case of Ongoing project (Project in O&M phase after Go-Live): Copy of work order/Agreement + Go-live certificate from client on client's letterhead + Assignment Details as per the format</p>

			<p>provided in Bidding Forms</p> <p>Note: The credentials regarding experience and past performance to the extent required as per eligibility criteria submitted by the bidder may be verified by BNP, Dewas from the parties for whom work has been done.</p>
7.	The bidder should have the service support facility in India.	<p>Single Bidder – Bidder</p> <p>Consortium / JV – Any Member</p>	Declaration shall be provided in company letterhead with details of service centre such as address, contact person, contact details.
C. Capability- Certifications and Manpower			
8.	Bidder should have valid ISO 27001:2013 or higher certification or The Bidder must have CMMi level 5	<p>Single Bidder – Bidder</p> <p>Consortium / JV – Any Member</p>	Copy of Valid Certificate
D. Financial Standings (Lead Bidder only in case of Consortium)			
9.	Average annual turnover of the bidder's firm during last three years period ending 31.03.2021 should be more than INR 60 Crores.	<p>Single Bidder – Bidder</p> <p>Consortium / JV – Lead Bidder</p>	CA Audited Balance sheet and Profit & Loss statement for FY 2020-21, 2019-20 and 2018-19 / Relevant Certificate from Chartered Accountants
10.	Bidder Firm should not have suffered any financial loss for more than one year during the last three years, (FY 2020-21, 2019-20 and 2018-19)	<p>Single Bidder – Bidder</p> <p>Consortium / JV – Lead Bidder</p>	CA Audited Balance sheet and Profit & Loss statement for FY 2020-21, 2019-20 and 2018-19 /Relevant Certificate from Chartered Accountants
11.	Net worth of the Bidders firm should a. Not be in negative as on 31.03.2021 b. Not have eroded by more than 30% in the last three years, ending on 31.03.2021.	<p>Single Bidder – Bidder</p> <p>Consortium / JV – Lead Bidder</p>	Relevant Certificate from Chartered Accountants

Important Note: –

- 1 The Indian partner should be “Class-1 local supplier” and should have minimum 50% contribution (local content) in the project. The guidelines published by Ministry of Commerce and Industry – Department for Promotion of Industry and Internal Trade vide Order no: P-45021/2/2017-PP (BE-II) Dated: 16th Sep 2020 – “Public Procurement (Preference to make in India), Order 2017 – Revision” and its subsequent amendments / revisions shall be applicable.
- 2 Similar kind of project means (as point no. B (5)) – where project scope should include application development for Track and Trace Solution and supply of Infrastructure. Also, as mentioned it should have at least 8.5 CR. Barcode/QR/Rfid/Any other similar mechanism used in the project in a year.

Note:

1. The Startups and Micro & Small Enterprises registered bidders are relaxed for submission of Prior Experience as per circular no.1(2)(1)2016-MA dt.10.03.2016 issued by Govt. of India, Ministry of Micro, Small & Medium Enterprises, New Delhi subject to meeting of quality and technical specifications.
2. There is no relaxation for MSE/start up registered firms for Capacity/Capability, equipment and manufacturing facilities.
3. The Startups and Micro & Small Enterprises registered bidders are relaxed for only Prior Turnover Criteria as per circular no.1(2)(1)2016-MA dt.10.03.2016 issued by Govt. of India, Ministry of Micro, Small & Medium Enterprises, New Delhi subject to meeting of quality and technical specifications.
4. ***If the lead bidder wants to seek benefits and relaxation under Public Procurement Policy for MSEs Order 2012 and its subsequent amendments, then all the consortium members including the lead bidder should be MSE/Startup" and valid documents needs to be submitted as per the guidelines mentioned in the said order and its subsequent amendments.***
5. All experience, past performance and capacity/ capability related data should be certified by the authorized signatory of the bidder firm. The credential regarding experience and past performance to the extent required as per eligibility criteria submitted by bidder shall be verified from the parties for whom work has been done.
6. All financial standing data should be certified by certified accountants e.g. Chartered Accountants (CA) in India and Certified Public Accountant/ Chartered Accountant in other countries.

CONDITIONS FOR MICRO AND SMALL ENTERPRISES (MSEs)

2. As per Public Procurement policy (PPP) for Micro & Small Enterprises (MSEs) Order, 2012 issued vide Gazette Notification dated 23.03.2012 by Ministry of Micro, Small and Medium Enterprises of Gov. of India, MSEs must be registered with any of the following in order to avail the benefits/preference available vide Public Procurement Policy MSEs Order, 2012.
 - a) District Industries Centers (DIC)
 - b) Khadi and Village Industries Commission (KVIC)
 - c) Khadi and Village Industries Board
 - d) Coir Board
 - e) National Small Industries Corporation (NSIC)

- f) Directorate of Handicraft and Handloom
- g) Any other body specified by Ministry of MSME (MoMSME)
- h) Udyog Aadhaar Acknowledgment/Udyog Aadhaar Memorandum issued by MoMSME.

2. MSEs participating in the tender must submit valid & authorized copy of certificate of registration with any one of the above agencies. In case of bidders submitting DIC registration certificate shall attach original notarised copy of the DIC certificate. The MSE's Bidder to note and ensure that nature of services and goods/items manufactured mentioned in MSEs certificate matches with the nature of the services and goods/items to be supplied as per Tender.
3. Traders/resellers/distributors/authorized agents will not be considered for availing benefits under PP Policy 2012 for MSEs as per MSE guidelines issued by MoMSME.
4. The registration certificate issued from any one of the above agencies must be valid as on Bid closing date of the tender. Bidder shall ensure validity of registration certificate in case bid closing date is extended.
5. The MSEs who have applied for registration or renewal of registration with any of the above agencies/bodies, but have not obtained the valid certificate as on close date of the tender, are not eligible for exemption/preference.
6. Relaxation of Norms for Micro & Small Enterprises (MSEs): Pre-qualification criteria with respect to Prior Turnover and Prior experience may be relaxed for Micro & Small Enterprises as per GOI guidelines subject to meeting of quality and technical specifications.

CONDITIONS FOR START-UP COMPANIES

1. Subject to meeting of Quality and Technical specifications, BNP may consider allowing the participation of "Start-up" companies with capability to execute the supply/services, as per technical specifications/ perform the job as per scope of work specified in the tender and subject to meeting extant & relevant guidelines of Government of India. This should be confirmed and substantiated in the technical bid.
2. The bidder who intends to participate as "Start-up" company should enclose the Certificate of Recognition issued by Department of Industrial Policy and Promotion, Ministry of Commerce & Industry, Govt. of India during submission of Technical bid.
3. Prequalification Criteria with respect to Prior Turnover and Prior Experience may be relaxed for Start-ups as per the GOI guidelines.
4. However, there may be circumstances like procurement of items/services related to public safety, health, critical security operations and equipment, etc. wherein BNP reserves the right to not consider relaxation of Prior Turnover and Prior Experience for Start-up Companies as per GOI guidelines.
5. Start-up Companies, who are also registered as MSEs and wish to avail the benefits as applicable to MSE, shall submit relevant documents covered under Conditions for Micro and Small Enterprises elsewhere in this tender.

1.2.2 Technical Evaluation Criteria

The following criteria are prescribed as Technical Evaluation criteria for Bidders who qualify in Pre-Qualification stage:

#	Eligibility Criteria	Applicability	Max Marks	Supporting documents required
A. Experience & Past Performance				
1.	<p>Bidder/Consortium Member should have experience of executing at least one similar kind of project successfully including minimum 8.5 Crore (no.) Barcode/QR/Rfid/Any other similar mechanism in a year during last 05 years ending 31/03/2021 for Track & Trace Solution including software and hardware in any of the below areas: Manufacturing or Security Printing or Supply Chain Management or Logistic.</p> <p>Scoring Criteria:</p> <ul style="list-style-type: none"> One (1) Project = 10 marks Two (2) Projects = 20 marks More than 2 Projects = 30 marks 	<p>Single Bidder – Bidder</p> <p>Consortium – Any member</p>	30	<p>a. Documents required in case of Completed project: Copy of Purchase Order / Work order / Agreement / Contract + Completion certificate from Client on client's letterhead + Assignment Details as per the format provided in Bidding Forms</p> <p>b. Documents required in case of Ongoing project (Project in O&M phase after Go-Live): Copy of work order/Agreement + Go-live certificate from client on client's letterhead + Assignment Details as per the format provided in Bidding Forms</p> <p>Note: The credentials regarding experience and past performance to the extent required as per eligibility criteria submitted by the bidder may be verified by BNP, Dewas from the parties for whom work has been done.</p>
2.	<p>Bidder/Consortium Member should have experience of executing at least one successful project of Software Development / Customization / Configuration of SAP ERP during the last 05 years ending 31/03/2021.</p>	<p>Single Bidder – Bidder</p> <p>Consortium – Any member</p>	30	<p>a. Documents required in case of Completed project: Copy of Purchase Order / Work order / Agreement / Contract + Completion certificate from Client on</p>

	<ul style="list-style-type: none"> One (1) Project = 10 Marks Two (2) Projects = 20 Marks More than 2 Projects = 30 Marks 			<p>client's letterhead + Assignment Details as per the format provided in Bidding Forms</p> <p>b. Documents required in case of Ongoing project (Project in O&M phase after Go-Live): Copy of work order/Agreement + Go-live certificate from client on client's letterhead + Assignment Details as per the format provided in Bidding Forms</p> <p>Note: The credentials regarding experience and past performance to the extent required as per eligibility criteria submitted by the bidder may be verified by BNP, Dewas from the parties for whom work has been done.</p>
B. Financial Standings				
3.	<p>Average annual turnover of the bidder's firm during last three years period ending 31.03.2021 should be more than INR 60 Crores.</p> <ul style="list-style-type: none"> More than 60 Crores upto 120 Crores = 10 marks more than 120 Crores upto 150 Crores = 15 marks more than 150 Crores = 20 marks 	<p>Single Bidder – Bidder</p> <p>Consortium – Lead Bidder</p>	20	<p>CA Audited Balance sheet and Profit & Loss statement for FY 2020-21, 2019-20 and 2018-19 /Relevant Certificate from Chartered Accountants</p>
C. Proposed Track and Trace Team				
4.	<p>Minimum Experience of the proposed team is given below:</p> <ul style="list-style-type: none"> Team Leader = 10 years Solution Design Expert = 8 years Functional/ SME/Domain Expert = 8 years 	<p>Single Bidder – Bidder</p> <p>Consortium – Any member</p>	12	<p>Signed CVs along with necessary supporting documents.</p>

	The candidate shall have to satisfy specified minimum experience along with required qualification and certification. For every additional years of relevant experience of a profile, 1 mark shall be awarded subject to a maximum of 4 marks for each profile. Note: Partial years shall not be considered i.e., 12.9 years shall be considered as 12 years.			
D.	Capability-Certification			
5.	Bidder should have valid ISO 27001:2013 or higher certification Or The bidder must have CMMi level 5 04 Marks for each certification. Maximum marks shall be 8	Single Bidder – Bidder Consortium – Any member	8	Copy of valid certificate
Total Marks			100	

1.2.3 Presentation on Proposed Approach & Methodology:

Bidders shall be required to make a presentation detailed Approach & Methodology. Details to be included in Approach & Methodology presentation by Bidders are:

- i Project Execution Plan: Bidder's Project Execution Plan should comprise of:
 - a. Understanding of overall project scope
 - b. High level Project execution plan with risk factor along with timelines, activity/sub-activity and risk mitigation strategies.
- ii Proposed Solution: Bidder's proposed solution should cover following:
 - a. Solution Approach & Methodology for Track and Trace Solution
 - b. High Level Solution Architecture Design covering Units, DC and DR.
 - c. High level approach for integration with existing SAP
 - d. How the serialization and aggregation would be achieved through barcode.
 - e. What all sensors would be installed on machines to detect the sheet related anomalies
 - f. Bandwidth requirements for connectivity from all three units to DC and DC to DR.
 - g. Storage requirements at Units, DC and DR level.
- iii Design/Architecture proposed:
 - b. Bidder to present/demonstrate technical capability of the proposed solution.
 - c. Why to consider the given solution.
 - d. Value proposition of solution proposed.
- iv BNP, Dewas reserves the right to reject bid of any Bidder, if the proposed solution not found satisfactory or has not covered the necessary aspects of the solution.

1.2.4 Consortium / Joint Venture Criteria

- a. Bids from Consortium / Joint Venture are acceptable subject to fulfilling the eligibility criteria. The lead member will be authorized by all other members of the Consortium / Joint Venture. The members of the Consortium / Joint Venture shall enter into an agreement for submitting a bid which should be duly notarized. The agreement shall convey the intent to form a Consortium / Joint Venture which meets the requirements of this RFP, clearly mentioning the roles and responsibilities of each member.
- b. In case of Consortium/ Joint Venture, the Lead member, who is responsible for performing a key function in contract management or is executing a major component of the proposed contract, shall be nominated as being in charge during the bidding periods and, in the event of a successful bid, during contract execution. The Lead member shall be authorized to incur liabilities and receive instructions for and on behalf of any and all members of the consortium; by submitting a power of attorney signed by legally authorized signatories of all the members.
- c. In case of Consortium/ Joint Venture, the sole responsibility of the work shall lie with the Lead Bidder for the execution of the contract in accordance with the contract terms. The Lead Bidder shall be held responsible for any delay/error/non-compliance etc.
- d. The response by the bidder or Consortium / Joint Venture to the RFP is liable for rejection, if information provided is found to be false at any stage during evaluation of bids and subsequently during the execution of the contract.
- e. The bidder and member of Consortium / Joint Venture are not allowed to participate in more than one (1) bid.
- f. All members of consortium should sign an integrity pact***
- g. Number of members in a consortium is limited to maximum of three (3) including lead bidder.***

SECTION X: TENDER FORM
ACCEPTANCE OF TERMS & CONDITIONS

To

Date.....

The Chief General Manager,
Bank Note Press,
(A unit of Security Printing and Minting Corporation of India Limited)
Dewas (M.P.) – INDIA

(Not Applicable)

Section XIV: Manufacturer's Authorization Form

As per Section XXI form no. 8

Section XV: Bank Guarantee Form for Performance Security

PROFORMA OF BANK GUARANTEE FOR CONTRACT PERFORMANCE GUARANTEE BOND (ON BANK'S LETTERHEAD WITH ADHESIVE STAMP)

Ref

Date

Bank Guarantee No

To,

(Insert Name & Address of the Purchaser)

Dear Sir,

1. Against contract vide Notification for Award of the Tender Nodated covering supply of..... (hereinafter called the 'contract') entered into between the **(insert name of Purchaser)** (herein after called as the Purchaser) and M/s.....,..... (here in after called the 'Contractor'), this is to certify that, at the request of the Contractor, we **(name of the bank)**, are holding in trust in favour of the Purchaser, the amount of**(write the sum here in words)**, to indemnify and keep indemnified the Purchaser, against any loss or damage that may be caused to, or suffered by the Purchaser, by reason of any breach by the Contractor of any of the terms and conditions of the said contract and/or in the performance thereof. We agree that the decision of the Purchaser, whether any breach of any of the terms and conditions of the said contract and/or in the performance thereof has been committed by the Contractor; and the amount of loss or damage that has been caused or suffered by the Purchaser, shall be final and binding on us, and the amount of the said loss or damage shall be paid by us, forthwith on demand and without demur to the Purchaser.

2. We **(name of the bank)**, further agree that, the guarantee herein contained, shall remain in full force and effect, for sixty days after the complete conclusion of the contractual obligations to the complete satisfaction of both the BIDDER and the BUYER, including warranty period whichever is later, i.e. till, (hereinafter called the 'said date') and that if any claim accrues or arises against us **(name of the bank)**, by virtue of this guarantee before the said date, the same shall be enforceable against us **(name of the bank)**, notwithstanding the fact that the same is enforced within six months after the said date, provided that notice of any such claim has been given to us, **(name of the bank)**, by the Purchaser, before the said date. Payment under this bond of guarantee shall be made promptly, upon our receipt of notice to that effect, from the Purchaser.

3. It is fully understood that this guarantee is effective from the date of the said contract and that we **(name of the bank)**, undertake not to revoke this guarantee during its currency, without the consent in writing of the Purchaser.

4. We undertake to pay to the Purchaser, any money so demanded, notwithstanding any dispute or disputes raised by the Contractor, in any suit or proceeding pending before any Court or Tribunal, relating thereto, our liability under this present, being absolute and unequivocal. The payments so made by us under this bond, shall be a valid discharge of our liability for payment thereunder, and the Contractor shall have no claim against us, for making such payments.

5. We..... ***(name of the bank)***, further agree that the Purchaser shall have the fullest liberty, without affecting in any manner our obligations hereunder, to vary any of the terms and conditions of the said contract, or to extend time of performance by the Contractor, from time to time, or to postpone for any time or form, time to time, any of the powers exercisable by the Purchaser, against the said Contractor and to for bear or enforce any of the terms and conditions relating to the said contracts and we..... ***(name of the bank)***, shall not be released from our liability under this guarantee, by reason of any such variation or extension being granted to the said Contractor, or for any forbearance and/or omission on the part of the Purchaser, or any indulgence by the Purchaser towards the said Contractor, or by any other matter or thing whatsoever, which under the law relating to sureties, would, but for this provision, have the effect of so releasing us from our liability under this guarantee.

6. This guarantee will not be discharged due to the change in the constitution of the Bank or the Contractor.

Section XX: Integrity Pact

(Ref Para 44.3 of GIT)

(To be signed on Plain Paper)

This Agreement (hereinafter called the Integrity Pact) is made on _____ day of the month of _____ 202__ at _____, India

BETWEEN

SPMCIL, a Miniratna Category I, Public Sector Enterprise of the Ministry of Finance, Government of India, (hereinafter called the “The Principal”, which expression shall mean and include, unless the context otherwise requires, his successors in office and assigns) of the First Part

AND

M/s. _____ (hereinafter called the “The Bidder/Contractor” which expression shall mean and include, unless the context otherwise requires, his successors and permitted assigns) of the Second Part.

PREAMBLE

‘The Principal’ intends to award, under laid down organizational procedures, contract/s for _____, ‘The Principal’ values full compliance with all relevant laws of the land, rules, regulations, economic use of resources and of fairness / transparency in its relations with its Bidder(s) and / or Contractor(s).

In order to achieve these goals, the Principal will appoint Independent External Monitors (IEMs) who will monitor the tender process and the execution of the contract for compliance with the principles mentioned above.

Section 1 - Commitments of the ‘The Principal’

6. ‘The Principal’ commits itself to take all measures necessary to prevent corruption and to observe the following principles: -
 - a. No employee of the Principal, personally or through family members, will in connection with the tender for , or the execution of a contract, demand, take a promise for or accept, for self or third person, any material or immaterial benefit which the person is not legally entitled to.
 - b. The Principal will, during the tender process treat all Bidder(s) with equity and reason. The Principal will in particular, before and during the tender process, provide to all Bidder(s) the same information and will not provide to any Bidder(s) confidential /additional information through which the Bidder(s) could obtain an advantage in relation to the tender process or the contract execution.
 - c. The Principal will exclude from the process all known prejudiced persons.
- 1 If the Principal obtains information on the conduct of any of its employees which is a criminal offence under the IPC/PC Act, or if there be a substantive suspicion in this regard, the Principal will inform the Chief Vigilance Officer and in addition can initiate disciplinary actions.

Section 2 - Commitments of the 'Bidder / Contractor'

7. The 'Bidder/ Contractor' commit themselves to take all measures necessary to prevent corruption. The 'Bidder/ Contractor' commit themselves to observe the following principles during participation in the tender process and during the contract execution.
 - a. The 'Bidder/ Contractor' will not, directly or through any other person or firm, offer, promise, or give to any of the Principal's employees involved in the tender process or the execution of the contract or to any third person any material or other benefit which he/she is not legally entitled to, in order to obtain in exchange any advantage of any kind whatsoever during the tender process or during the execution of the contract.
 - b. The 'Bidder/ Contractor' will not enter with other Bidders into any undisclosed agreement or understanding, whether formal or informal. This applies in particular to prices, specifications, certifications, subsidiary contracts, submission or non-submission of bids or any other actions to restrict competitiveness or to introduce cartelisation in the bidding process.
 - c. The 'Bidder/ Contractor' will not commit any offence under the relevant IPC/PC Act; further the 'Bidder/ Contractor' will not use improperly, for purposes of competition or personal gain, or pass on to others, any information or document provided by the Principal as part of the business relationship, regarding plans, technical proposals, and business details, including information contained or transmitted electronically.
 - d. The 'Bidder/ Contractor' of foreign origin shall disclose the name and address of the Agents/representatives in India, if any. Similarly, the Bidder/Contractors of Indian Nationality shall furnish the name and address of the foreign principals, if any. Further details as mentioned in the "Guidelines on Indian Agents of Foreign Suppliers" shall be disclosed by the Bidder/Contractor. Further, as mentioned in the Guidelines all the payments made to the Indian agent/representative have to be in Indian Rupees only. Copy of the "Guidelines on Indian Agents of Foreign Suppliers" is placed at Annex to this agreement.
 - e. The 'Bidder/ Contractor' will, when presenting their bid, disclose any and all payments made, is committed to, or intends to make to agents, brokers, or any other intermediaries in connection with the award of the contract.
 - f. Bidder /Contractor who have signed the Integrity Pact shall not approach the Courts while representing the matter to IEMs and shall wait for their decision in the matter.
8. The 'Bidder/ Contractor' will not instigate third persons to commit offences outlined above or be an accessory to such offences.

Section 3 - Disqualification from tender process and exclusion from future contracts

If the 'Bidder/Contractor', before award or during execution has committed a transgression through a violation of Section 2, above or in any other form such as to put their reliability or credibility in question, the Principal is entitled to disqualify the 'Bidder/Contractor' from the tender process or take action as per the procedure mentioned in the "Guidelines on Banning of business dealings".

Section 4 - Compensation for Damages

- 1) If the Principal has disqualified the 'Bidder/ Contractor' from the tender process prior to the award according to Section 3, the Principal is entitled to demand and recover from 'Bidder/ Contractor' the damages equivalent to Earnest Money Deposit/ Bid Security.

- 2) If the Principal has terminated the contract according to Section 3, or if the Principal is entitled to terminate the contract according to Section 3, the Principal shall be entitled to demand and recover from the Contractor liquidated damages of the Contract value or the amount equivalent to Performance Bank Guarantee.

Section 5 - Previous transgression

- 1) The Bidder declares that no previous transgressions occurred in the last three years with any other Company in any country conforming to the anti-corruption approach or with any Public Sector Enterprise in India that could justify his exclusion from the tender process.
- 2) If the Bidder makes incorrect statement on this subject, he can be disqualified from the tender process or action can be taken as per the procedure mentioned in "Guidelines on Banning of business dealings".

Section 6 - Equal treatment of all Bidders / Contractors / Subcontractors

- 1) Sub- Contracting is not allowed. However, SI may sub-contract auxiliary work such as Civil, Electrical, etc. but after taking due permission from BNP, Dewas. Also, SI will be directly responsible for the quality of the Sub-Contracting work. SI shall have to ensure necessary confidentiality obligation as per the agreement and NDA signed with BNP, Dewas for all the Sub-contracts work also.
- 2) The Principal will enter into agreements with identical conditions as this one with all Bidders and Contractors.
- 3) The Principal will disqualify from the tender process all bidders who do not sign this Pact or violate its provisions.

Section 7 - Criminal charges against violating Bidder(s) / Contractor(s) /Subcontractor(s)

If the Principal obtains knowledge of conduct of a Bidder, Contractor or Subcontractor, or of an employee or a representative or an associate of a Bidder, Contractor or Subcontractor which constitutes corruption, or if the Principal has substantive suspicion in this regard, the Principal will inform the same to the Chief Vigilance Officer.

Section 8 - Independent External Monitor

- 1) The Principal appoints competent and credible Independent External Monitor for this Pact after approval by Central Vigilance Commission. The task of the Monitor is to review independently and objectively, whether and to what extent the parties comply with the obligations under this agreement.
- 2) The Monitor is not subject to instructions by the representatives of the parties and performs his/her functions neutrally and independently. The Monitor would have access to all Contract documents, whenever required. It will be obligatory for him / her to treat the information and documents of the Bidders/Contractors as confidential. He/ she reports to the Chairman and Managing Director of SPMCIL.
- 3) The Bidder(s)/Contractor(s) accepts that the Monitor has the right to access without restriction to all Project documentation of the Principal including that provided by the Contractor. The Contractor will also grant the Monitor, upon his/her request and demonstration of a valid interest, unrestricted and unconditional access to their project documentation. The same is applicable to Sub-contractors.

- 4) The Monitor is under contractual obligation to treat the information and documents of the Bidder/ Contractor(s) / Sub-contractor(s) with confidentiality. The Monitor has also signed declarations on 'Non- Disclosure of Confidential Information' and of 'Absence of Conflict of Interest'. In case of any conflict of interest arising at a later date, the IEM shall inform Chairman and Managing Director of SPMCIL and recuse himself / herself from that case.
- 5) The Principal will provide to the Monitor sufficient information about all meetings among the parties related to the Project provided such meetings could have an impact on the contractual relations between the Principal and the Contractor. The parties offer to the Monitor the option to participate in such meetings.
- 6) As soon as the Monitor notices, or believes to notice, a violation of this agreement, he/she will so inform the Management of the Principal and request the Management to discontinue or take corrective action, or to take other relevant action. The monitor can in this regard submit nonbinding recommendations. Beyond this, the Monitor has no right to demand from the parties that they act in a specific manner, refrain from action, or tolerate action.
- 7) The Monitor will submit a written report to the Chairman and Managing Director of SPMCIL within 8 to 10 weeks from the date of reference or intimation to him by the Principal and, should the occasion arise, submit proposals for correcting problematic situations.
- 8) If the Monitor has reported to the Chairman and Managing Director of SPMCIL, a substantiated suspicion of an offence under relevant IPC/ PC Act, and the Chairman and Managing Director of SPMCIL has not, within the reasonable time taken visible action to proceed against such offence or reported it to the Chief Vigilance Officer, the Monitor may also transmit this information directly to the Central Vigilance Commissioner.
- 9) The word 'Monitor' would include both singular and plural.

Section 9 - Pact Duration

This Pact begins when both parties have legally signed it. It expires for the Contractor 12 months after the last payment under the contract, and for all other Bidders 6 months after the contract has been awarded. Any violation of the same would entail disqualification of the bidders and exclusion from future business dealings.

If any claim is made / lodged during this time, the same shall be binding and continue to be valid despite the lapse of this pact as specified above, unless it is discharged/ determined by Chairman and Managing Director of SPMCIL.

Section 10 - Other provisions

- 1) This agreement is subject to Indian Law. Place of performance and jurisdiction is the Registered Office of the Principal, i.e., New Delhi.
- 2) Changes and supplements as well as termination notices need to be made in writing. Side agreements have not been made.
- 3) If the Contractor is a partnership or a consortium, this agreement must be signed by all partners or consortium members.

- 4) Should one or several provisions of this agreement turn out to be invalid, the remainder of this agreement remains valid. In this case, the parties will strive to come to an agreement to their original intentions.
- 5) Issues like Warranty / Guarantee etc. shall be outside the purview of IEMs.
- 6) In the event of any contradiction between the Integrity Pact and its Annexure, the Clause in the Integrity Pact will prevail.

Annex to Integrity Pact

Guidelines for Indian Agents of Foreign Suppliers

- 1.0 There shall be compulsory registration of agents for all Global (Open) Tender and Limited Tender. An agent who is not registered with SPMCIL shall apply for registration in the registration form with appropriate unit.
- 1.1 Registered agents will file an authenticated Photostat copy duly attested by a Notary Public/Original certificate of the Principal confirming the agency agreement. It should cover - the precise relationship, services to be rendered, mutual interests in business - generally and/ or specifically for the tender. Any commission/remuneration/ salary/ retainer ship, which the agent or associate receives in India or abroad from the OEM, whether should be brought on record in the Agreement and be made explicit.
- 1.2 Wherever the Indian representatives have communicated on behalf of their principals and the foreign parties have stated that they are not paying any commission to the Indian agents, and the Indian representative is working on the basis of salary or as retainer, a written declaration to this effect should be submitted by the party (i.e., Principal) before finalizing the order.
- 2 Disclosure of particulars of agents/ representatives in India, if any.
 - 2.1 Tenderers of Foreign nationality shall furnish the following details in their offers:
 - 2.1.1 The 'Bidder/ Contractor' of foreign origin shall disclose the name and address of the agents/ representatives in India if any and the extent of authorization and authority given to commit the Principals. In case the agent/ representative be a foreign Company, it shall be confirmed whether it is existing Company and details of the same shall be furnished.
 - 2.1.2 The amount of commission/ remuneration included in the quoted price(s) for such agents/ representatives in India.
 - 2.1.3 Confirmation of the Tenderer that the commission/remuneration, if any, payable to his agents/ representatives in India, may be paid by SPMCIL in Indian Rupees only.
 - 2.2 Tenderers of Indian Nationality shall furnish the following details in their offers:-
 - 2.2.1 The 'Bidder/ Contractor' of Indian Nationality shall furnish the name and address of the foreign principals, if any, indicating their nationality as well as their status, i.e., whether manufacturer or agents of manufacturer holding the Letter of Authority of the Principal specifically authorizing the agent to make an offer in India in response to tender either directly or through the agents/ representatives.
 - 2.2.2 The amount of commission/ remuneration included in the price (s) quoted by the Tenderer for himself.
 - 2.2.3 Confirmation of the foreign principals of the Tenderer that the commission/ remuneration, if any, reserved for the Tenderer in the quoted price(s), may be paid by SPMCIL in India in equivalent Indian Rupees on satisfactory completion of the Project or supplies of Stores and Spares in case of operation items.

- 2.3 In either case, in the event of contract materializing, the terms of payment will provide for payment of the commission/remuneration, if any payable to the agents/ representatives in India in Indian Rupees on expiry of 90 days after the discharge of the obligations under the contract.
- 2.4 Failure to furnish correct and detailed information as called for in paragraphs above will render the concerned tender liable to rejection or in the event of a contract materializing, the same liable to termination by SPMCIL. Besides this there would be a penalty of banning business dealings with SPMCIL or damage or payment of a named sum.

[ON OEM's LETTERHEAD]

To
The Chief General Manager,
Bank Note Press, Dewas,
Madhya Pradesh – 455001

Date: DD/MM/YYYY

Sub: Authorization of <<Name of the Bidder >> to provide services based on our product(s)

Ref: Supply, Installation, Commissioning and Maintenance of Track and Trace System at
SPM- Narmadapuram, BNP-Dewas and CNP-Nashik (RFP No:___Dated:___/___/___)

Dear Sir,

I, hereby, declare that <<Name of the OEM>> am the Original Equipment Manufacturer in respect to the product (s) proposed in the RFP. I confirm that <Name of the Bidder> has due authorization from us to provide product(s) listed below and related services of warranty, licensing and maintenance, to BNP, Dewas, as per your RFP (Ref. No. dated.....).

Having read, examined, and understood the RFP, the receipt of which is hereby duly acknowledged, we, the undersigned, offer to product and services as required and outlined in the RFP. I agree to provide required support for all the terms and conditions set out in the RFP document.

I certify that, I <<Name of Representative from OEM>> am the authorized representative of the <<Name of the OEM>> to sign this authorization letter on behalf of the OEM.

I endorse the contracting and licensing terms provided by <Name of the Bidder> to BNP, Dewas. I declare that the proposed products shall not become "end of life" for next 7 years beginning from the date of Go-live. Also, the support including updates, upgrades, spares, patches etc. for the quoted products shall be available for next 7 years beginning from the date of Go-live.

We <<Name of the OEM>> hereby confirm that neither our firm nor our solution or any of our offered products under this bid has/have been under declaration of ineligibility for any cyber or information security threat by any Sovereign Government.

I endorse to provide direct technical support to the BNP, Dewas for the Contract period even in absence of the <Name of the Bidder> providing services to the BNP, Dewas. The warranty shall be onsite replaceable warranty of the products that are listed below. I also certify that the below mentioned product being supplied by the <Name of the Bidder> meets the minimum specifications given in RFP.

Sub: Cover letter for Financial Proposal

Ref: Supply, Installation, Commissioning and Maintenance of Track and Trace System at
SPM- Narmadapuram, BNP-Dewas and CNP-Nashik (RFP No:___Dated:___/___/___)

Dear Sir,

Having examined the RFP, the receipt of which is hereby duly acknowledged, we, the undersigned, offer to be the System Integrator and carry out the work as and outlined in the RFP. We have carefully read and understood the terms and conditions of the Contract applicable to the RFP and we do hereby undertake Services as per these terms and conditions. We declare that our prices are as per the technical specification and RFP document. We do hereby undertake that, in the event of acceptance of our bid, the Services shall be completed as stipulated in the RFP Document.

We, hereby, confirm that the solution proposed is complete in all respects and shall be sufficient to fulfill all the requirements and services levels as mentioned in the RFP. In case, the solution is found to be incomplete / insufficient, we shall take necessary measures at no additional cost to the BNP, Dewas.

We hereby confirm that all the prices mentioned in the financial proposal are in Indian National Rupee (INR) only.

We hereby confirm that our financial bid complies with the condition of Cumulative CAPEX should not exceed 65% of the Total Bid Cost. We provide unconditional acceptance of all the terms and conditions set out in the RFP document and also agree to abide by this RFP response for a period of 180 days from the date of bid opening. We hereby declare that in case the Contract is awarded to us, we shall submit the Contract Performance Security in the form prescribed in the RFP. We agree that you are not bound to accept any proposal you may receive. We also agree that you reserve the right in absolute sense to reject the solution completely with or without assigning any reason whatsoever.

It is hereby confirmed that I am entitled to act on behalf of our company and empowered to sign this document as well as such other documents, which may be required in this connection.

Annexure - C (SAP Existing Landscape)

a. Existing IT landscape

Currently, SAP ERP is implemented in all the 9 units (including BNP-Dewas, CNP- Nashik & SPM-Narmadapuram) and the Head office, Delhi. The existing version of SAP is ECC 6.0 EHP 7. Further, SPMCIL is in process of upgradation of SAP ERP system to SAP S/4 HANA. Following SAP modules are currently being used by the units:

Finance (FI)	Plant Maintenance (PM)	Document Management System (DMS)
Controlling (CO)	Quality Management (QM)	Solution Manager
Material Management (MM)	Human Capital Management (HCM)	Project Systems
Sales & Distribution (SD)	Business Intelligence (BI)	SAP ABAP
Production Planning (PP)	Enterprise Portal (EP)	SAP Basis

b. Deployment Architecture of the SAP

SAP is implemented with a three-tier landscape i.e. Development, Quality and Production Systems. SPMCIL has a centralized network architecture based out of its Data Center (at IGM, Noida) and Disaster Recovery Center (at IGM, Hyderabad). The Network Architecture is utilizing the MPLS core network for carrying the data traffic across the SPMCIL units.

The units of SPMCIL across the locations are connected to the centralized network through WAN connectivity, so that the users from various units of SPMCIL can access the SAP ERP systems without any performance degradation issues. The WAN connectivity is enabled with MPLS (wired) links. The Data Center is connected to the MPLS WAN with the provision of Customer Edge and Provider Edge Routers.

SHEET SPECIFICATION & MOVEMENT

Deno.	Matrix	Sheet Size	Note Size
Rs.10/-	6 X 10	758 X 665	123 X 63
Rs.20/-	6 X 10	794 X 665	129 X 63
Rs.50/-	5 X 10	695 X 695	135 X 66
Rs.100/-	5 X 10	730 X 695	142 X 66
Rs.200/-	5 X 10	750 X 695	146 X 66
Rs.500/-	5 X 10	770 X 695	150 X 66
Rs.2000/-	4 X 10	684 X 695	166 x 66

- Trimming size (Top - 25mm, Sides & Bottom – 10 mm)
- Simultan Feeding (For Rs.100/- & Above)**
Input – Reverse Side, top panel 1st IN.
Output – Reverse side at top (same as input)
- Simultan Feeding (For Rs.50/- & below, w/o Intaglio)**
Input – Obverse Side, top panel 1st IN.
Output – Obverse side at top (same as input)
- Intaglio Feeding (For Rs.100/- & Above)**
Input – Reverse Side, top panel 1st IN.
Output – Obverse side at top.
- Numerota Feeding (common for all deno.)**
Input – Front Side, top panel 1st IN (notch in Right side)
Output – Obverse side at Top (same as input)
- Cutpack & Cutlink Feeding:**
Input – Front Side top.
Output – In bundle form (1000 notes) shrink wrapped.

Annexure – E (Definition)

Abbreviations & Definition

1. **APS:** Automatic Packaging System.
2. **BPS:** Bank Note Processing System (also known as SNIM).
3. **BUNDLE:** 1000 notes (or 10 Packets, each packet of 100 note).
4. **CAMC:** Comprehensive Annual Maintenance Contract.
5. **Changeover:** Changeover of machine i.e. change in denomination to be processed on machine.
6. **CRN Numbering:** Computerized Random Numbering, done on all—good as well as Suspected / 'With-Cancellation' sheets and later processed on Cutpack & SNIM.
7. **CSI:** Color Shift Ink (used in Intaglio machine for Rs.200/- & above deno. printing).
8. **CWBN:** Cylinder Mould Watermark Bank Note.
9. **EOP:** Emergency Operating Procedures.
10. **FAT:** Final Acceptance Test.
11. **GUI:** Graphical User Interface.
12. **GWRA:** Good-Web Reel Area.
13. **HMI:** Human Machine Interface.
14. **OVI:** Optical Variable Ink (now referred as CSI).
15. **OCR:** Optical Character Recognition.
16. **PARCEL:** Lot of 1000 sheet.
17. **PDU:** Power Distribution Units.
18. **PTL:** Paper Testing Lab.
19. **REAM:** Lot of 500 sheet.
20. **RCA:** Root Cause Analysis.
21. **RPO:** Recovery Point Objective.
22. **RTO:** Recovery Time Objective.
23. **RTVM:** Requirement Traceability and Verification Matrix.
24. **Serial All-Good Numbering:** Numbering Done on All-Good sheets.
25. **SLA:** Service Level Agreement.
26. **SNIM:** Single Note Inspection Machine.
27. **SPOC:** Single point of contact.
28. **SPOF:** Single Point of Failure.
29. **SRS:** Software Requirement Specification.
30. **TNA:** Training Need Analysis.
31. **UAT:** User Acceptance Test.
