

Dated: 22.04.2022

Sub.: Minutes of meeting of pre-bid conference held on 22.04.2022 at BNP Conference Hall with Representatives of Prospective bidder for Design, Manufacture, Testing, Supply, Installation and Commissioning of Sheet Fed 5 colour (minimum) Intaglio (Indirect Inking) machine for banknote printing at speed of 10000 Sheets per hour. (02 nos. for CNP, Nashik) against tender no. 01/BNP/P/INTAGLIO MACHINE/2021-22/GT dated 31.03.2022
Ref: Letter dated 20 January 2020 received from M/s. UNO Seisakusho Co., Ltd, Japan

M/s. Koenig & Bauer Banknote Solution SA Switzerland

S. No.	Reference in tender document	Query of M/s. Koenig & Bauer Banknote Solution	Reply of BNP, Dewas
1.	Section V - Special Conditions of Contract page no. 11: Warranty Clause:	As a foreign bidder and the time required for the delegation of parts and personnel, we kindly request to increase the eventual downtime of the machine to "... not more than 20 working days". Please rest assured however that we would take every possible measure to shorten this time span. Please confirm your agreement.	As per tender
2.	Section V - Special Conditions of Contract page no. 12&13: Terms & Mode of Payment :	As the tender/contract can cater for up to two machines to be delivered separately, we kindly request that the indicated payment terms; reflect a payment machine by machine as the situation for the stipulated installments arise.	As per tender
3.	Section VI - List of Requirements page no. 15: Required Delivery Period clause no. 3 a	In order to allow for the optimum preparation and realization of the PDI and factory training activities for, we kindly request an interval of 9 weeks between each machine; i.e.: 1st machine within 32 weeks 2nd machine within 41 weeks Please confirm the optimized delivery schedule for pre-dispatch inspection.	As per tender

Sr. No.	Reference in tender document	Query of M/s. Koenig & Bauer Banknote Solution	Reply of BNP, Dewas
4.	Section VI – List of Requirements page no. 15 : Required Delivery Period clause no. 3 c: Commissioning	Can BNP/CNP please clarify which plates will be used for the commissioning of the machines, the Seller's test plates or the Purchaser's production plates? Please clarify.	Clarified that during commissioning sellers plates and during FAT purchaser plates shall be used.
5.	Section VI – List of Requirements page no. 15 : Required Delivery Period clause no. 3 c: Installation- Handling & lifting of equipment	Can you please specify that CNP shall be responsible for the handling of the crates/boxes under Supplier's supervision and provide to the Seller all lifting equipment necessary for the installation of the machines (gantry forklifts, etc.). Please confirm.	Up to the installation site: CNP's responsibility During installation: Supplier's responsibility.
6.	Section VI – List of Requirements page no. 15 : Required Delivery Period clause no. 3 c: Installation- Handling & lifting of equipment	Installation – auxiliary personnel In order to have a smooth progression of the installation and commissioning process, we kindly ask CNP to put at Seller's disposal the required local personnel. Please confirm this understanding.	This is the part of bidder scope. However it is clarified that CNP/buyer shall provide the required support
7.	Section VII – Technical Specifications page no. 20 Brief Description clause no. 1.3	In order to avoid confusion, kindly please share the existing infrastructure/utilities.	Shall be provided on the request of prospective bidder before submission of bid.
8.	Section VII – Technical Specifications page no. 20 Brief Description clause no. 1.6	The intaglio printing process involves a very high pressure to be supported by the machine, up to 80 tons of printing pressure. The applied pressure has also a decisive impact on the ink consumption levels. Please confirm that the machine frame, supports and cylinders etc. should be able to support 80 tons of printing pressure.	Bidder's understanding is correct.

Sr. No.	Reference in tender document	Query of M/s. Koenig & Bauer Banknote Solution	Reply of BNP, Dewas
9.	Section VII – Technical Specifications page no. 21 Essential General Specifications clause no. 2.13 engraving depth	Indeed, Intaglio effectiveness is highly recognizable to the public by the tactility provided by a deep engraving. May we highly encourage BNP/CNP to test and validate the Intaglio Printing Machine with a 160 microns existing design? Kindly confirm.	Requirement is from 10 micron to 160 micron. The supplier shall demonstrate the capability of 160 micron by providing their plates & equipment either at PDI stage or at pre-FAT stage.
10.	Section VII – Technical Specifications page no. 21 Essential General Specifications clause no. 2.19 list of consumables and sample dispatch	Considering that CNP/BNP is well acquainted with the intaglio printing process and its required operational consumables, we believe that this point is not required. Kindly delete.	As per para no. 2.19 under section VII of tender document, it is clarified that sample along with technical specification has to be supplied once within 120 days from the date of purchase order/contract.
11.	Section VII – Technical Specifications: Printing plate specifications, layout and punching system page no. 25, clause no.3.3.4	To avoid misunderstandings, specifications of the Printing Plate have to be clarified. Kindly please share the details.	It is further clarified that the offered machine shall be suitable for printing plate having dimension & thickness mentioned at para 2.9 & 2.10. However, the punching device shall be provided for proper mounting of the plates along with each machine.
12.	Section VII – Technical Specifications: Plate cylinder – plate punching device page no. 26, clause no. 3.3.4 a, II(9):	In the eventuality that the current device already in possession at CNP and BNP sites for plate punching is compatible with the newly tendered Intaglio Printing Machine, we understand that, in this case, additional punching devices will not be required. Kindly confirm.	Already clarified at point no. 11
13.	Thermoregulation unit – typo (p27):	A typo seems to have found its way into this paragraph: offset press and offset machine instead of intaglio machine. Kindly adapt.	Typographical error, needs to be read as "Intaglio Machine. Clarified.

Sr. No.	Reference in tender document	Query of M/s. Koenig & Bauer Banknote Solution	Reply of BNP, Dewas
14.	Section VII – Technical Specifications page no. 27: Board feeder for third pile page no. 27, clause 3.6.2:	For most Intaglio Press, only the 2 production piles are equipped with a board feeder. To be clarified if the board feeder system is required for the third delivery pile. Kindly confirm.	As per tender.
15.	Section VII – Technical Specifications page no. 27 clause no. 3.6.6 & page no. 68 PDI Checklist clause 18 i):	While the requirement in p68 says, "the trolley shall move by battery power", the requirement p.27 says, "The trolley itself is moved manually or battery powered". Kindly clarify.	It is a typographical error. Needs to be read as "The trolley itself is moved manually or battery powered".
16.	Section VII – Technical Specifications page no. 28 clause no. 3.8.2 a) Online Vision Inspection System – resolution	It is indicated that the imaging system shall have a resolution with a pixel size less than 0.2 mm, we kindly request to amend as follows "... less or equal to 0.25 mm" as per previous tender. Kindly confirm.	As per tender.
17.	Section VII – Technical Specifications page no. 28 clause no. 3.8.2 b) Online Vision Inspection System – resolution	The system shall have the capability to online inspect the entire printed sheet using reflected and transmitted lights. As the sheet is already inspected in the Offset process in transmitted light, it is not necessary to repeat this inspection in the Intaglio process. We would instead recommend inspecting the infrared reflective and absorbent areas. This is a standard feature currently used by many printing works around the world. Kindly confirm that the transmitted light inspection is not required and if the IR inspection during the Intaglio process should be part of the scope.	It is a typographical error, clarified that "The system shall have the capability to online inspect the entire printed sheet using suitable lights". Supplier should confirm the provision for IR inspection as a retro fitment for future up-gradation.

Sr. No.	Reference in tender document	Query of <u>M/s. Koenig & Bauer Banknote Solution</u>	Reply of BNP, Dewas
18.	Section VII – Technical Specifications page no. 29 clause no. 3.8.2 u, xi) Online Vision Inspection System – third party integration	Regarding the required provision to integrate third party sensors / inspection system to detect security features like paper taggants and ink taggants. Kindly clarify this request providing specific details of integration requirements.	Details will be provided to the successful bidder.
19.	Section VII – Technical Specifications page no. 29 clause no. 3.8.3: Hardware and Software Requirements	Regarding the provision of PLC source codes and any other source codes required for MIS development we kindly inform SPMCL that we will endeavor to comply with this requirement insofar as it concerns our own software. However, for commercial software used in our machines and all user interface applications we cannot comply with this request. Please confirm our understanding that only PLC software and sample code for MIS development is required and we kindly request to modify this paragraph accordingly.	It is clarified that this paragraph pertains to not only online vision inspection system but to the whole machine and commercial software used for this machine is not part of the requirement. The source code pertaining to fetch MIS data from the machine is required. The successful bidder shall provide software license for image processing, operating system etc.
20.	Section VII – Technical Specifications page no. 30 clause no. 3.9.4: System for monitoring production data	It is stated that the system shall be compatible for interfacing with track & trace facilities. Kindly clarify which track & trace facilities are concerned by this request.	The link of the track & trace tender is as below:- Tender document https://bnpdewas.spmcl.com/UploadDocument/Track%20and%20Trace-Final%20tender.1e3307d9-e9f5-4030-a956-a5324bb13764.pdf
21.	Section VII – Technical Specifications page no. 30 clause no. 3.9.5: System for monitoring production data	It is specified that the system shall provide data logging facilities module-wise to enable the user to identify and analyze the reasons for stoppages and breakdowns. Kindly explain what is meant by "module-wise".	Financial bid https://bnpdewas.spmcl.com/UploadDocument/Financial%20Bid-Track%20and%20Trace.63756278-4bae-4a20-90ba-c6fdbd4b5344.pdf It is clarified that module wise means modules indicated at page no. 22 point no. 3

Sr. No.	Reference in tender document	Query of M/s. Koenig & Bauer Banknote Solution	Reply of BNP, Dewas
22.	Section VII – Technical Specifications page no. 30 clause no. 3.9.8: System for monitoring production data – Software	It is specified that the software shall have suitable security protection for start-up. Kindly provide further details about "suitable security protection".	Suitable Security Protection means the machine system should have the BIOS password, Operator password, Admin password. It should also have role based access to machine system and inspection system.
23.	Section VII – Technical Specifications page no. 31 clause no. 3.9.9 Production management system point 2	Printing time on test sheets to be controlled and displayed on the monitor screen. Kindly clarify to which test sheets it refers.	Test sheets mean paper without water mark & thread. Presently blue colour sheets are used as test sheets.
24.	Section VII – Technical Specifications page no. 30 clause no. 3.9.3 "Interface to external Management Information Systems"	For the recently supplied machines, Koenig & Bauer has supplied 4 data interface methods based on the XML data format to allow the SPMCL IT department to interface data from the machines. Please advise if this meets the current tender requirements or, if not, please supply more detailed specifications on the data formats required.	The tender condition shall prevail and it is further clarified that XML data format suffices our requirement for MIS. The supplier shall mention the frequency of the XML data exchange and its process documentation
25.	Section VII – Technical Specifications page no. 30 clause no. 3.9.8 d "Fetch data from machine to other customer software for further ERP and Business Decision."	For the recently supplied machines, Koenig & Bauer has supplied 4 data fetch methods based on the XML data format to allow the SPMCL IT department to fetch data from the machines. Please advise if this meets the current tender requirements or, if not, please supply more detailed specifications on the data formats required.	Same as point no. 24 above.

26.	Section VII – Technical Specifications page no. 31 clause no. 3.9.8.1 "Open platform to adapt SCADA/Track trace platform to watch machine performance independently from remote place."	For the recently supplied machines, Koenig & Bauer has supplied 4 data fetch methods based on the XML data format to allow the SPMCL IT department to fetch data from the machines. Please advise if this meets the current tender requirements or, if not, please supply more detailed specifications on the data formats required.	The link of the track & trace tender is as below:- Tender document https://bnpdewas.spmcl.com/UploadDocument/Track%20and%20Trace-Final%20tender.1e3307d9-e9f5-4030-a956-a5324bb13764.pdf Financial bid https://bnpdewas.spmcl.com/UploadDocument/Financial%20Bid-Track%20and%20Trace.63756278-4bae-4a20-90ba-c6fdd4b5344.pdf
27.	Section VII – Technical Specifications page no. 32 clause no. 3.10.2: Online Micro-Perforation Module – machine speed	The integration of an on-line Micro-Perforation module will have a negative impact on the speed of the machine, as the speed will depend upon the design of the Micro-Perforation. Please confirm our understanding and we kindly request you modify your request accordingly.	As per tender.
28.	Section VII – Technical Specifications page no. 32 clause no. 3.10.3: Online Micro-Perforation Module-machine height	The addition of the Micro-Perforation module will necessarily increase the height of the machine. Kindly confirm your understanding.	The bidders' understanding is correct. However, point no. 1 will be as per tender.
29.	Section VII – Technical Specifications page no. 34 clause no. 7: Accessories – Schablon rollers point no. j, k, l, m, n, o	We would like to point out that as there is no necessity to remove the schablon cylinders from our machine these items are not required. Please confirm your understanding	The bidders' understanding is correct.
30.	Section VII – Technical Specifications page no. 34 clause no. 7: Accessories – hanger for wiping roller point no. n	We understand that if the Intaglio Printing Machine proposed does not require a device to lift the wiping cylinder off the wiping tank, this accessory should not be part of the supply. Kindly confirm this assumption.	The bidders' understanding is correct.

31.	Section VII – Technical Specifications page no. 35 clause no. 8 point no. C, D "Auxiliaries – air pumps."	The machine we will propose uses PIAB technology and as such, air pumps for the feeder and delivery are not required. Kindly confirm your acceptance of the use of the PIAB technology.	The tender conditions shall prevail. However, a better system/technology can be offered to meet the requirement. One spare air compressor for 02 Intaglio machine shall be provided
32.	Section VII – Technical Specifications page no. 35 clause no. 8 point no. g "Auxiliaries – air pumps."	For the "Other auxiliaries", the following items are the necessary equipment for a smooth operation with the Intaglio press and will be supplied. <ul style="list-style-type: none"> • Water Chiller • Membrane pumps group • Auxiliary tank for wiping solution • Pneuma Fill • Welding press • Thermoregulation unit The circulating pump for cooling water of 3 bars and 114 liters/min are not supplied. Fresh wiping solution is required for the operation of the machine. The water processing system is a separate system. We assume the supply of fresh wiping solution is not considered. Kindly confirm the above.	Successful bidder shall ensure enough supply of chilled water as per requirement. Fresh wiping solution will be supplied by buyer.
33.	Section VII – Technical Specifications page no. 36 clause no. 9.1 point no. x "Documents requirement."	Complete API documentation along with examples For the recently supplied machines, Koenig & Bauer has supplied 4 data fetch methods based on the XML data format to allow the SPM&LL IT department to fetch data from the machines. Please advise if this meets the current tender requirements or, if not, please supply more detailed specifications on the types and target APIs required.	As per tender.

Sr. No.	Reference in tender document	Query of M/s. Komori Corporation Japan	Reply of BNP, Dewas
38.	Section VII: Serial No 9. Documents Requirement point no. 9.1 i and two separates enlarge electrical drawing and error list We will provide the drawing in A3 size. (Our normal size of electrical drawing is A4.) Please confirm.	Tender conditions shall prevail
39.	Section VII: Serial No 9. Documents Requirement point no. 9.1 iii pictorial form of error finding of all possible errors ... We request to clarify what should be mentioned in the document.	Clarified and as per tender.
40	Section VII: Serial No 9. Documents Requirement point no. 9.1 ix	One Service PC /laptop unit for PLC programming etc. is to be provided along with the machine. However, similar requirement is again mentioned in Serial No. 9.2. Does it mean 2 Service laptops?	It is clarified that 01 laptop with each machine is required
41.	Section VII: Page 36 Serial No 10. Fat Conditions Sr. No.8 of the table	Machine Speed Demonstration: Here we would like to mention that the required demonstration is also dependent upon the quality of paper causing frequent feeder stoppages. We wish to discuss on this requirement.	Clarified and tender condition shall prevail.
42.	Section VII: Page 36 Serial No 10. Fat Period:	Please delete the requirement "If for reasons for which the seller is responsible, seller shall repeat the test in whole from beginning" ... since it is too strict. Sometimes it is difficult to define if it belongs to "seller's responsibility" or "customer's responsibility". We request to extend "Installation Period" defined in LD term in case of the test have to be repeated from beginning.	Tender condition shall prevail.
